He reports his crops as being in the very best of shape. A recent hail storm damaged his rye about 25 per cent and did some damage to the wheat, but as a heavy rain accompanied the storm, he believes the moisture did more good than the damage done by the hail. his Ford car. Mrs. Glickson went along. When about to cross the railroad at the crossing west of Charley Shubert's farm between here and Ross, No. 87, the fast mail train on the Great Northern, struck the front end of the auto and it was hurled completely around, rolled over down the steep bank. The engineer stopped the train and the conductor telephoned to Stanley and Doctor Brigham was summoned. Mr. and Mrs. Glickson and Mr. Mandelsohn were brought back to Stanley on the mail train and Dr. Brigham made a hurried examination, which proved that they had escaped any serious injury altho they were badly bruised and shaken up. It was an almost miraculous escape, considering the fact that the Ford rolled completely over down a very steep bank and landed at the bottom about twenty feet below. However, the Ford is a total wreck.

However, yesterday it was discovered that Mrs. Glickson was suffering from internal hemorrhage and she was taken to Minot on No. 2. AND YET WE KICK

I am writing this in the living room of my home, on a typewriter that weighs no more than a moderate-sized book.

Light is provided by a lamp in which burn two incandescent bulbs.

In an adjoining room is a telephone from which I can talk to any city on this continent.

On the wall is a thermostat which regulates the flow of gas in my furnace, and keeps the room at an even temperature of 70 degrees.

A music cabinet contains records of the finest arias from the best operas, and selections by the greatest musicians in the world. I can hear this music, leaning back in a comfortable chair while I smoke a cigar, and I don't have to defer to any one in making up my program for the evening.

Almost within arm's reach are several shelves of books filled with the most profound and beautifully expressed thoughts of the ages.

The floors of my home are cleaned with a suction sweeper, while the clothes are put through an electric washer and ironed in an electrically driven mangle.

My children attend a school where they are given a better education than the sons of Kings could command a century ago.

I go to work in a machine which some people call an automobile, and I travel a distance in three-quarters of an hour which would have been an all day trip for my father a generation ago.

I enjoy all these things and yet I am just an ordinary citizen with an ordinary income, living in an ordinary way. Tens of thousands have just as much as I—and more.

And yet I kick and wonder what ails the world.

Were the good things of life ever so easily at the command of the ordinary man as they are today? Don't we all do a lot of weeping that we haven't any right to do? And if we aren't careful, isn't there danger that we will upset the greatest civilization the world has ever known?—By William Feather, in the Philadelphia Public Ledger.

STANLEYITES HAVE MIRACULOUS ESCAPE

Mrs. McKone has spent fully nine months each year on the farm. She has had many interesting experiences. Once a cyclone tore down her house. She was away from home fortunately at the time. Only last week, lightning struck her house, tearing off the shingles, permitting the heavy rain to soak her household furniture. Mrs. James, wife of the renter, was shocked by the bolt. The same night lightning struck the barn on the McKone farm, killing four horses. Mrs. McKone is the mother of Mrs. Guy F. Humphreys and Mrs. Thos. Murphy of this city.

Mosquitoes at Devils Lake Interfere With Circus

The advance man for the Howes Great London Shows that appeared in Devils Lake Monday, arrived in Minot Tuesday. He says that mosquitoes interfered much with the circus at Devils Lake. The oldest inhabitants say the pests were the worst in their memory and everyone who possibly could, remained indoors. The circus horses were attacked by the mosquitoes, great lumps being raised on the horses. The animals became so furious that they tore their harness. But a very small crowd attended the evening attraction. The mosquitoes are bred around the lakes near that city and an unusually large amount of rainfall has furnished numerous breeding places.
