No C. B.'s

A C. B. in watchmakers parlance is a "come back" or a watch that has been improperly repaired and sent out and brought back. Its annoying to both the dealer and the customer to have "come backs." You won't have to bring your watch back if we do the repairing. Our jewelers are men of experience and ability and when we repair your watch it's repaired, to stay in good running order. If we promise to have your watch for you by any certain date you can depend upon its being ready when you call. Our engraver is an expert. His work is gratis to all customers. You can get "scratching free" most any where but ours is engraving that is worthy of the name and of which you will be proud.
