

**BACK OF EVERY GLOBE RANGE IS INSURANCE**

Back of it all you'll find the Electric Welded Ingot Iron construction the reason for Globe Long Service and the

**25 YEAR INSURANCE.**

The Globe Insurance Policy inspires confidence, it certifies to the merit of the goods.

If you could see how Globe Stoves are made, the great care given each range or heater and the rigid inspection, you would not regard this policy, "daring." On the other hand you would wonder "how on earth that stove can ever wear out."

Globe, hard and soft coal heaters, cast cooks and ranges, and warm air furnaces are just as good as this Electric Welded Ingot Iron "Steel" Range line.

**HIGHEST SINCE CIVIL WAR**

Last Friday a car load of wheat was sold by the Equity Co-operative Exchange on the trading floor in St. Paul for \$1.81 per bushel, which is the highest price obtained for a car load of wheat in the Twin Cities since the Civil War. It was one cent higher than any other car of wheat sold for that day, either at Minneapolis or Duluth. The car was sold to C. C. Chambers & Co., a member of the St. Paul Grain Exchange and was to fill an order from a country mill. This carload of wheat came from Square Butte, Montana, a small town in the western part of the Judith Basin.

**THE DRAINAGE PROBLEM**

We have just received a shipment of sewer tile—the best thing in the world for use in draining your barnyard or in the construction of a drain from your house. This particular kind is the old reliable make—same as you used to help your grandfather lay down on the farm. We were especially fortunate in securing this shipment as it is the first of the kind we have been able to secure in years. It is only going to be a question of time before pot-holes about the farm will be a rarity. The same methods used to drain the small swamps ad-

opted by farmers in the eastern states will prevail here and the unsightly little sloughs observable on practically every farm in this section will be a thing of the past. Fence your farm with a good woven wire fence and drain the small sloughs and pot-holes, then you will be in a position to combat the weed pest to advantage. Drop in and let us talk the situation over with you. H. S. Johnson, Manager Rogers Lumber Yard. (Adv.)

**EQUITY NEWS ITEMS**

Mr. Robert Bealer of Hettinger, N. D., reached St. Paul last Tuesday with a carload of cattle consigned direct to the Equity Co-operative Exchange. Mr. Bealer is very enthusiastic over the work of farmers' organizations and whenever possible for him to do so will patronize any organization that is owned and controlled by the farmers themselves.

**North Dakota Visitors**

P. J. Boyle of Sheldon and W. F. Garrity of Wheelock, N. D., were pleasant visitors at the St. Paul office last Tuesday. They were getting acquainted with the farmers' own selling agency and plan on patronizing same in the future.

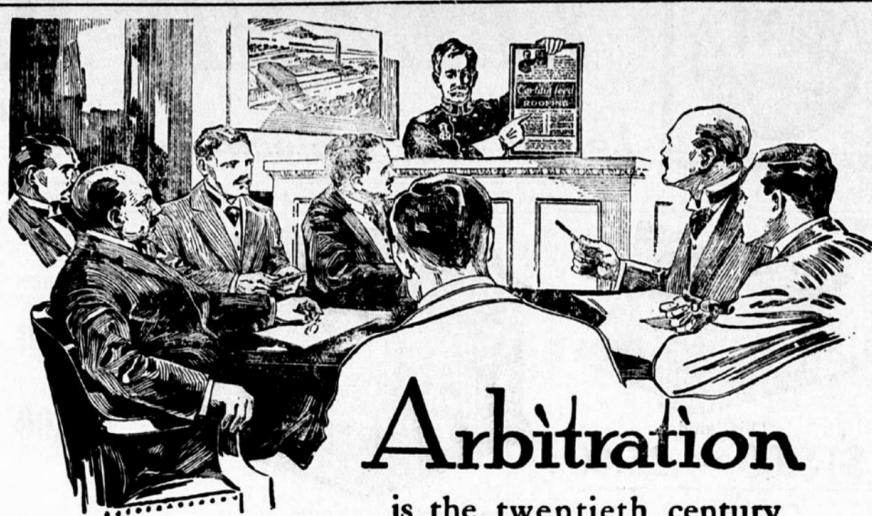

John Foller of Lisbon, N. D., was a pleasant visitor at the St. Paul office on Monday. Mr. Foller accompanied a carload of livestock here owned by him, George Foller and Ed Filbey. Mr. Foller is one of those farmers who can always be depended upon to stand by any co-operative undertaking which the farmers engage in.

P. J. Byrne of Nortonville, N. D., the first man to accompany a shipment of livestock to the Equity Co-operative Exchange at South St. Paul, part of which was of his own raising, returned to St. Paul Saturday and said that as he was leaving the city after having sold his cattle, he met another shipper who remarked, "Your cattle were not as good as mine but still you got a dime more for them." This looks good for the Equity Exchange and will go a long way toward making shippers for the Farmers' Own Selling Agency.

**Buy Potatoes**

Mr. Math Meurer of Nicollet, Minn., called at the St. Paul office this week and among other things stated that the farmers in his locality were buying potatoes instead of selling them. Mr. Meurer is enthusiastic over the co-operative marketing of farm products and can be depended upon in the future to give his brother farmers some good loyal support in this line.

