

Y. M. C. A. NOTES

"We have the real thing... The County Y. M. C. A. puts a fellow in touch with men of higher ideals."—An Older Boy.

The days come like veiled and muffled figures bearing gifts, but if we do not like the gifts they silently carry them away.—Emerson.

"Two years ago I was worse than a rough neck; the Y. M. C. A. got me lined up, and I am back in school preparing for a life's work."—Boy of High School Age.

"I have seen the entire moral tone of high schools ever which I have had charge changed by the work of the County Y. M. C. A."—A. H. S. Principal.

"The greatest crop Ramsey County has to cultivate is its boys; will you, parents and older ones, help in directing these boys to the higher ideals that their lives may be fully developed at maturity?"—County Secretary A. E. Conrad.

"Life is not for mere passing pleasure, but for the highest unfoldment that one can attain to, the noblest character one can grow, and for the greatest service that one can render to all mankind."

"The greatest visions I have ever known come to me as a boy out on the prairies of Iowa. In all these world-wide travels since I have had no visions like unto them. I find the boys have visions the like of which I do not find among the college men, still less among the men of middle age. Therefore, by bringing before these boys wide outlooks, great horizons, far views, we are really saving the nation as well as the boys, and by giving them these ideals that can be incarnated in character, we are making possible foundations for great men. You can not make men large without great ideals, and ideals must begin to work in this plastic period."—Dr. John R. Mott.

THE Y. M. C. A. AND FARM BOY

Organization Helping Country Lads In Their Life

We often wonder why the average farm boy wishes to stray from the old homestead. Why he is constantly looking forward to the time when he may leave the old farm and take a job in town. To the average boy, the wages to be earned from an eight or ten hour day in the city looks large. To him the city offers excitement, social advantages and many of what, in his opinion are, the better things in life.

The boy cannot be blamed for his ideas on this subject. Every man in this old U. S. A. is free to think as he pleases and surely we cannot deny the farm boy this privilege. We can, however, provide him with the proper source of information bearing on these subjects which are so very important to him. Most boys, like most men, like to have a leader. They want some one to look to whom they know can understand and appreciate their situation. The right kind of a leader must be sufficiently broad-minded to be able to understand the tance to him. This, in my opinion, is the function of the Y. M. C. A. in the rural community.

The Y. M. C. A. properly managed will furnish the farm boy with the most desirable counsel and leadership. It will be in a position to bring to the young people of Ramsey county through boys' clubs and other forms of community work a better understanding and an appreciation of the good things to be found in the country. It will serve to counteract the present attractions of a job in town. The boys are needed on the farms now as never before in the history of our country and the people owe it to them and to society in general to see that they have the proper understanding of the importance of their position.—Wm. Guy, County Farm Bureau Agent.

Indian Fair At Fort Totten Soon

The annual Fort Totten Indian fair will be held on the reservation September 27-28-29, according to an announcement made this week. The usual events, including races and other features of similar affairs will all be included in a program now being worked out by a committee.

In addition there will be agricultural exhibits and others pertaining to development of the Indian race.

The committee in charge is President, Sunkakakaduta, vice presidents, John Brant, Jacob Abraham, Charles Wilbur and Oyahooka.

If there is such a thing as nobility in America it is that which follows the slow and turns up God's good soil for the maintenance of the people.

FORM CO-OPERATIVE SOCIETY

Labor Unions of Baltimore, Representing Eighteen Crafts, Plan to Own Stores, Factories, and Bank.

Labor unions of 18 crafts, representing more than 50,000 people, have combined to carry to completion what is perhaps one of the most ambitious and significant movements that the trade labor unions have ever undertaken in this city, says a Baltimore (Md.) dispatch. Their project is to form a co-operative society, owned entirely by union men, which shall own and operate its own stores and factories for the manufacture of a number of articles of everyday necessity, as well as the establishment of their own bank.

The movement, which has received the indorsement of the Baltimore Federation of Labor, was started some time ago by the machinists' union and has now reached a point where a charter from the state to enter into business has been applied for.

As planned now, the co-operative society, whose official name is the Organized Labor Co-operative society, is modeled directly after the Rochdale Co-operative society of England. The only changes are those which are due to local conditions.

Parts of the constitution which has been adopted give an idea of the society's plans. It provides that stock shall be sold for the money needed to finance the affairs, but only persons who are members of some trade union are permitted to buy stock. Only one share of stock, par value \$10, shall be allotted to one person, the stock to be nonnegotiable. Each share carries with it one vote and no proxy voting will be allowed.

A dividend of 6 per cent per annum on each share of stock is guaranteed. After the dividends are taken out of the net profits and a percentage set aside as a reserve fund, it is planned to divide the remaining funds every three months among the stockholders in proportion to the amount which they have spent in the stores.

The society will start business with the opening of retail grocery stores at first, which will sell at current retail prices and any one, whether a member of the society or not, will be allowed to buy, but only members will share in the profits. Later on it is planned to open clothing and shoe stores and to start the manufacture of shirts, underwear, neckties and possibly men's clothing.

Work of Continuation Schools. Continuation schools in Boston, according to a correspondent of the Globe and Commercial Advertiser, New York, regard placement and follow-up work as of prime importance. The schools get all of the young workers and are in a position to help them to better jobs, as employers turn to the schools when in need of employees.

In order to keep in contact with industry, a considerable part of the teachers' program is allotted to follow-up work—visiting the place of employment and the homes in order to find out definite information helpful in determining what the pupil needs. Pupils absent from Boston continuation schools are required to make up their absence by attending an equivalent number of other sessions. A close relation between absence and unemployment is reported. There the value of issuing work certificates for a particular job and not to find a job was demonstrated, such method of issuance giving the school authorities control of the young worker until beyond the compulsory continuation school age.

