BUILD WARM

The double dead-air space keeps warmth in and cold out

If you're going to build a new house, build one that's warm in winter, cool in summer. To make this easy for you, we offer home builders everywhere, without royalty, H.-L.-F. stud and wall board construction (patent applied for) illustrated above.

Dead-air is the best non-conductor of heat. This new construction provides two dead-air spaces between your warm rooms, and twenty below zero weather outside. Your house is just twice as warm as a house built the ordinary way.

H.-L.-F. stud and wall board costs 25% to 50% less than back plaster

It's a chance to have a warm house at small extra cost. H.-L.-F. stud and wall board construction costs 25% to 50% less than back plaster, and it's a lot better. Back plastering simply makes the outer wall warm. H.-L.-F. construction makes your house twice as warm by providing two dead-air blankets to keep out cold. H.-L.-F. stud and wall board construction is easy to use. Studs are accurately milled to take the wall board and wall board is especially made, exact size required. Slip it into place, raise your wall, and there you are. No fuss, no muss, no delay—and, best of all, absolute insurance against cold. Get a price on this construction for the house you are planning.

No advance in lumber prices—send list quick for prices

Until further notice, summer prices which resulted in four times as much business this year as last year for Hewitt-Lea-Funck, will continue. No telling what the war will do to prices later on. Get your order in early.

We have sold several thousand cars of lumber in less than two years. We own and control, through offices, sawmills, forests, logging railroads, and millwork factories. This means fast prices. Our special treatment has brought many orders from old customers and their friends. Learn how much we can save you—send your lumber list quick for freight and quotation. Do this now, so that you may get your lumber at the low summer prices.

Let Us Decorate Your Home

Our direct connection with one of the largest manufacturers in the country gives you an opportunity to choose from the most exclusive selection in town.

Wall Paper cannot be intelligently selected from a little 6x9 sample; this is one of the reasons why it is so dangerous to buy from the mail order houses.

Of Course, There are Other Reasons

Mail order firms use only very small figures in their designs, because large figures cannot be seen in small samples. They sell their goods in 16-yard to the double roll, so that if you only need 7 single rolls you are in reality to purchase 8. Their plain goods such as ingrain, oatmeal, etc., are in 19 1/2 in., wide instead of ours in 30 in., thus making two seams on the wall instead of one, and also confusing the purchaser on the price. They sell border by the yard and where they sell the walls and ceiling very cheap, they get a big price for the border, thus equalizing the profit, and even though some of their prices do seem cheap, after you have expended postage and paid freight or express, you are paying a good deal more for the paper than you would pay us for identical-ly the same article.

FURTHERMORE, when you buy from us, we show you the paper in the roll—you see the actual goods that you are going to get. You run no chances of getting something entirely different, or possibly an inferior grade of paper sent as a substitute. REMEMBER, we carry the goods in stock ready for immediate delivery NO WAITING, NO EXPRESS, NO DISAPPOINTMENT, NO SUBSTITUTION and we guarantee the prices to be lower than you will find elsewhere on similar paper of corresponding grades. We carry in stock more than 80 different patterns to select from, including full line of plain papers, also a big and beautiful collection of Cut-Out Border and Panel Decorations.
