CALUMET
BAKING POWDER
CALUMET BAKING POWDER CO.
CHICAGO

Better cookies, cake and biscuits, too. All as light, fluffy, tender and delicious as mother used to bake. And just as wholesome. For purer Baking Powder than Calumet cannot be had at any price. Ask your grocer.

RECEIVED HIGHEST AWARDS
World's Pure Food Exposition, Chicago, 1912
Paris Exposition, France, 1904, 1905

You don't save money when you buy cheap or inferior baking powder. Don't be misled. Buy Calumet. It's more economical—more wholesome—gives best results. Calumet is far superior to sour milk and soda.

HAD THE WIDOW PUZZLED

Squire's Advocacy of Cremation Something English Woman Found It Hard to Understand.

The squire of an English village is a strong advocate of cremation, and when a certain hapless miner met his death in a colliery accident he tried his utmost to persuade the disconsolate widow to have the body cremated. But the woman did not take kindly to the idea.

"Thank you for mentioning it, sir, but I'd rather he went under the turf, as his father and grandfather did before him," she said.

"But it shan't cost you a penny, my good woman," urged the squire, determined to gain his ends. "I will pay the expenses of cremation, and you will save all the burial money."

"Well, sir," said the woman, who was too poor to be over-sensitive, "I admit that alters matters, and, though it goes against the grain; yet shall I cremate him if yer likes; but, if it isn't too much to ask, why do you do it, sir? Is it a hobby, like collectin' stamps and china?"

Marching Orders.

An old Irishman, long desirous of official dignity, was finally appointed marshal in a parade on Memorial day. Veterans, bandmen and school children were lined along the streets of the town patiently waiting the signal to start.

Suddenly Mike, on a prancing charger, dashed up the street. After inspecting the dignified procession he gave his horse a quick clip. Then, standing up in his saddle, he yelled with a voice filled with pride and authority:

"Ready, now! Every one of yer, kape shtep with the horse!"—Everybody's Magazine.

Deadly.

Knicker—Has Smith a new war idea?
Bocker—Yes; mount 'em on roller skates.—New York Sun.

Just the Place.

"Do you know where I could get a good setter?"
"Certainly, in any poultry yard."

A lot of men are unable to recognize good luck when they meet it.

WILLIAMS COUNTY IS IN CORN BELT

HAS CULTIVATED MAIZE ONLY THREE-YEARS, BUT MAKES EXCELLENT SHOWING.

FIRST PRIZE WON BY BOY

Other Interesting News Happenings of Flickertail State Condensed and Edited for Hasty Reading—Week's Resume.

Williston.—With 68 bushels of mature corn to his credit from a single acre, Henry Nelson, the 15-year-old son of H. A. Nelson, known as the "alfalfa king," won the first prize of \$100 in gold offered in the Williams county corn growing contest. The contest was open to boys and adult farmers and more than 200 were entered from all sections of the district. The award of prizes has been announced by E. W. Hall, better farming agent for the county.

Father Takes Second.
H. A. Nelson won the second prize with an average yield of 67½ bushels on a three-acre tract of ground. Tommy Craven, Jr., of Williston, was awarded third prize and Howard brothers, Williston farmers, were fourth.

All corn which was grown by the prize winners is northwestern dent, and was raised from homegrown seed. As Williams county has been raising corn for only three years, the records are considered very satisfactory. The yields secured by every farmer in the contest were sufficiently large to give a good profit. The largest yields of the first prize winners were secured from corn raised on land previously devoted to alfalfa.

In the county alfalfa growing contest, R. A. Rieder, of Williston, won the first prize of \$50 for the best acre, and L. S. Albright, of Bonetrail, second.

Williams County Donates Wheat.

