Protect Fully the Crops You Do Get

Even though you don't harvest as large a crop as you hoped for earlier in the season that will make it all the more necessary to protect what you do get and protect it fully, so that you can keep it in first-class condition ready for the high prices that crop failures and European war scare are very likely to produce.

See that you have enough granary room and that it is in first-class condition to take care of every bushel that you harvest and thresh.

You can better afford a few sacks of cement, a little lumber and some shingles or roofing NOW than you can further damage after your crops are threshed.

We are making very easy prices on all granary and field bin material.

Miss Margaret Sheridan, superintendent of schools of Renville county, returned to Mohall Monday after visiting at the Vandenoever home. She is regarded as the best politician in Renville county, has developed the real political hand clasp and is not averse to kissing the babies. Laying jokes aside, she is a first class superintendent of schools and ought to be re-elected easily.

A farmer named Johnson from east of town had an exciting runaway on Ward street Tuesday evening. Johnson and his two hands were thrown out and a big load of binder twine scattered over the street. The buildings cost over \$15,000,000 and it costs half a million dollars annually to conduct the institution. The doctor and wife took a run out to Atlantic City, the

SUMMER SCHOOL AT NORMAL INCREASED FORTY PER CENT

INTERESTING ITEMS CONCERNING CLOSING WEEK OF BEST SCHOOL EVER HELD FOR THE TEACHERS OF THE NORTH- WEST.

On Friday night before an audience of about 500, the summer school presented a very interesting program.

It was a most enjoyable entertainment, the different groups showing unusual talent and ingenuity in securing effects. The same friendly rivalry which marked Field Day was again evident—the groups accepting their prizes, ranging from popcorn to chocolate creams, with the spirit of victors. The judges were: Mrs. J. D. Taylor, Mr. Nestos, Dr. Johnson, Mr. Bacon and Mr. Carr.

At the close of the program President Crane presented the Field Day banner to McHenry county, represented by Mr. Colton of Towner.

The evening closed with dancing in the gymnasium, Rognlie's orchestra furnishing the music. In the assembly hall other entertainment was offered for those who did not dance. Frappe was served by the domestic science department.

Dr. Johnson closed his series of lectures on Monday night with an illustrated lecture on "Types of Feeble Minded and Their Heredity." These addresses have been most interesting, and highly instructive, from whatever viewpoint. The training school was most fortunate in the privilege of hearing this valuable series. From here he went to Valley City to speak before the Summer School in session there.

Additional numbers Monday evening were vocal solos by Miss Martha Reishus of Minot, and Supt. Colton of Towner.

Mrs. Jean McNaughton Stevens addressed the summer school on Tuesday morning on the subject of "Light of Other Days." A Northwestern training school without Mrs. Stevens would not be complete. Consequently this session has indeed been most fortunate in the privilege of listening to her words of inspiration for even a short time. May future sessions be equally fortunate.

On Friday evening of this week the County Superintendents of the affliating counties visited the summer school for the purpose of inspection and to convene in attendance Supts. A. C. Berg, Phelps, Hecht, Layne, Supt. Margaret Sheridan, Supt. Rosanna Duffy Campbell, Supt. Martha P. Tatem and Supt. E. G. Warren. They expressed themselves as very well pleased with the summer school. They were especially pleased with the assistance the Normal employment bureau has given them in the way of securing teachers and the method used. Thru instructors' estimates of the work done by summer school teachers and filed in the office, employing officials are in a position to get in closer touch with the applicants, particularly in their summer school work and attendance. This is also an apparent advantage to the teacher who is anxious for promotion, or for those who are conscientious in summer school courses.

There have been direct calls for a large number of teachers and a goodly number have been recommended who will undoubtedly be placed.

This summer school has shown an increase in attendance of forty per cent over last year at Velva, which is remarkable, considering that the length of term this year was increased fifty per cent. Undoubtedly this desirable attendance was brought about in a large measure thru the school being held at the State Normal, with the privilege of securing normal credits as well as the advantage apparent in the large number of courses offered, open to election by the teachers.
