

HAMILTON DEPARTMENT.

The Town of Hamilton is located geographically in the center of Pembina County, on the Great Northern Railway. It is surrounded by the most fertile agricultural lands to be found in the famous Red River Valley. There never was known to be a crop failure, although the yields vary according to seasons. The farmers are industrious, prosperous, loyal and intelligent. The people of the town are wide-awake and ready to meet legitimate competition. Besides the Pembina County Fair being located here we have three grain elevators, with a storage capacity of 250,000 bushels, \$20,000 Town Hall and Opera House, besides every business enterprise being represented. Hamilton welcomes you.

Catalina Island, California, one of the garden spots of the world, was used as a locale for filming "Drag Harlan," the William Farnum picture produced by William Fox, which will be shown at the New Grand on Saturday evening, July 1st. Word has been received from the boys who are on a fishing trip to Cass Lake, Minn. that they are having a grand time and catching lots of fish. The party is composed of Ivan Iverson, Eith Fennell, Ray Thacker from this place and Haakon and Ole Haugon from Grand Forks. We are told that so far the honors of catching the largest fish have fallen to Eith Fennell, but of course this will not in any way detract from the fish stories that they will tell when they arrive home.

"That is" she is quick to add, "I really wasn't, my parents were traveling through France, and stopped off at Paris on my account, but I am American through and through, and it doesn't seem fair to claim France as my native country, so I say I was born in Philadelphia—as I really should have been."

Bowsmont

Bowsmont held their annual picnic last Tuesday with the usual attendance. The dining hall was packed with hungry visitors several times but there was an abundance to eat provided by the good housewives of the neighborhood. The program consisted of base ball, horse races, both running and trotting besides other varieties of entertainments. When it is considered that the affair was

postponed on account of rain from a previous date it is surprising the number of people that were there.
The Pembina Booster Club with their band arrived across country from St. Thomas about six o'clock and helped swell the crowd and furnished several selections in the streets before proceeding home.
That the annual picnic in Bowsmont is getting to be more popular every year goes without saying, for of late years people from neighboring towns as well as the country at distance are increasing in number.
Oscar Thomson and Miss Florence M. McConnell were married at Winnipeg last Tuesday. Particulars will be given next week.

ONE MAN CAN FARM MORE LAND with the

MOLINE UNIVERSAL TRACTOR

It Solves The Farm Help Problem

With the Moline-Universal—the original two-wheel tractor—One Man can farm more land than was ever before possible, because—
One Man has power at his command equal to six horses, capable of doing the work of nine horses, due to its greater speed and endurance.
One Man operates the Moline-Universal from the seat of the implement to which it is attached, where he must sit in order to do good work.
One Man can start in the spring and go from one operation to another—plowing, harrowing, planting, cultivating, sowing, harvesting grain or corn, spreading manure, filling the silo, cutting wood, etc., doing all farm work from one year's end to another, independently of horses or hired help.
All these one-man operations are possible with the Moline-Universal because it is mounted on two wheels. It attaches direct to the implement, making one compact unit—the tractor front wheels and the implement the rear wheels. One man controls the entire outfit from the seat of the implement. There has been good reason in the past for putting a seat on implements, for it is from this point that the work must be observed and that adjustments must be made.

Being close coupled to the implement, the Moline-Universal Tractor backs as readily as it goes forward, and turns in a 16-foot circle. It steers so easily that a boy or woman can handle it as well as a man.
With the Moline-Universal one man can take care of all the requirements on the average size farm.
Plowing with two-bottoms, the Moline-Universal Tractor does as much work in one day as the ordinary three-plow tractor, due to the higher speed at which it operates, 3 1/2 miles an hour. It has the power to run at this high speed because all of its weight is traction weight—all of it is converted to pull.
The light weight of the Moline-Universal Tractor, 3580 pounds, and its high clearance—greater than that of the average cultivator—make it perfectly adapted for cultivating. It isn't the kind of tractor that does your plowing and seed bed preparation and then rests while your horses do the planting, cultivating and harvesting.
Mechanically, the Moline-Universal is the most modern tractor built, containing more refinements and improvements than any other tractor on the market.