Ray.—Williams county farmers will send a car of wheat to aid the Belgian war sufferers, and November 26 is the date that has been set as the time for the receipt of donations to the car. The wheat will be shipped to Minneapolis and there sold by the Chamber of Commerce, the proceeds to be used in buying supplies for the war sufferers. It is the hope of those who are promoting the movement that Williams county will send at least 1,000 bushels of wheat to Minneapolis for the sale. This ought to net about \$1,000 to \$1,500 for the European war aid fund. Each farmer is being appealed to, to donate a bushel of wheat. All Great Northern main line agents in Williams county have been authorized to accept the grain for shipment.

Sees First Snow at 23.

Grand Forks.—Miss Selma Parker, 23 years old, saw her first snow in Grand Forks last week. Miss Parker declares her only real ambition is to send a sample of American snow to Tasmania, her home, for the edification of her friends. Miss Parker is in Grand Forks as secretary to an English financier. She was born in Tasmania.

Eats Glass to End Life.

Wahpeton.—Bige Reed, a negro, who is being held in the Richland county jail here awaiting trial on a charge of murder, attempted to commit suicide by eating glass, using bits of a small shaving mirror. He will recover. Reed, Earl Bedell and James Wilson, all negroes, were arrested August 21, near Lidgerwood, charged with the murder of Frank Kulisek.

Town But Few Weeks Old.

Ryder.—The sale of town lots at Parshall, on the Fort Berthold Indian reservation, west of here, was conducted by C. W. McPhail, representing the land department, and was one of the most successful ever held. One lot sold for \$1,000; another for \$975, and another for \$500, while many were sold at between \$100 and \$500, which are rather remarkable figures in view of the fact that the town is only a few weeks old. It is on the new line of the Soo railroad.

Initiative and Referendum.

Grand Forks.—Ten years of effort by the initiative and referendum advocates of North Dakota has resulted in the adoption of a measure by which both the statutes and the constitution can be bent to the wishes of the people irrespective of action that may be taken by the Legislature. The initiative and referendum was adopted by the people, an overwhelming majority having been given both propositions. The principle was provided in two separate bills.

Torn to Death in Elevator.

Hazleton.—John Burkhardt, helper in a local elevator, was killed in a horrible accident in the elevator. The young man became caught while working about the drive chain, being pulled into the main sprocket wheel. He was held a prisoner pinioned between the chain and the sprocket gear, his chest and shoulders crushed in such manner that he died shortly afterwards. Both jaw bones were broken, his neck twisted, numerous ribs were fractured, and he was terribly lacerated.

ELECTION FRAUDS

Backers of Fight to Divide Mo County Make Assertion Official Were Drunk.

Mandan.—Charging the officials in Wenger precinct cated when the ballots were on election night, and that on county division are backing the proposition townships of Morton create Grant county are p election contest.

Morton county is the largest North Dakota and at the recent election defeated two proposed divisions in the northwestern part of the county to be called Beaver, and in the southwestern portion, below the Beaver county line, to be called Grant. The Beaver proposed division was defeated by 232 votes and the Grant county division by 11 votes. In the precinct which is to be cited in the election contest case, the vote was returned by the election judges 411 against division, or 49 to 0.

Other precincts in the county were Judges and clerks had not properly qualified will also be cited in the complaint, which will be filed within a few days with the board of county commissioners.

The first arrests of over a dozen, for which warrants have been issued, were made, Charles Packard and John Quashnick, of Elgin, being taken into custody for bludgeoning. With county officials electioneering 11 men are alleged to have taken advantage of them and violated the prohibition laws. All are now sought by the sheriff.

Sentinel Butte.—That about 68 votes were cast illegally at Beach and that precinct officials in several places flagrantly violated the election laws, is the charge brought by Sentinel Butte men, following the county seat fight between this place and Beach.

The result of the election was: Beach, 825; Sentinel Butte, 653.

It is asserted that absent voters' ballots were cast by Beach residents, and that they voted again at the polls; that when a Sentinel Butte man challenged the vote of a man in one district he was ejected from the building.

The election will be contested.

TO DEATH ON STEER'S BACK.

Man Riding Across Country Rescues Girl, But Drowned As a Consequence.