UNIONISTS IN DIRECT MOVE AGAINST WARFARE

The New South Wales branch of the Federated Seamen's union voted lately that in the future all of its members shall withdraw from military and naval activities. T. Walsh, secretary of the union, says:

"This is, we hope, the first step to a general refusal by transportation workers and ultimately all labor unionists to countenance war." Walsh is a son-in-law of Mrs. Pankhurst, the English "suffragette" leader.

Open Shop Idea Approved.

Unanimous approval of the open shop plan was expressed by 322 members of the Providence (R. I.) chamber of commerce in a vote on referendum submitted by the Chamber of Commerce of the United States. The chamber's vote will be returned as favorable to all of the fourteen questions submitted. Only two negative votes were received on all the propositions.

Canada to Pay U. S. Wage Scale.

The schedule of wage increases granted to United States railway men will be applied to the Grand Trunk system throughout Canada within the next two weeks, according to the Ottawa Journal. The increases on the Canadian lines will likely be retroactive to May 1, as were the awards in the United States, it was said.

Reign of Terror at Barcelona.

The non-syndicalist workers of Barcelona, Spain, have been suffering a reign of terror during the last few days at the hands of the syndicalists, who within that period have assassinated or attempted to assassinate persons. Outrages occur at any time day or night, in the open streets.

THE AMERICAN RED CROSS IN PEACE TIME Health Promotion

Health is at the foundation of human happiness. Through its Rural Service, Public Health Nursing Service and Health Center Service, the American Red Cross aims greatly to strengthen this foundation and to draw more closely than ever the neighborly ties that bind the American people together. Here is shown a Red Cross Public Health nurse attending a young mother with a brand new baby, seeing that both receive scientific care.

K. C.'S ISSUE A NEW PAPER

"Hau Koda" Is Name Given The New Publication

The new state organ of the Knights of Columbus of North Dakota, "Hau Koda," appeared last week with M. P. Kelly as editor in chief. Mr. Kelly is a returned soldier and for some years was connected with the advertising and editorial department of the St. Paul Pioneer Press and Dispatch. He is prominent in American Legion circles here.

The name of the publication is the Sioux Indian expression meaning translated, "Hello Friend." Credit for the title is given to Ignatius Court, who lives on the Fort Totten reservation near Tokio, N. D., and who is said to be the only full blooded Sioux Indian to be a K. C.

Associated editors of the new paper include Fred J. Traynor, E. P. Coe, Griff of Fargo, F. A. Ketter of East Grand Forks, Minn., Harris Morris of Jamestown, John Sheehan of Lang-

HARDING MAY COME TO N. D.

Minot Man Is Hopeful Of Hearing The Senator

MINOT, N. D.—E. B. McCutcheon has arrived in Minot. Mr. McCutcheon had the pleasure of meeting and dining with Senator Harding on his recent trip to the Twin Cities. He was greatly impressed with the splendid reception accorded the Ohioan, and is enthusiastic over the possibility of Senator Harding coming to North Dakota for one address during the campaign. Senator Harding made a wonderful impression in Minnesota, according to Mr. McCutcheon.

don and S. W. Callahan of Williston. The initial number of "Hau Koda" is full of news of interest to Knights of Columbus editorials and advertisements. Several excellent cuts also enliven the issue.

TICKETS GOOD UNTIL USED

New Jersey Public Utilities Commission Rules Adversely to Railroads.

Trenton.—The public utilities commission has announced that it has denied a request of a committee of railroad representatives, which would have allowed the Erie, Jersey Central and Pennsylvania, railroad companies to put into effect a rule limiting the use of one-way tickets to the day of issue.

The board was informed by the committee that such a rule was generally in effect throughout the United States and had been adopted by the railroads in New Jersey while under government control.

In denying the request the board says it is of the opinion that statutory requirement shall prevail—namely, "that tickets for passengers, except excursion tickets, or those sold at reduced prices, shall be good until used. Such unlimited use of a ticket for which the full rate of fare is paid, is in the interest of the public, works no undue hardship on the railroad companies and is reasonable."

AVIATOR SEASICK IN THE AIR

Italian Flyer Encounters Rough Air Conditions on Trip to Tokyo.

Tokyo.—Lieutenant Ferrarin, one of the two Italian airmen who flew from Rome to Tokyo, encountered such rough air conditions while crossing Korea that he became seasick.

"In my entire flying experience," he said, "I had never before encountered such conditions. The machine pitched like a small boat in a heavy swell, and for the first time in my life I knew what it was to be seasick."

"The most exciting part of my trip occurred in Asia Minor," he added, "about 100 miles from Aleppo, where I was subjected to heavy machine gun fire by the Arab rebels."

Judging from the number of candidates at our county fairs, political fences ought to go in first class condition.

Rock Lake Elevator Burns With Grain

The Farmers Grain Company's elevator at Rock Lake, Towner County, was destroyed by fire about seven o'clock last night, causing a loss of approximately \$50,000.

The fire started while the agent, W. C. Ellis, was at supper, and when discovered had gained such headway

as to make impossible the saving of any of the grain or the coal sheds nearby all of which were burned.

In the elevator were about 5,000 bushels of wheat, 6,000 bushels of durum and 1,000 bushels of barley. The cause of the fire is as yet unknown, but carelessness of hoboes who have been seen in the vicinity, is suspected of having been the cause. Most of the loss is covered by insurance.
