

You Can't Make Your Farm Pay

If You Eat the Doughnut and Offer the Hole as Collateral

THERE'S a man out in Illinois who owns a bank and lends money to farmers. He wanted to get at both sides of the question of borrowing and lending, so he got busy on a half-section of land and farmed it on the principle of a square deal to the soil. What he found out was this: It's bad business, both for the farmer and the banker, for the farmer to eat the doughnut and offer the hole as collateral on a loan.

It's one of those simple solutions of a big financial problem that engaged the attention of the President of the United States and a group of Governors, meeting at the White House to discuss this great problem only a few weeks ago. Presidents of Insurance Companies, bankers, men and institutions with money to invest, farmers who want to borrow money—all these people will agree with us that Mr. Harris has thrown the searchlight of common sense on a subject that seemed as thick as a London fog.

There is a host of good things in this week's issue of THE COUNTRY GENTLEMAN, but

Financing the Farmer

By B. F. HARRIS

will be read with rare interest by every man whose business it is to lend money, or to borrow it—which means several million people.