Our secretary, Mr. G. A. Thiel, was very badly burned on the foot Monday morning while assisting Mrs. Thiel to put out a fire caused by burning paraffin wax and in his strenuous efforts to do this he also sprained the other foot. He is under the doc-

**Arbitration**

is the twentieth century means of settling disputes.

In time, Arbitration should supplant war in deciding differences between great nations. Acceptance of the principle of Arbitration will render great industrial strikes impossible—and even minor differences will come to be settled by this means. Impartial judges can be counted upon to render fair decisions.

To impartial judges of roofing, we will always be willing to leave decision as to the comparative merits of roofings, confident that intelligent investigation will result in a decision for

**Certain-teed Roofing**

An investigation into the methods of manufacturing would show that only the best quality of roofing felts is used in CERTAIN-TEED roofing. This is thoroughly saturated with a blend of soft asphalts—the formula of the General's Board of Expert Chemists. It is then coated with a blend of harder asphalts, which forms an impervious coating and prevents the inner saturation from drying out.

This explains why CERTAIN-TEED outlives ordinary roofing, and why it is possible to guarantee it for 5, 10 or 15 years, according to ply (1, 2 or 3). The responsibility of the world's largest manufacturer of roofings and building papers is behind this guarantee; which is conservative, as experience proves that CER-

TAIN-TEED outlives the period of guarantee.

The General makes one third of America's supply of asphalt roll roofing. His facilities are unequaled, and he is able to produce the highest quality roofing at the best manufacturing cost.

CERTAIN-TEED is made in rolls; also in slate-surfaced shingles. There is a type of CERTAIN-TEED for every kind of building, with flat or pitched roofs, from the largest skyscraper to the smallest residence or out-building.

CERTAIN-TEED is sold by responsible dealers all over the world, at reasonable prices. Investigate it before you decide on any type of roof.

**A Bargain in Land**

Having recently bought the N $\frac{1}{2}$  Section 17, Twp. 31 North, Range 9 East, M. M., I will place this land on the market for a short time only—this 320 acres for sale at \$4,800, or \$15 per acre. I do not want all cash, nor half cash. \$2,000 cash will handle the deal. This land is 99% tillable. The land is 7 miles south and one mile west, making it 8 miles from Rudyard, Mont., the improvements, consisting of a 4 room house, two-wire fence and 95 acres broke, cost about \$1,000. There is not a half section between this land and Rudyard that can be bought for less than \$8000, and no better piece of land in the country, with school land going at \$30 per acre with no improvements, selling at Havre on Oct. 5th, and wheat getting near the \$2.00 per bushel mark, and lots of land in the country producing \$60 per acre this year. There is positively no better land buy anywhere. Cheap land days are passing, and if you miss this bargain you are missing something if you are looking for a home or a good investment. You can put 200 acres in crop and pay for the land entirely out of one crop. What better do you want? The land is in good neighborhood, in the center of the best farming country, 2 miles from good school house with 9 months school a year. There is no one in Rudyard county that has no water; everyone has all kinds of water, a thing that can't be said of every locality in northern Montana. Rudyard has now about 10 buildings in course of construction, including a \$10,000 brick bank, hardware store, 50x100, public hall 40x100 feet, and several good residences. There has been some land recently sold for \$8,000 per half section, about 6 miles northeast of Rudyard. Come and let me show you one of the best half sections in the country, at give-away prices.

tor's care at his home, suffering intensely from the burns and sprain and the accident was far more serious than at first supposed. He is in hopes to be able to return to the office before many days.

**FATHERHOOD**

As a boy I should be industrious  
 At school,  
 Learn a lot,  
 Go seriously into some business,  
 Work night and day  
 To get married and support a wife.  
 Then I should have children;  
 Many of them,  
 To buy pants and corsets for  
 Over a period of  
 Twenty-odd years.  
 If none turned out  
 An old maid or  
 Good-for-nothing.  
 I should slave this  
 Best three-quarters of my life  
 Paying off installments on a house  
 Where my kids could flirt  
 And have fudge parties.  
 I should do all this  
 Because I am a man  
 And would be a model citizen.  
 But I won't!  
 I don't want to wake up  
 After the breaking period  
 Of my life and find myself  
 Old,  
 Shrunken,  
 Narrow,  
 Full of wheezes and aches  
 From buying oleomargarin  
 For my fat wife to trickle  
 To trickle down her epiglottis,  
 From paying for little trousers  
 With shiny black buttons on them,  
 For my boys.  
 I should do all this,  
 But I shan't.  
 —Robt. Carlton, New York Sun.

**Larger Quarters Deemed Necessary for Commercial Club**

The board of directors of the Minot Commercial club met Tuesday and considered important business matters. Not completing their work, they adjourned until Thursday when plans for the ensuing year's work will be

laid. The directors went on record as fully endorsing the plan for the new Minot General hospital.

At the Thursday's meeting the matter of continuing the work of the or-

ganization will be taken up. One thing that the board considers urgent is securing larger quarters where a general members' meeting may be held at least once a month.