Minot.—Roy Torgerson went to his death on the back of a steer in the Missouri river near Garrison, shouting to Miss Jesse Evans, of Garrison, whose life he had just saved.

Torgerson rescued Miss Evans from death when she was attacked by the steer. In driving the animal off, Torgerson's foot became entangled in a rope around the steer's head. He was carried into the Missouri river when the steer dashed over a 20-foot bluff into the water.

When Miss Evans reached the river bank, Torgerson had succeeded in mounting the maddened steer. A moment later Torgerson and the animal were sucked into a whirlpool and drowned.

Torgerson was riding across the country and left Minot only a few days ago to continue his journey to San Francisco.

Couple Wed On Bridge.

Grand Forks.—The Demers, Ave. bridge, between Grand Forks and East Grand Forks, the path between "dry" and "wet" cities, was the place where V. B. Connors and Miss Marie C. Anderson, both of Alvarado, Minn., were married. Rev. J. K. Burleson, rector of St. Paul's Episcopal church, when about to perform the ceremony at the chapel of a church, found they possessed only a Minnesota license. The couple wished to catch a train then, about due, so attended by two witnesses and the minister, they hastened to the east end of the bridge. There the little company drew aside from the passing people and the knot was tied.

Wagon Burns; Aged Man Killed.

Devils Lake.—Traveling alone through the country in a covered wagon, Joseph Lavery, aged 72, was burned to death a short distance east of Grand Harbor. The aged man was found about a hundred yards from the rig in a sitting posture, in a field. He had breathed flames before escaping from his wagon, and died almost immediately. Letters in his clothes identify him as a brother of Father Lavery, of Plainview, Minn.

Hole in Skull; Lives.

Kenmare.—With a hole in his skull, through which a portion of his brain oozed out, Henry Johnson, is apparently recovering. The explosion of a heavy charge of powder in a home-made shell, which he attempted to use in an old patterned shotgun caused the accident. The gun stock was shattered and driven into the side of his head. Johnson is able to converse with his physician and nurses, declaring he feels little pain.

Acreage Plowed Exceptionally Large.

Grand Forks.—Not until the snowfall of last week in the western part of the state, and in the eastern portion, were plowing operations interrupted in North Dakota. As a result the acreage plowed this fall is exceptionally large, putting the farmers in excellent shape for next spring's work. The fall of snow in the northeastern part of the state was about four inches, but with the mild weather, most of it soaked into the ground immediately.

FALLS ILLNESS SOLDIERS

D FLOODED PNEUMONIA MAN TROOPS TRENCHES.

DEATH OF ROBERTS OCCURS ON FRENCH SOIL

Head of English Army Had Gone to France to Visit His Troops—Third Largest Vessel in English Navy Goes to Bottom of Sea.

Thielt, Belgium, Nov. 16.—The Germans have not succeeded in crossing the Yser in front of Dixmude, since that town has been entirely destroyed. The possession of it thus far has been of little value to the invaders. A heavy fog alternating with pouring rains is causing a great deal of sickness among the soldiers in the trenches. The ditches are flooded and the men are forced to stand in water constantly. As a result these soldiers suffer from severe colds which frequently develop into pneumonia. There is no place in which those who are ill can be cared for immediately since all villages in this vicinity are destroyed. The nearest hospitals in Ghent and Bruges are overcrowded.

Lord Roberts Dead.

London, Nov. 16.—Field Marshal Earl Roberts died Saturday night in France from pneumonia. A telegram from Field Marshal Sir John French, commander of the British expeditionary forces on the continent, apprised Earl Kitchener, secretary of state for war, of the death of England's great soldier. The telegram read:

"I regret to tell you that Lord Roberts died at 8 p. m. Saturday." Field Marshal Roberts, who was colonel-in-chief of the Indian troops, had gone to France to give them his greeting. Soon after his arrival he became seriously ill. He suffered from a severe chill Thursday, and pneumonia rapidly developed. His great age, 82 years, militated against his recovery, the crisis in the disease coming quickly.

