Wm. E. Beall, owner, to rebuild walls at 1415 Providence street. W. R. Rudd & Bro., contractors. Cost, \$160.

### DISHONEST LABOR AGENTS.

Austin, Tex.—Commissioner Woodman of the State Bureau of Labor has notified all employment agencies in this state that he has revoked the license of one private labor agent because he "sent would-be employes to different points where there was no employment and refused to return fee charged; and acted in an immoral manner toward female applicants, and posted notices of jobs when there were none listed."

The commissioner warns these concerns that he "will have no mercy for agent or agency that mistreats its applicants."

### HAS RIGHT TO INSPECT FOOD.

Harrisburg, Pa.—Pennsylvania has the right to inspect food products shipped from other states, rules the deputy state attorney general.

The decision was given in regard to inspection of food products shipped into this state from New York and which, the manufacturers contend, complied with the federal food and drug act and were therefore exempt from Pennsylvania inspection.

### COURT REJECTS DICTOGRAPH.

Atlantic City, N. J.—Supreme Court Justice Kahisch has set aside the conviction of two men found guilty in a lower court on "graft" charges on the evidence of a Burns detective and his dictagraph. The sleuth's testimony was supported by notes of a supposed conversation which a stenographer stated floated to him over the dictagraph. The court ruled that this was not sufficient corroboration because the stenographer could not see or never had heard either of the accused before. A new trial was ordered.

### CONTINUE TO ROB MINERS.

Denver, Colo.—A miner correspondent in the Labor Bulletin has this to say of one of the evils confronting Colorado's coal diggers:

"Andy Walker, who operates the Monarch mine No. 2, at Louisville Junction, was fined \$50 when he was found guilty of cheating the miners in the weight of the coal they mined. The miners would like to know why they should not be reimbursed for that stolen from them. Is Walker to keep all over \$50 of that stolen from the miners? If so, is this not putting a premium on robbing those who toil in the mines?"

"If a man be fined an amount that is but a small portion of the sum he stole, what redress has the person losing his property or valuables? What crime had the miners in Monarch mine No. 2 committed that they should be fined so much of their production each day? Is it that it is a crime to be a miner? If so, what are miners to do, for if they cease work as they did in the recent strike to force their rights to be recognized, are they not also considered criminals for daring to strike? Let those who bitterly opposed the miners and published false statements of their earnings answer these statements."

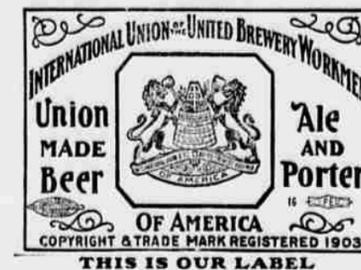

"Who knows how many more 'Andy Walkers' there are robbing the miners in this State? If these things are denied the miners, can any one expect anything other than that the miners will again strike?"

### WOULD JAIL UNION GIRL.

St. Louis, Mo.—Says St. Louis Labor, in its last issue:

"A telegram received by President Otto Kaemmerer, of the St. Louis Garment Workers' District Council, from Phillippi, W. Va., is to the effect that Miss Fannie Sellins, formerly of this city, was ordered by the court to go forthwith to jail for the unexpired term of the sentence in connection with the violation of injunctions during the West Virginia coal miners' strike. An appeal will be taken."

### PRIVATE SHIP YARDS ARE HIGH

Washington, D. C.—Government navy yards scored a decided hit over private shipbuilding yards last week when bids for two battleships and other vessels were opened. It was found that in no instance did the private concerns come within the cost limit.

Advocates of a government-built navy are encouraged, and it is believed the incident will convince national lawmakers of the necessity of equipping more government yards for battleship building. It is claimed that strong efforts will be made by the private yards to be permitted to revise their figures before the award is finally made.

### PREPARING FOR "BABY WEEK."

Washington, D. C.—The children's bureau of the United States Department of Labor announces that State health officials of 39 States have already pledged their co-operation in the observance of the nation-wide "baby week," March 4 to 11, 1916. Instructions and bulletins are being prepared for a baby show, a children's health conference or for any kind of a children's exhibit in cities or in the smallest of communities. The bureau states that a bulletin will be shortly available for free distribution in which the experience of several cities in this work will be made public.

### FAVORS A FREE PRESS.

Chicago, Ill.—Judge Taylor has issued a temporary injunction against the civil service commission, which is denied the right to exclude the press from its office or deny newspapers access to its records. The court order means that the Civil Service News, a newspaper conducted in the interest of civil service employes, can not be barred from the office of the commission. The paper has questioned the methods employed by commissioners, who are charged, among other things, with dismissing employes to make temporary appointments.

### M. O. WITH ARBITRATION CLAUSE.

Detroit, Mich.—A movement has started in this city to establish municipal ownership of street cars, with an arbitration clause included.

At the recent election organized labor defeated a municipal ownership plan because this clause was missing, thereby giving the commissioners who would control the system dictatorial powers over working conditions. It is now proposed to amend the city charter that the objection of unionists may be removed, and the workers are invited to join in this effort.

### THE NOBILITY OF FRANCE.

Whatever the final outcome of this war may be, at least one nation—France—will emerge from it greater in the things which count than when it entered. The conduct of the French people, as well as the French army, has excited the admiration, and commanded the respect, of even its enemies. And it has been in the little things, more perhaps than the big ones, that France has excelled.

The latest "trifle light as air which is confirmation strong as proof of holy writ," is the announcement that German prisoners employed in the coal mines in France are paid regular and liberal wages for their labor, France's treaties of the future may be regarded as something more than a scrap of paper because of these little things.—Post.

### SOME OLD.

Columbus, O.—Colonel W. P. Rend, aged 75, millionaire, president of the coal company in Chicago bearing his name, who shipped the first trainload of coal out of Columbus on the Hocking Valley Railroad forty years ago, is dead in Chicago. He was a native of County Leitrim, Ireland. He was the first man wounded at the battle of Yorktown.

## Men's Hats

\$2

Soft and stiff hats for men. All the latest and most popular styles for winter wear. The colors and shades are such that every man can select the very hat he desires.

The quality of these hats is, in our opinion, the best that can be bought for \$2. Step into our store on Saturday and look them over.
