Considerable seeding has been done in this section of the county and if it had not been for the recent heavy rains the greater part of the wheat would have been in by this time. Boy Scout Notes

The Boy Scouts met with Herman Erhardt April 25th. The room in which the Scouts met was decorated with evergreens. The Scouts were then asked to lead Compositions which they had prepared beforehand. The Boy Scouts will meet with Charles Pope, May 2nd.

What I Think of the Scout Movement

On Feb. 11, 1921, Rev. Shallcross started the boy scout organization of Hamilton. I think the organization has helped everyone that is a member, at least it has helped me.

When there is a war and some of the boys are called there are some helps one knows such as first aid and semaphore signaling. Also the tying of knots is known. If you get lost in the woods you could care for yourself by knowing the direction of the compass. You also learn how to cook and prepare food without cooking utensils. It teaches you to be kind and thoughtful to all others. It teaches you to train your eyes and observe and remember things you see. One important thing you learn is the proper care of your health. These are some of the important things that we can earn medals for swimming, marksmanship, stalking, pathfinding, cooking, agriculture and several others. These things also help you thru all the later years of your life.

Second Class Scout.

Charles Pope

The above composition by Charles Pope is well written and shows careful study on the part of the author.

Do You Lubricate Your Motor-Or Just Oil it ???

There is a vast difference between intelligent lubrication and just shooting an unknown oil into the bearings of your auto—to run around awhile and then quit, vanquished by friction, dust, dirt and other dangerous elements.

There is a PYRAMID LUBRICANT that FITS your machine—our expert will gladly tell you just what grade it is. It will pay to use it, because it means ABSOLUTE PROTECTION from

- frictional troubles of all kinds.
- dirt, dust and other foreign matter.
- loss of power, by its action as a compression seal.
- excess expense, by its economy.
- damage and wear, by being a pure oil, full-bodied, heat-resistant and free from sediment.

Pyramid Lubricating Oil stays put. It adheres to the bearings and forms a veritable armor of protection, because it is compounded specifically for that purpose.

Growing Grimm Alfalfa Profitable at Minto.

Mr. B. J. Narloch, who lives within a mile of Minto, secured sufficient seed from our association to plant 10 acres in June, 1918. This field yielded excellent hay crops in 1919 and in 1920, about two tons of hay to the acre in June and 200 pounds of seed to the acre in September. This seed is worth approximately \$120 an acre or practically as much as the land is worth. The alfalfa hay more than paid all the expenses last year and it will doubtless pay very well in 1921, there being no plowing, discing, harrowing or seeding necessary.

The important thing in getting a good stand of alfalfa is to be sure you get the Grimm; by buying from our association you are sure you are getting the Grimm alfalfa. If you should produce seed crops, you will have no trouble in getting your field registered and in marketing your seed for a good price through this organization.

Price of seed in lots less than 5 pounds per pound postpaid, \$1. 5 pound lots or more 70c. Sacks extra 50c.
