

Mayer HONORBITL WORK SHOES

Mayer Honorbitl Work Shoes outwear all other shoes because they are made from specially selected, tough and seasoned stock—heavy oak tanned soles—solid counters—double leather toes and double rows of stitching. They stand hard knocks and rough wear, yet are not heavy or clumsy looking. For strength, wearing quality and comfort demand Mayer Honorbitl Work Shoes.

Made of "RESISTO VEAL"

The uppers of Mayer Honorbitl Work Shoes are made of the wonderful wear-resisting leather "Resisto Veal"—the new leather that resists even ammonia of the barnyard, and the alkali in the soil, and remains soft and pliable. This is the best wearing leather ever put into work shoes.

WARNING—Always be sure and look for the Mayer name and trade mark on the sole. If your dealer cannot supply you, write to us.

We make Mayer Honorbitl Shoes in all styles for men, women and children: Dryox, the wet weather shoe; Yerma, the fashion shoe; and Martha Washington Comfort Shoes.

—Magic City Loan & Invest. Co.

H. D. Davy, the Des Lacs potato grower, was an independent visitor today. Mr. Davy grew 32 acres of potatoes this year, but says the yield was not large. "I figure that the average farmer does his work well, but he cannot control the climatic conditions," Mr. Davy said. "If the experts can just give us the right weather, we will have no trouble in growing fine crops. I'd like to see some of the experts show me how to improve my farming with my own equipment. I'm willing to learn."

Grow's Big Clothing Sale.
The Grow Clothing Co. is advertising a big clothing sale in this issue. Mr. Grow has adopted drastic measures to convert his stock into cash and the public will reap the benefit. This is one of the finest stocks of clothing in the west and is all brand new.

CHAPPED HANDS.
Q. What is the best treatment for chapped hands.
Ans.—Miss Alice Haggart, Instructor in Hygiene, Agri. College, N. D. Frequently wash with any good soap and warm water; thoroughly dry and apply a lotion or ointment. A good lotion is made of glycerine and rose water. Boracic acid ointment is good.
Lotion.
60 grains gum tragacanth.
16 oz. rose water.
1 oz. alcohol.
1 oz. glycerine.
Let tragacanth and rose water stand twenty-four hours; then add alcohol and glycerine.

PLOWING OR DISCING.
W. R. Porter, Supt. Demonstration Farms, Agri. College, N. D. Using day labor at the day rate and horse labor and machinery depreciation the same as those used in bulletin 194, of the North Dakota Experiment Station, it would cost approximately \$1.40 per acre to fall plow land with six horses in North Dakota. Spring plowing will cost approximately \$1.12 for five horses in the same state. Discing in the fall costs approximately 40c per acre for single discing and 80c per acre for double discing. Spring discing costs approximately 35c per acre for single discing and 70c per acre for double discing. Therefore, if the land was not fall plowed but spring disced twice, the cost of producing wheat is lowered 70c an acre, with discing as compared with plowing. Fall plowed land would therefore have to yield from one to one and one-fourth bushels more wheat per acre at present prices to pay for fall plowing as compared with double discing in the spring. Spring plowed land would therefore, have to yield from one half to three-fourths of a bushel more wheat per acre to pay the cost of plowing as compared with double discing in the spring. As a general proposition, both fall and spring plowing will pay much better than double discing for wheat but there are some conditions where the soil is light and sandy and inclined to blow where it is better to put wheat in on disced land rather than on fall or spring plowed land. Such conditions, however, are comparatively rare in North Dakota.

IMPORTANT POINTS IN SUIT AGAINST SOO.
Ryder, N. D., Oct. 25.—An interesting suit has been brought by an insurance company against the Soo road on a car of wheat shipped from this station. Just before the Occident elevator at this place was burned in 1911, a car of wheat had been loaded and a bill of lading was given by the agent to the elevator man. The car caught fire from the elevator and burned. The insurance company paid the loss and sued the Soo.
Several things hinge on the suit. The insurance company claims that when the road gives the bill of lading it immediately becomes responsible for the safety of the shipment. The Soo contends the giving of the bill of lading at night meant nothing except to save time for the elevator man, and it should not be responsible for the car except for a reasonable time prior to the train leaving the depot. It also contends that in the lease of the road's right of way to the elevator company it is specifically stated that the road is not responsible for any damages occurring on the leased property. The insurance company insists that with the giving of the bill of lading the grain passed from the hands of the elevator to that of the road and the road must pay the loss.

SHERIFF HAS LOST FOUR PRISONERS.
Ellendale, N. D., Oct. 25.—John Warren was the fourth prisoner to escape from Sheriff Bishop in less than ten months the official has been on the job. Warren was being taken to the state reformatory at Mandan after an assault on his uncle, F. M. Robb, whom he beat over the head with a neckyoke. He sprang from a rapidly moving train and disappeared.

Chas. Geist has returned from Chicago and Waterloo, Ia., where he spent two months visiting friends. Charlie is strong for Chicago and reports a lively time in the village.
A. Farratt, publisher of the Donnybrook Courier, was in the city Monday transacting business.
FATALLY INJURED AT WILTON.
Bismarck, N. D., Oct. 25.—Virgie Monroe was fatally injured and Fred Anstrom and Carl Johnson, seriously bruised by an explosion of dynamite in a coal mine near Wilton last night. They had prepared the charge and retired to the next room instead of to the surface. Rescuers worked for two hours before getting the men out of the mine.
Only until next Saturday remains in which to pay the last half of the 1913 real estate taxes in this state, in order to avoid the 10 per cent penalty added November 1st. The last half of this year's real estate taxes must be paid before that day, or 10 per cent penalty is added to the unpaid half of the assessment. Those who failed to pay the first half of the assessment by June 1 have until January 1 to pay with 10 per cent penalty added. After that date the books will be turned over to the county auditor and additional expense will be added.
W. W. Tousley, formerly state printer, visited Minot recently and made the Independent a pleasant call. Mr. Tousley represents a stationery house and is doing well.
Herman Gordon, formerly of Gordon Bros., now of the Plymouth Clothing House, cordially invites his old friends to call. Opera House Block.

Cut Down That Fuel Bill

We guarantee that you can cut your fuel bill to the minimum if you will only use a

Round Oak Heater

The stove burns lignite and other kinds of coal very successfully. A magazine has been added in case that hard coal has been desired.

It has a hot-blast pipe used for soft coal only. The air is taken in at the feed door openings, carried in around the top of fire pot, and discharged on top of the fire through a series of openings.

This burns the soot and gases. It is all radiating surface, every part doing its duty.

It warms the floor perfectly under and around the stove.

Material used in the stove is the best money can buy. So great has the demand for the stove increased that the factory covers 15 acres and 1200 experts are employed.

We have these stoves in the various sizes, and carry also a full line of the ranges.

We'll be pleased to demonstrate them.

You'll find the prices reasonable.