The veteran's devotion to the interests of the army, his hard work in this connection and his seeming good health had been the subject of comment since the beginning of the war. He was the most popular military figure in Great Britain and a national hero without a rival in the affections of the people.

Ship Drowned at Sea.

New York, Nov. 16.—Rumors of disaster to the British super-dreadnought Audacious, have been confirmed by mail from a point in Ireland.

After a career of less than two years, the Audacious, of the King George V. class—third in tonnage and armament of his majesty's warships—lies at the bottom of the ocean off the north coast of Ireland. It was hit by a torpedo or disabled by a mine just before 9 a. m. Oct. 27. With the possible exception of one or two men, the whole crew of 800 officers and men was rescued by small boats from the liner Olympic.

Turks Victorious.

Constantinople reports that Turkish troops have occupied Kotur in the Persian province of Azerbaijan, defeating the Russians. The battles at Kosprikol are described as desperate. The Turks took one fortress upon their third bayonet attack. All the defenders fell or were captured. It is announced that a British landing force at Fao, in the province of Basra, on the Persian gulfs, was attacked and sixty men fell.

Defeat Comes to Austrians.

London, Nov. 16.—A dispatch to the Reuter Telegram company from Carlinje, Montenegro, says: "The Austrian attacks against Grabovo, Montenegro, as well as those against our troops in Herzegovina, have all been repulsed with heavy losses to the enemy. The Austrians with superior forces tried to recapture two important positions at Timar (Bosnia) and Bjobuk; but were decisively defeated."

Germans Are Repulsed.

Paris, Nov. 16.—A French official statement follows: "Yesterday, relatively a quiet day on the whole front, was characterized principally by artillery combats. The Germans, however, attempted several attacks to the north, east and south of Ypres. All were repulsed with considerable losses to them. To sum up: All efforts made by the Germans during the last several days resulted only in the capture of the ruined village of Dixmude, whose isolated position on the right bank of the canal rendered its defense difficult. Between the Lys and Oise the pushing forward of approach works continued all along the greater part of the front."

French Push Enemy Back.

Paris, Nov. 16.—The following official communication was issued by the war office tonight: "The most notable incident of the day has been the throwing back of the enemy on the right bank of the Yser canal. That part of the left bank which the Germans previously held has been completely evacuated. We have retaken to the south of Bixchoote a small wood which had been lost following the night attack. At the end of the day the enemy had shown, without success, the offensive to the south of Ypres. On the rest of the front there is nothing to report."

WESTERN CANADA'S STRONG POSITION

"THE WHEAT GRANARY OF THE WORLD," A WELL APPLIED TERM.

Western Canada occupies a stronger position today than it ever has occupied. Taking one year with another, the efficiency of its lands to produce has been well proved. It has not been said of it that year in and year out there were bumper and bounteous crops. If such a condition existed it would be phenomenal in the history of any country. With an extensive territory producing grain, hogs, cattle and sheep, of some 800 miles wide and 1,000 miles long, it is easy to conceive of a wide variation in temperature and climate; there is variation in rainfall and snowfall; every section is not the best in the district—some are better than others and some worse, but as a general thing, the great percentage is "better." This past year has shown that some portions are not altogether immune from periods of drought. The same may be said of adjoining states to the south. But this year has also shown that in the greater portion of Western Canada drought does not appear, but even in the drought-stricken area of this year, past years have shown that the soil produces wonderfully well and even this year, with modern methods, known as "dry-farming," good crops were harvested. The large number of Americans who during the past sixteen years have been attracted to Canada have not gone simply because of the advertising of that country, but because their friends and their old-time neighbors have done well there, and with careful and judicious farming almost everyone has done well.

