GUADALUPE

Frank A. C. Schweltemer ruled off some necessary business in Lima last week.

Many people enjoyed an interesting sight on Friday evening of last week, when they saw the balloon rise in Coldwater. Shortly after its ascension the aeronaut was plainly seen to make his descent in a parachute. The balloon then traveled directly eastward, and when close to the church here it was only at an elevation of 120 feet, landing in a field on Mr. Huelmann's farm close by.

What's in McClure's

Roosevelt, the most talked of private citizen, and the German Emperor, are the subjects of articles in the July McClure's. Both papers are by Sydney Brooks, a well known English political writer and both so good that the magazine is induced to break its rule of not printing two articles by the same author in one number. Mr. Brooks tells "What Europe Thinks of Roosevelt," and his paper, "The Real Kaiser," is said by those who should know to be the best article ever written about that pretentious ruler. Elizabeth Shepley Sergeant writes of the shocking conditions under which false hair, "willow" plumes, artificial flowers and other things sold in the great shops are manufactured in New York tenements; John Burroughs answers the exponents of the "new psychology" who declare that animal behavior is not governed by reason or instinct, and Senator Platt gives his side of the Garfield-Conkling feud. Jack London contributes "The Unparalleled Invasion" an exceptionally strong fiction number. Other stories are "From One Generation to Another" by Arnold Bennett; "The Translation of Giovanni" by Amanda Matthews; "The Aluminum Dagger" by Austin Freeman; "The Poet Who Saved His Youth" by Helen S. Thomas and "Corazon" by George Pattullo.

BIG HOBOKEN FIRE TO BE REPRODUCED

One of the Features of the Ohio Valley Exposition.

Cincinnati, O. (Special)—Arrangements have been perfected and work begun for the reproduction for exhibition purposes of one of the most famous fires in history—the burning of the big steamship docks and several ocean-going vessels at Hoboken, N. J., several years ago. It has long been an established fact that the vast general public would rather see a fire than witness any other kind of spectacle that might be offered them in the line of a catastrophe or calamity. This is evidenced at every ringing of the fire bells, which bring spectators from far and near to "see the machines run" and to witness the work of the firemen after the scene of the conflagration is reached. When the spectacle, "Fighting the Flames," was produced some years ago by Claude Hagen, the well-known purveyor of public amusements, it was thought that the acme of realism in shows of this kind had been reached. But it seems that there was room for even greater spectacular effort, and again it is Mr. Hagen who has discovered this. His plans for a "fire" show, entitled "Fighting Flames on Ship and Shore," have been accepted by the Ohio Valley Exposition, and under the direction of the inventor the work of installing this thrilling spectacle is now going on. The plans calling for its erection on the banks of the canal, and contracts making it imperative that all work shall be completed some weeks before the opening of the Exposition on Aug. 23, so that a perfect performance may be given when this big industrial enterprise is thrown open to the public. "Fighting Flames on Ship and Shore" will show how the fire on the Hoboken docks was combated by the fire-fighters on land and by the fireboats of the New York department. There will be thrilling leaps from the masts of ships into the water, miraculous escapes, exciting scenes in which passengers and firemen will take part—in fact, as perfect a reproduction of that mammoth marine conflagration as can possibly be pictured. Several hundred people will be employed in the production, which will be given in a prominent location in the amusement section of the Exposition.
