THE SAVINGS AND LOAN ASSOCIATION

Why rent when the monthly rent money will buy the property?

For example, suppose the house is purchasable for \$1,000, which you are renting at \$12. per month.

You buy the house putting in \$300. and borrowing \$700. from the Pembina Savings and Loan Association. Your monthly payments to the latter would then be \$10.50 instead of \$12. with the difference that every payment to Savings and Loan Association is a payment on the house, while the payments made for rent are lost to you.

Call in and let us show you the experience of others. We can also show you that it is just as good for the investor as for the borrower. We have twenty-five years of business to prove it.

G. G. THOMPSON, President.
E. D. BOOKER, Secretary.

Probate Notice.
State of North Dakota, in County Court before Hon. H. G. Vick, Judge.

In the matter of the Estate of Thomas Hart deceased.
Catherine Hart, petitioner, vs. John W Hart, Arthur Hart, and Barbara Hart, and Arthur Thomas Hart and Harry Lloyd Hart, minors, and W W Nelson, special guardian of said minors, respondents.

Sitation for hearing proof of will. The State of North Dakota to the above named respondents and all persons interested in the estate of Thomas Hart, Deceased.

That each of you are hereby notified that Catherine Hart, the petitioner herein, has filed in this Court a document in writing purporting to be last will and testament of Thomas Hart, late of the Township of Joliette, in the County of Pembina and State of North Dakota, deceased, with her petition, praying for the admission to probate of said document as the Last Will and Testament of said deceased, and for the issuance to John W. Hart of letters testamentary thereon, and that the said petition and the proofs of said purported will and Testament will be heard and duly considered by this Court on Friday, the 8th day of October, A. D. 1915, at two o'clock in the afternoon of that day, at the Court Rooms of this Court, in the County Court House in the City of Cavalier, County of Pembina and State of North Dakota; and you and each of you are hereby cited to be and appear before this Court at said time and place and answer said petition and show cause if any there be why the prayer of said petition should not be granted.

Dated this 6th day of August, 1915.
By the Court, H. G. VICK, Judge of the County Court.
Let the service of the above citation be made by personal service upon all resident respondents and upon all others by publication of the same in the Pioneer Express, a weekly newspaper printed and published at Pembina, Pembina County, N. D., (County Court Seat).

High Class Men Who Drink

boast "I'm a moderate drinker—I can drink or leave it alone." More frequently it leaves them ALONE, both in a business way and socially. Don't wait until you're down and out. Most POWERFUL Car at its Price

It is the ONLY 7-passenger, FIFTY Horse Power, 6-Cylinder car with a 3 7/8-inch bore x 5-inch stroke motor that has ever been offered in America or Europe for less than \$1450. And it is the MOST POWERFUL car for its weight that any automobile maker has ever produced. In POWER, flexibility of performance and economy of operation, it stands ALONE in the 1916 market.

Price has been reduced from \$1450 to \$1050—a REDUCTION of \$400. But nothing except the price has been reduced. In POWER, size and quality the car has been GREATLY IMPROVED. And to-day it gives

more for every dollar of the price than any other 6-cylinder car in the history of the industry.
For a man owning and driving his own car in and round New York, there is no better car on the market. It has the POWER that the country round New York demands—it has all the style and comforts and conveniences that Fifth Avenue desires. Come in and SEE this Studebaker SIX that has set a new Standard of Value in 6-cylinder cars

Irritable Children Often Need Kickapoo Worm Killer
There is a reason for the disagreeable and fretful nature of many children. Think of the unrest when the child's body is possessed by tiny worms sapping vitality and clogging its functions. Whatever may be the cause—"that children have worms is a fact." Your child's peevishness and irritability has a cause. Give Kickapoo Worm Killer a chance and if worms are there this humanly harmless remedy will eliminate the annoying parasites. 25c. a box.

