

Margaret Anglin Prepares to Star In Shakespearean Plays

MARGARET ANGLIN has won a foremost place on the American stage as a gifted and versatile artist. Among the more notable theatrical enterprises that will invite attention the coming season will be Miss Anglin's revivals of Shakespeare's "As You Like It," "The Taming of the Shrew," "Twelfth Night" and "Antony and Cleopatra." On Sept. 5, preparatory to the beginning of her regular touring season in San Francisco, Miss Anglin will play the "Electra" of Sophocles in the Greek theater at the University of California, where two years ago she presented the "Antigone" which attracted country wide favorable critical comment and placed Miss Anglin in the very forefront of America's emotional actresses of classic roles.

MOB RULE IS THREATENED.
Minot, N. D., Aug. 15.—There is such a feeling against those who have committed murders in this vicinity of late, on account of the light sentences met-

ed out, that should another occur soon, the officers fear that there will be mob rule before the minions get their hands on the culprit.
Gust Johnson, who shot John Gash down in cold blood near Rice Lake, got

away with a ten-year sentence.
Thos. Allen of McKenzie county shot young Brownie Emery to death, on account of a girl, and he was sent to the insane asylum.
Noah murdered old man Johnson in cold blood and he is now editing the paper down at the penitentiary.
John Staff shot his wife to death in a barrel and we presume he will be made a member of Editor Noah's staff.

G. N. Oriental Limited Train Was Wrecked

(Continued from page one)

drawn Hagen, Michael Kavanaugh and Miles Miller was drawn. The men viewed the wreck and then adjourned until Saturday to meet in Devils Lake and return their verdict.
It developed that Fireman Falkenger had a most narrow escape. He was engaged in shoveling coal into the fire box when the crash came. The engine separated from the tender and Falkenger was thrown into the clear with considerable coal. The engine continued and the fact the cars were held by the air brakes saved the fireman's life.
The manner in which the medical men of Devils Lake and citizens in general responded to the relief call was commendable. While there are always a certain number of curiosity seekers around a wreck, the men who went to Cray from Devils Lake did so with the intention of giving relief.

Grain Grades Better Than Last Year

(Continued from page 1)

Plaza—Wheat on the Ft. Berthold reservation will average fair this season. This is the first real cropping season for the reservation homesteaders, who have a greatly increased over last year.
Stanley—Mountrail county will have a good crop this year. Late rains have greatly improved the conditions. Threshing will be under way by the end of the week.

HINTS FOR THE BUSY HOUSEWIFE

Unique Combination of Colander and Fruit Press.

A kitchen utensil that should save the cook much labor and time has been invented by a Minnesota man. It is a combination colander and fruit press, and is said to remove the hulls from beans, peas, etc., and the skins and seeds from tomatoes, apples, grapes and the like without losing any of the essence or juices of these articles.
Its inventor claims many other merits for it, some almost miraculous. An iron upright clamps to the edge of the table, and this supports a colander bowl. Revolving in the bowl is a spiral blade that performs manifold duties. When the handle is turned and the blade revolves it not only pares the skins from the fruit or vegetables in the bowl, but presses them against the colander bottom and squeezes out their substance.

Mending Old Linen.
Old tablecloths can be neatly darned wherever worn places are apparent. If they are darned before the threads are actually worn through they will last a long time after they are mended. Dinner cloths that are worn past darning can be cut down for breakfast and luncheon cloths or else made into cloths for the kitchen table. They should be neatly cut and carefully hemmed, as their life in this second form will sometimes be as long as their life as dinner cloths was.

Sometimes partly worn cloths are in good enough condition to make it worth while to cut them up and hem them for breakfast and luncheon napkins. They can also be made into tray cloths and carving cloths. The making over of table linen should always be done with care and neatness, as untidy table linen, even if it is old, is inexcusable.

Caring For Silver.
Never put your silver away in white bags to keep it in good condition. Use dark red or blue or green cotton flannel bags—the kind that jewelers and silversmiths use.

And there is a reason for not using the white bags. There is in the bleaching process to which they are subjected a certain amount of sulphur and other chemicals that have a tendency to tarnish the silver when it comes in contact with it. The colored bags do not possess this dangerous characteristic and are much safer than the white ones.

Kitchen Kinks.
Cook carrots and beets whole; then skin and slice.
Avoid cooking vegetables in an iron kettle.

To remove dirt and stains from marble, apply a solution of gum arabic, letting it dry off, when it can be peeled or washed off.

A teaspoonful of ammonia to one quart of water sprinkled on plants for a few days will remove lice.
Peas may be cooked in the pods, which will burst and rise to the top, leaving the peas at the bottom.

Caramel Nut Fudge.
Take one and one-half cupfuls of granulated sugar, one-half cupful of milk and one tablespoonful of butter. Put the sugar and milk on and cook ten minutes, stirring constantly to keep from scorching. Melt one-half cupful of granulated sugar in a skillet until it is thoroughly melted, then pour into the other part and cook five minutes. Take off the stove and pour in one cupful of nuts. Beat until it is hard enough to drop in balls.

Bread Pancakes.
Soak one-third of a five cent loaf of bread without crust overnight in sour milk, put through colander in morning and to one quart add yolks of two eggs, one teaspoonful of soda, one of salt, two tablespoonfuls of sugar, flour enough to make batter a little thicker than for buckwheat cakes. Add beaten whites of eggs last.

Rust on Linen.
When linen becomes rusted from the iron, oxalic acid and hot water applied before washing removes the stains. After using the acid rinse the linen a few times, which leaves the fabric beautiful and white.

Green Pepper Salad.
For an appetizing salad mince a couple of green peppers, mix them with three tablespoonfuls of chopped chives and serve on white lettuce leaves with French dressing.

Little Children of the Poor Taught How to Avoid Danger

Photo by American Press Association.

THIS picture illustrates a splendid educational project. It shows children from the poor districts of New York city being taught all about street cars—how to get on and off without falling, how to avoid being run down and in general how to take care of themselves when playing or walking in the street. The picture was taken during a class object lesson at the American Institute of Safety in New York, an organization for the benefit of the poor in which Andrew Carnegie and other philanthropists are interested. The tots are taught by means of a model street car. They are also taught what kind of street games to play and other things of a practical nature.

SOO FLYER DERAILED ON MINOT STREET CROSSING.

Minot, N. D., Aug. 22.—Four cars of Soo Line flyer No. 151 were derailed when rails at the Ramstad street crossing which were being repaired spread and sent the cars bumping

over the ties.
The passengers were severely shaken up and given a fright, but no one was severely injured because the train was traveling only six miles an hour at the time of the accident.
A tourist, diner, observation and Standard car left the rails.
