Archie D. McCannel, the noted eye, ear and nose specialist, who left Minot Thursday, Oct. 19th, for New York City in the interest of securing the shipment of the body of his nephew who was recently killed in the European war, is expected home on Monday. Dr. McCannel, while in the east, incidentally attended the National

Medical meeting which was held in Philadelphia, Pa., during the last week.

Straw votes may not count for much and yet they are always of interest. Mr. Keefe says that old land will produce good flax if handled right. Other crops should be grown for six or seven years before sowing flax, he says, and it is well to follow timothy with flax as the ground must be nice and clean. Art of Talking.

Talking is like playing on a harp; there is as much in laying the hands on the strings to stop their vibrations as in twanging them to bring out their music.—Holmes.