Complexion Blemish?
Yes, that sluggish liver often causes it. Dr. King's New Life Pills clears the complexion, throws off impurities and releases bile naturally and easily. Unless the bowels move freely and regularly all the powder in the world will not permanently cover "that muddy complexion." This laxative is mild yet effective. It does not gripe or sicken in its effects. You will not dispute the merits of Dr. King's New Life Pills. Start a treatment to-day. 25c.
Sudden Muscular Aches and Pains—Need Not Be
That is—if you use the right remedy Sloan's Liniment is a real necessity in every home—for young and old. Its merit is praised in dozens of letters. A stiff neck from colds, children's sprains, those aching muscles, that sharp neuralgia pain—these find guaranteed relief in Sloan's Liniment. Every home meets with sudden aches and accidents. Your home needs a bottle. 25c., 50c. and \$1

Stomach Pains
and Indigestion caused me great distress for two years. I tried many things for relief, but got little help, till at last I found it in the best pills or medicine I ever tried

Rye For Silage.
Rye should be cut for silage when in blossom and the most advanced heads are in the dough stage. As the grain begins to ripen and get hard the stems get hollow, and it is very difficult to make a good grade of silage under these conditions. When put into the silo it should be cut into one-quarter to one-half inch length. If dry it should be wet in order to help pack the silage.

Roseau County Lands.
320 Acres Roseau County Farm Land, very best black loam, with clay sub-soil, half mile from railroad and thriving incorporated village; fast developing community, with many miles of new roads under construction. Bargain for quick sale, \$12.50 per acre, one half cash, balance term of years, at six per cent.
760 Acre tract of unimproved Roseau County land, fine black loam with clay sub soil, four and quarter miles from railroad, in a fast developing community; contracts let for hundreds of miles of fine roads; two railroads and good markets. Quick sale only \$10 per acre. Terms. CHAS. A. MOODY, Warroad, Roseau County, Minn.

DAIRY WISDOM.
At this time of the year there is usually a beginning of a shortage in pastures. Start the extra feed before the cows shrink in milk flow.
Grain or sowing crops should be fed to supplement the shortage in the pasture.
The true dairy cow is easily affected by unfavorable conditions. It pays in hard cash to keep conditions right.
Do not let the rush of harvest work interfere with the regularity in the care and milking of the dairy herd.
Be sure that the cows all have plenty of clean water to drink. Cut off the water supply and you cut off the milk supply.

FALL VERSUS SPRING FRESHENING OF COWS

It is the practice among good dairy-men to carry cows three or four months over the regular lactation period when it is desired to change their time of freshening, says Hoard's Dairyman. There will be a slight shrinkage in the daily milk flow, and there is some danger that the cow may not breed as readily as if bred shortly after freshening.
A calf born during the fall months will do better, as a rule, than those born at other times of the year. The fall born calf can be kept growing through the winter, and when grass comes in the spring it can be weaned

The one great feature in which Holstein cows excel is the production of milk. This capacity for production in some individuals of that breed has been phenomenal and would, indeed, be almost unbelievable were it not for undisputed official tests. Good Holstein cows, properly fed and cared for, should each give forty to fifty pounds of milk per day or from 8,000 to 10,000 pounds in their milking year. Of course some Holsteins give a great deal more. The cow shown is a Holstein.

and turned to pasture. The calf, as a rule, will receive better care in the winter, because there is not the insistent pressure of crop work that demands first attention. Taken all in all the fall calf will be larger and more vigorous when it is a year old than a spring or summer calf.

We consider fall freshening superior for the following reasons:
First.—The cow will produce more milk. There is an old saying that a cow fresh in the fall is twice fresh in the season—that is, if she has been properly cared for she comes to a full flow of milk when the calf is born, will maintain this flow fairly well during the winter and when put to pasture will again increase her production to nearly the amount first given, going dry when flies become troublesome, the weather warm and pasture short.
Second.—The cow will make her largest production during the period of high prices for butter fat. Of course feed costs may be somewhat higher, but not enough, as a rule, to offset this advantage.
Third.—On most farms the heaviest labor comes in the summer, and having the cows milking heaviest in the fall and winter months helps to equalize labor during the year.
Fourth.—Fall calves do best. Spring freshening may be of advantage where it is desired to have a steady flow of milk throughout the year in order to supply market milk. It may also be of advantage where pastures are good and can be had at relatively low cost.

Value of Good Dairy Blood.
The probabilities are that not to exceed 5 per cent of all the cows in any one state are pure in breeding, says the Kansas Farmer. We hear a great deal about these pure bred cows because they are the results of the ability of men highly trained along dairy breeding lines. The grade cow is the cow that is producing the bulk of the dairy products, but this grade cow could not exist and become better each year if it were not for the constant infusions of blood from the herds of pure breeding.

Foot and Mouth Disease Costly.
Altogether more than 124,000 animals have been killed because of foot and mouth epidemic. The loss is between \$5,000,000 and \$6,000,000. This expense has been shared by the federal and the several state governments. The disease is now virtually wiped out, although sporadic cases of the disease may be expected.
