THE AMERICAN HOME

Wm. A. Radford
EDITOR

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 124 Fifth Ave., Chicago, Ill., and only enclose two-cent stamp for reply.

Four rooms on the ground floor with the front and back stair, and four rooms with a good comfortable bathroom on the second, briefly describes this plan. The house is 24 feet six inches wide and 44 feet long, without measuring the porch. A distinctive feature is the front hall with its pretty open winding stairway with a closet underneath for hats and coats, and three doorways which give access to three different rooms—an unusual feature in house construction. Of course there are many long, winding halls that reach away back and communicate everywhere, but they are not economical of room. In this case the hall occupies very little space, but the convenience and artistic effect is much greater than most halls, although others may be much more pretentious. It is a great thing in building to utilize space to the best advantage. Measurements are arbitrary. In a given ground space the fact must be recognized that the enlargement of one room means that the next one must be smaller. This hall is large enough for all practical purposes and it leaves plenty of room for the parlor, dining room and sitting room.

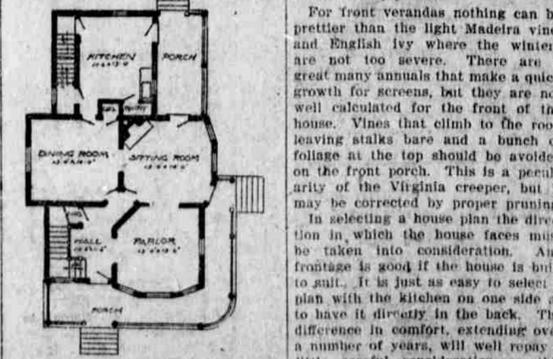

The parlor is the smallest of the three, and rightly so. Parlor is fast going out of date. Their principal use has been for weddings and funerals, and the way some of them are furnished leaves a funeral favor all the time. The children must be excluded and the men folks are afraid of disarranging the chair ties or getting

Every side porch should have a vine climbing to the eaves for appearance if nothing else, but the direction should determine whether it be a heavy, broad-leaved vine for shade, or one of the lighter, prettier vines for effect.

There are a great many climbers that may be used for this purpose, and it is easy to select one suitable to the climate and to the needs of the

situation. Every house could be improved by the addition of a vine somewhere, but the indiscriminate planting of any one kind of climber should be discouraged. Such vines as the Dutchman's pipe are very suitable for verandas where deep shade is an object, because the leaves are large and heavy. It is impossible for the sun to penetrate through a healthy growth of Dutchman's pipe vine leaves. The beauty of this vine is not in the blossom. The blossom is odd and shaped like a Dutch pipe, but it is inconspicuous. The heavy foliage is the chief attraction of the Dutchman's pipe vine.

For front verandas nothing can be prettier than the light Madeira vine and English Ivy where the winters are not too severe. There are a great many annuals that make a quick growth for screens, but they are not well calculated for the front of the house. Vines that climb to the roof leaving stalks bare and a bunch of foliage at the top should be avoided on the front porch. This is a peculiarity of the Virginia creeper, but it may be corrected by proper pruning.

In selecting a house plan the direction in which the house faces must be taken into consideration. Any frontage is good if the house is built to suit. It is just as easy to select a plan with the kitchen on one side as to have it directly in the back. The difference in comfort, extending over a number of years, will repay a little careful consideration on this point.

There are a great many things to consider, and this is one of the most important but one that often is overlooked. By all means build a good suitable kitchen and give the good wife a chance to enjoy her working hours.

The First Banknotes.
According to Chinese chronicles banknotes were current in China 257 B. C., under the name "Flying money." They were probably written on printing from wooden tablets and only known in China in the year 160 A. D.—Home Notes.

Ornamental Needlework.
Ornamental needlework extends back to 400 years in India, and even longer in China. It has been called the mother art of sculpture and painting.

WOMAN IS SCIENTIST

FAIR JEWESS RECEIVES MEDAL FROM ROYAL SOCIETY.
Enviably Honored by Mrs. Hertha Ayrton—First Person of Her Sex So Rewarded for Unaided Research.

London.—Mrs. Hertha Ayrton, who is already known to some extent in America, can now claim recognition as England's foremost woman scientist. She is the first woman in the world to be awarded the Royal Society's medal for her own unaided efforts in scientific research. Mme. Curie has the medal, it is true, but it was awarded to her jointly with her late husband for their renowned discovery of radium.

