**GOVERNOR HARMON'S GAGE OF BATTLE**  
"The election of state officers will turn, as it should, on the important home affairs which are now the chief concern of our citizens. I shall refuse to be drawn away from these. What the present administration has done and tried to do is known to all, and the question is, Shall it be approved or condemned?"—From Governor Harmon's speech accepting renomination.

**VOTERS CAN SEE IT NOW**

This year the average voter is wide awake to the fact that political affairs in Ohio have been very unsavory, if not altogether rotten in too many instances, under Republican mismanagement that extended back over a period of years. He sees it was a mistake to elect a Democratic governor and at the same time his hands with a Republican legislature, Republican state officers and a large number of Republican appointees. He figures that, however much has been accomplished, Governor Harmon could have accomplished infinitely more if backed up by a Democratic legislature and Democratic state officers.

**IMPORTANT FACTS FOR FARMERS**  
How "the Best Ever" Tariff Picks Their Pockets  
**IMPLEMENT PRICE AT HOME AND ABROAD**  
Protection On Wheat and Corn a Rank Delusion

When the Payne-Aldrich tariff bill was passed it imposed a duty of 15 per cent upon plows, teeth and disk harrows, harvesters, reapers, agricultural drills, planters, mowers, horse rakes, cultivators, threshing machines and cotton gins. In spite of the fact that the manufacturers sell these articles cheaper to the people in other countries than they do to the people in this country.  
The farmer in South America and in Europe can purchase a No. 1 disc plow for \$32.50, while the farmer in the United States must pay \$40 for the same. A 25-tooth harrow is shipped and sold to the foreigner after paying freight and insurance on same for \$18.25, and the same implement costs the farmer in the United States \$22. An 18-tooth wood frame harrow is sold to the foreigner for \$7.50, while the farmer in the United States must pay \$9 for the same thing. Cultivators, wheel No. 61, sell to the foreigner for \$4, while the home farmer must pay \$5 for the same. Shovel plows No. 29 are sold for \$2.15 each to the foreigner, while the farmer here at home must pay \$2.50 for the same. A thrasher grain horse or steam power, 32 inches, is sold to the foreigner for \$300, while the thrasher in this country is charged \$400 for the same. Straw stackers 18 ft. sell to the foreigner for \$25, while the price in this country is \$30 for the same. A clover huller that costs \$450 in this country is sold to the foreigner for \$328. Potato diggers sold in the United States for \$100 cost the foreigner but \$99.

**HARMON SQUELCHES A CANARD**

An article published originally in the Cleveland Leader (Rep.) of Sunday, Aug. 28, and telegraphed to other papers under an Akron date, imputed to Governor Harmon the following utterance with reference to strike conditions at Columbus: "The trouble with us is that the police force is worthless, the mayor an imbecile and the people in general cowards."  
It was represented that the governor made this remark in an interview at Silver Lake, near Cuyahoga Falls, where he attended and addressed a farmers' picnic.  
Such expression is so foreign to Governor Harmon's manner of speaking that it is a self-evident fact, scarcely worth the dignity of denial; his origin in the columns of a rabid Republican paper makes apparent the motive for publishing broadcast so silly a story.  
Those who know Governor Harmon recognized at once that the story was absurd, for they well know that he does not indulge in language of that sort. To all others whose sense of decency and fairness is not warped by partisan bias, the governor's emphatic denial will be sufficient.

**SAW COX FIRST.**

Right after the Columbus convention the following dispatch was published in a number of Ohio papers:  
Cincinnati, O., Aug. 2.—Warren G. Harding had a conference with Boss Cox here last night. Harding claims the meeting had no political significance, as he was here on business for his paper and called to thank Cox for his support in the convention. He refused to discuss the Cox-Burton rumpus.

er's intelligence. The farmer is not only being crucified upon this cross of high protection, but he is being compelled to carry his cross to his own crucifixion.  
A glance at the market will show that the farmer in Winnipeg, Canada, gets more for his wheat than the farmer in Missouri and Ohio by several cents. On June 12, 1909, the Chicago Record-Herald quoted the market of July wheat as follows:  
Winnipeg .....\$1.39 a bushel  
Duluth .....\$1.30 a bushel  
Minneapolis .....\$1.31 a bushel  
When you leave the Canadian line, July wheat was quoted in New York at \$1.26 a bushel; in Chicago at from \$1.18 to \$1.22 a bushel, notwithstanding the tariff of 25 cents a bushel. July wheat was quoted in St. Louis at \$1.16, 14 cents less than in Winnipeg, notwithstanding the duty of 25 cents, and in Kansas City July wheat was quoted at but \$1.12, 18 cents less than the Canadian wheat in Winnipeg, notwithstanding the "protection" of 25 cents a bushel.  
When you talk about competing with the pauper labor of Europe, Asia and Africa, what's the matter with the American who has to compete with the coolie laborer of India, the cheap laborer of Russia and Egypt, while he is compelled to accept the price that is made for his wheat at the market in Liverpool, England? Yet when the home farmer buys his agricultural implements he is being charged from 20 per cent to 50 per cent more than the foreigner has to pay for the same article. Is it not then a just kick that the farmer makes against this tariff of 15 per cent being placed upon these articles?  
The tariff on corn and wheat is a delusion and a snare. They are intended to be a delusion and a snare, and whenever farmers complain that duties have been increased upon the necessities of life Senator Aldrich tells them that they need not murmur that they were not neglected; that the duties were increased upon agricultural products.  
These increased duties on farm products are intended to dazzle and to deceive the farmers of this country.  
In spite of all the Republican party's protection the farmers of the United States must meet the pauper farmers of all the earth in the market places of the world. Since they must sell in the cheapest markets of the world, they ought to be allowed to buy their farming implements in the cheapest markets in the world, and for them the cheapest market in the world for farming implements ought to be here at home, where the implements are manufactured.  
It is simply a question who stands higher in the esteem and affection of the Republican party—the farmer of this country or the international trust on farming implements.

**POLITICAL PROPHECY FULFILLED IN DETAIL**  
Read the following editorial, which is reprinted verbatim just as it appeared in the Marion Mirror of Jan. 18, 1909:  
"Governor Harmon has let it be known that he is not going to stand idly by and watch the Republican bosses in Ohio run state affairs. He intends to take the bull by the horns and upset a few of their plans and among the very first will be establishing some order in the loading of state money to the banks. But this is only the beginning. He is going to do some other things and among them is an inquiry into the way of doing business in Cincinnati and Hamilton county. Governor Harmon is just the kind of a governor Ohio has been looking for and when he gets through stirring things up and straightening them out, the people will recognize his value."  
Although that editorial was written and published a year ago last January, when Governor Harmon's administration was only 10 days old, so completely has it been verified in every detail that it may be set down now as a prophecy fulfilled.  
It is a credit and honor to the state of Ohio to have a governor who so completely measured up to the expectations of the people, and the re-election of Governor Harmon in November will signify that the people are not ungrateful to a faithful public servant.
