 Last week was an ideal one for the farmers and a large amount of grain was sown in this section of the county, but the rain which came on Tuesday caused considerable delay and it will be several days before work can be resumed.
 Hamilton has a curfew law now and from this time on all children must off the street at the hour of 9 p.m. or the

city marshal will be liable to make a collection. This is strictly all to the good and is a law that should be enforced right to the letter.

R. J. Dickie surprised his numerous friends one day last week by dropping in on them, looking about as fit as any one could be. Bob was over in France and was under shell fire on the western front for several days but says that he did not have to go over the top. But just the same Bob did his share to help lick the Hun.

A. K. Parker has purchased a town lot on main street from D. D. Warner and we are informed that he will erect a building to be used for a harness shop. Since coming to Hamilton Mr. Parker has enjoyed a splendid trade and finds it necessary to expand to accommodate his ever-increasing business. Hamilton is bound to grow, nothing can dampen the enterprise of its business men.

O. J. Barnes commission house has had several men on the ground during the past week buy up "spuds" for shipment to the eastern market. Potatoes were a splendid crop here last year, but at the time they were harvested the price was so low that it did not pay to sell them and the result was that a lot were pitted to await the spring trade, \$1.35 per hundred was the best price offered so far and furnish your own sacks. It is certainly discouraging to the average farmer to raise a big crop of potatoes and find that the market is weak.

INCOME TAX PAYS FOR PUBLIC BENEFITS.

"Viewed in its largest and truest sense, the payment of taxes is payment for benefits received or expected. Only from a narrow and essentially selfish and shortsighted viewpoint can the individual propose to himself the evasion of tax liability as a desirable course of action."
 —Daniel C. Roper, Commissioner of Internal Revenue.

ELECTRIC BITTERS THE BEST FOR BILIOUSNESS AND KIDNEY.

High Operating Expenses Increase Telephone Rates Telephone Revenue Must Cover Operating Expenses.

Your business will fall unless you take in enough money to pay your expenses.

So will any other business.

The necessity for enough revenue in any business to pay operating expenses needs no explanation.

For several years the cost of providing telephone service have been advancing with the increasing cost of material to the telephone company and the higher living expenses of employes.

Everyone realizes the necessity of paying more for rent, for food, for clothing, for wages for transportation.

The telephone industry has been affected by the same conditions which have produced higher prices in all of the necessities of life.

If this company is to continue to furnish dependable telephone service to the public it must obtain such rates as will produce a revenue sufficient to cover the cost of providing the service.

Pembina Saving and Loan Association

Why rent when the monthly rent money will buy the property?

For example, suppose the house is purchasable for \$1,000, which you are renting at \$12. per month.

You buy the house putting in \$300. and borrowing \$700. from the Pembina Savings and Loan Association. Your monthly payments to the latter would then be \$10.50 instead of \$12. with the difference that every payment to Savings and Loan Association is a payment on the house, while the payments made for rent are lost to you.

Call in and let us show you the experience of others.

We can also show you that it is just as good for the investor as for the borrower. We have twenty-five years of business to prove it.