As a result of the great influx of immigration the open or prairie homesteading area is being rapidly taken up. The fact that this is so is evidence that Western Canada lands are productive, and on these open plains today are to be seen the homes of successful farmers from almost every state in the Union. They have earned their patents, and now own outright their 160 acres of land, together probably with an adjoining 160 acres, which they have purchased or pre-empted, all of which is worth from \$25 to \$30 per acre. They originally started by growing grains altogether, but they found that they could secure a better price for much of their grain by feeding it to hogs and cattle, and the most successful ones are those who have followed this course.

But to meet the wants of the newcomer a new homestead area has been opened up, known as the "park country." In this park country are to be found beautiful groves of poplar and willow, small lakes and streams, with sufficient open area to enable one to go into immediate cultivation of crop, and in due time when they wish more land to be put under cultivation, they may at small cost cut down some of the groves, which in the meantime have been valuable in providing fuel and in giving shelter to cattle.

Notwithstanding the high character of the open prairie lands and the fact that farmers there have realized in a splendid way, there is the opinion backed up by a lot of experience that this parklike country contains soil even better than that of the open area referred to.

The opportunities, therefore, for money making are as great today as they ever were. The opportunities for carrying on farming successfully are fully as great as they ever were. Of this park area we have an immense quantity of land yet to be settled. It is true that the railroads have not yet penetrated these districts to the extent that they have the open area, but this will come and as settlements advance, so will railroads build. For the present there is a temporary lull in railroad building, but it is always the case that where there is a demand there will come a supply, and it will not be long before the park country will be penetrated by railroads that will give sufficient accommodation for all needs, but to those who prefer it there are lots of opportunities for purchasing land nearer towns and villages and at low prices and on easy terms.

Whether one cares to purchase or homestead it can better be done by paying a visit to the country and it will repay you to spend some little time visiting the different districts.—Advertisement.

It is quite possible for a man to simply spread himself without really having any broadening influence.

The Bachelor's Marriage.

George Ade (that incurable and brilliant bachelor) said at a dinner in Chicago:
"I met a friend of mine the other day—a bachelor friend who had recently got married. Giving him a vigorous thump on the back, I cried jovially:
"Well, old man, no more sock darnin' now, eh?"
"No, indeed," he answered. I've learned, like Jerry Simpson, that straw is just as good as socks any day. You see, since my marriage I've been too busy supporting a wife to dream of touching a darnin' needle."

RESINOL HEALS SCALY, ITCHING, SCALY SKINS

No matter how long you have been tortured and disfigured by itching, burning, raw or scaly skin humors, just put a little of this soothing, antiseptic Resinol Ointment on the sores and the suffering stops right there! Healing begins that very minute, and in almost every case your skin gets well so quickly you feel ashamed of the money you threw away on tedious, useless treatments.

Resinol Ointment and Resinol Soap clear away pimples, blackheads, and dandruff. Prescribed by doctors for 19 years and sold by all druggists.—Adv.

That Weak Back

accompanied by pain here or there—extreme nervousness—sleeplessness—may be faint spells—or spasms—are all signals of distress for a woman. She may be growing from girlhood into womanhood—passing from womanhood to motherhood—or later suffering from that change into middle life which leaves so many wrecks of women. At any or all of these periods of a woman's life she should take a tonic and nerve prescriber for just such cases by a physician of vast experience in the diseases of women.

DR. PIERCE'S Favorite Prescription

has successfully treated more cases in past forty years than any other known remedy. It can now be had in sugar-coated, tablet form as well as in the liquid. Sold by medicine dealers or trial box by mail on receipt of 50 cents in stamps.
Miss Elizabeth Lerdahl of Berkeley, Cal., in a recent letter to Dr. Pierce said: "I was completely broken down in health, I was aching and had pains all over my body and was so nervous that I could scarcely if anyone talked to me, but I had the good fortune to meet a nurse who had been cured by Dr. Pierce's Prescription. I have never had an occasion to consult a physician since—and in excellent health."
Dr. Pierce's Pleasant Pellets regulate stomach, liver and bowels—sugar-coated, tiny granules
