THE SAVINGS AND LOAN ASSOCIATION

Why rent when the monthly rent money will buy the property?

For example, suppose the house is purchasable for \$1,000, which you are renting at \$12. per month.

You buy the house putting in \$300. and borrowing \$700. from the Pembina Savings and Loan Association. Your monthly payments to the latter would then be \$10.50 instead of \$12. with the difference that every payment to Savings and Loan Association is a payment on the house, while the payments made for rent are lost to you.

Call in and let us show you the experience of others.

We can also show you that it is just as good for the investor as for the borrower. We have twenty-five years of business to prove it.

THE NEGRO AND THE BANJO.
There Was No Affinity Between Them in Old Plantation Days.
To represent the negro in his comic aspects and in his sentimental moods was what the minstrels pretended to do, but the pretense was often only a hollow mockery. Even the musical instruments they affected, the banjo and the bones, were not as characteristic of the field hand or even of the town dandy as the violin.
Indeed, the bones cannot be considered as in any way special to the negro; they were familiar to Shakespeare's Bottom, who declares: "I have a reasonable good ear in music; let us have the tongs and the bones." And the wise recorder of the words and deeds of Uncle Remus declared that he had never listened to the staccato picking of a banjo in the negro quarters of any plantation.
"I have seen the negro at work," so Joel Chandler Harris once asserted, "and I have seen him at play; I have attended his corn shuckings, his dances and his frolics; I have heard him give the wonderful melody of his songs to the winds; I have heard him give barbaric airs to the quills (that is to say, to the Pan's pipes); I have heard him scrape jubilantly on the fiddle; I have seen him blow wildly on the bugle and beat enthusiastically on the triangle, but I have never heard him play on the banjo."—Brander Matthews in Scribner's Magazine.
When Turtles Were Big.
Of the turtles it may be said that they represent the most ancient type of all vertebrates, resembling closely as they do the reptiles of their kind which existed so far back as the mesozoic era. There were sea turtles during that epoch which measured twenty feet in spread of flippers, while some tertiary turtles were not less big in body, measuring twelve feet from head to tail.
