Pembina Saving and Loan Association
Why not rent when monthly rent money will buy the property

For example, suppose the house is purchasable for \$1,000, which you are renting at \$12 per month. You buy the house putting in \$300 an borrowing \$700 from the Pembina Savings and Loan Association. Your monthly payments to the latter would then be \$10.50 instead of \$12 with the difference that every payment to Saving and Loan Association is a payment on the house, while the payments made for rent are lost to you.

Call in and let us show you the experience of others. We can also show you that it is just as good for the investor as for the borrower. We have twenty-five years of business to prove it.
