

A TRAINLOAD OF PLOW-MAN TRACTORS.

Demands of such unusual proportions for PLOW-MAN TRACTORS have forced the Grand Forks Tractor Company to make it nothing less than a TRAINLOAD of PLOW-MAN tractors to handle the business. This demand is a great tribute to PLOW-MAN tractors which heretofore have been bought as fast as manufactured in the middle states and which only have been pioneered here. The ALL STANDARD FEATURES of PLOW-MAN TRACTORS is the magnets which attracts the real judge of tractors.

15-30 PLOW-MAN FOUR PLOWS.

Only Tractor Guaranteeing 33 1/3% Reserve Power.

The 33 1-3 per cent reserve power guaranteed in PLOW-MAN TRACTORS is the second magnet which attracts tractor users and is a feature "exclusively PLOW-MAN." The tractor buyer knows its it means excess power under all conditions and long life for the tractor.

PLOWMAN TRACTORS take the place of men and horses sent "over there"

STANDARD UNITS

- RADIATOR—Perfex, extra size, triple type fan. Always cool.
- MOTOR—Buda. 4 1/2 inch bore, 6 in. stroke, full force feed, pressure of oil to all bearings. Perfect lubrication.
- IGNITION—Dixie High Tention, magneto, fitted with impulse starter. Always starts.
- CARBURETOR—Bennett, multiple jet, kerosene, very economical.
- AIR-CLEANER—Bonne centrifugal. Allows no dirt in motor.
- CLUTCH—Multiple disc. Always right.
- TRANSMISSION—Foote, sliding gear, running in oil, two speeds forward, one reverse, in dust proof case. Trouble proof.
- BEARINGS—High duty, Hyatt roller bearings thruout transmission.
- GEARS—Drop forged, heat treated and hardened.

STANDARD UNITS

- BELT PULLEY—8 by 14 in., 590 R. P. M. Belt speed 2600 ft. per minute.
- DRIVING GEAR—Solid cast iron ring of extra strength.
- REAR WHEELS—French & Hecht 60 in. by 12 in. Spokes hot riveted into hub, rim heated and shouldered on inside, cold riveted on outside. Hyatt roller bearings, dust proof hub. Always right.
- FRONT WHEELS—French & Hecht, 30 in. by 5 1/2 in., detachable rims, Hyatt roller bearings, dust proof hubs.
- FRONT AXLE—Oscillating for rough ground, short turns, no strain on frame.
- FRAME—Heavy 5 inch steel channel, 11 1/2 lbs. to the foot.
- WEIGHT—4800 lbs., 2950 lbs on rear wheels.
- TURNING RADIUS—15 feet.

A PLOWMAN TRACTOR with one man will do as much farm work and produce as much food as can be done with ten teams and ten men. PLOWMAN TRACTORS eat nothing but kerosene and that in remarkably small quantities—eat nothing that we or the boys "over there" will need. One PLOWMAN TRACTOR will save enough grain and fodder to fatten ten steers. Can YOU afford to be without a PLOWMAN TRACTOR when perhaps your son, brother or friend "over there" needs every assistance you can give him?

Can you figure how you can afford to be without a PLOWMAN TRACTOR when we can prove to you in figures that it will swell your bank account?

Hundreds have already figured and which explains this large order for a

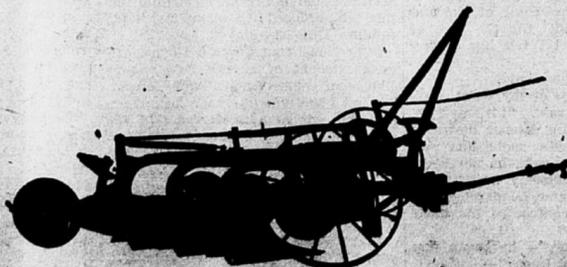

Trainload Of Plow-Man Tractors

TERMS THAT SATISFY. Our terms are the surprise of the industry. Nothing of thier kind having been offered before. They are a real help to the buyer instead of a burden.

OLIVER TRACTOR PLOWS