JOSEPH M. DIXON.
(He Succeeds Wm. A. Clark as Senator from Montana.)

a habit of never losing anything he goes after. He is the most popular man in public life in Montana, which may be considered remarkable when it is known that he never spent a dollar above the strictest legitimate expenses in any of his campaigns. It cost the man he is succeeding more than a million to get his seat. Mr. Dixon is of Quaker parentage, and largely owes his conspicuous success in life to his unobtrusive, unassuming manners, sterling honesty and knack of seeing and seizing opportunities. He is in sympathy with administration policies. He has a wife and four daughters.

CAMEL AS COLLEGE MASCOT.

Stuffed Animal Prized by Students of Brown University.
Boston.—Archibald, the spikeshoofed camel, is the mascot of Brown University.
He is not a common camel, since he is stuffed with hay and history. Some 25 years ago he was brought from Africa, but died en route. He was placed in the natural history rooms at Providence, but was at home there only 30 years when something happened. Suddenly he loomed up one morning on the college campus, standing stiff and straight.
Since then every year at midnight on February 21, he has been carried from his stall to be the central figure around which hundreds of the students have danced in the glare of a huge bonfire a sort of performance in honor of George Washington.

Archibald of Brown University.

why Brown was to the good with Dartmouth in football last fall, for he was at the game in full style. Though old and decrepit and frayed and worn, with little stability and less hair, yet old Archibald always stands proudly in the foremost rank of the crowd and leads the cheering.

Owms Much Scotch Land.
Sir Hugh Shaw-Stuart, of Ardsowan, who is one of the greatest territorial magnates of the west of Scotland, and about the richest of them, sat for East Pembroke as a Tory from 1886 until the last general election. He has just been requested to become the next general election, but has declined, because he is a staunch free trader and entirely disapproves the protectionist leanings of the opposition leaders. Sir Hugh's father, the late Sir Michael Shaw-Stuart, sat as a Tory for Renfrewshire in three parliaments, and he is said to have twice refused a peerage. Sir Hugh, through his mother, is a nephew of the late duke of Westminster, and he is married to a sister of Lord Bath.

Bird Notes Set to Music.
Henry Oldys, assistant biopologist in the department of agriculture, has 1,000 samples of bird music written in popular form so that it is possible for the human voice exactly to imitate the songsters of the field and forest. He has recorded, says the Washington Herald, the actual tones, setting them in the proper musical key, and their reproduction is easy for anybody who can read musical symbols. Mr. Oldys has been gathering bird language for 13 years and during most of that time has been devoting his expert knowledge of the subject to special reports which had their way in the government archives.

PRECAUTION WORTH REMEMBERING.

There are people who say that they never can enjoy a hot bath because the hot water always makes them faint. This trouble, according to a writer, may be remedied by the simple expedient of placing a towel which has been wrung out in cold water on the head and retaining it there until the bath is over. It is possible that cases of fainting have occurred as a result of faintness while in the bath, so that this precaution becomes advisable.

Phrase Worthy of Monarch.
Perhaps the most striking phrase uttered by a modern king was spoken by the late King Humbert, father of the present king of Italy, when some years ago cholera was raging in Naples. His majesty had been invited by the municipality of Genoa to a banquet, which he declined in these words: "Men are feasting at Genoa; men are dying at Naples. I go to Naples."—Sunday Magazine.

Daily Thought.
The highest compact we can make with our fellow is: Let there be truth between us two forevermore. It is sublime to feel and say of another, I need never meet, or speak, or write to him; we need not reinforce ourselves or send tokens of remembrance; I rely on him as on myself; if he did this or thus, I know it was right.—Emerson.

Neglected Cold Threatens Life.
(From the Chicago Tribune.)
"Don't trifle with a cold," is good advice for prudent men and women. It may be vital in the case of a child. Proper food, good ventilation and dry, warm clothing are the proper safeguards against colds. If they are maintained through the changeable weather of autumn, winter and spring, the chances of a surprise from ordinary colds will be slight. But the ordinary cold will become severe if neglected, and a well established rule is to the germ of diphtheria what honey is to the bee. The greatest menace to child life at this season of the year is the neglected cold. Whether it is a child or adult, the cold slight or severe, the very best treatment that can be adopted is to give Chamberlain's Cough Remedy. It is safe and sure. The great popularity and immense sale of this preparation has been attained by its remarkable cures of this ailment. A cold, cough, or results in pneumonia when it is given. For sale by all druggists.

MRS. HERTHA AYRTON.
(Honored by British Royal Society for Scientific Research.)

magical letters of "F. R. S." behind her name.
She is well known in the United States, for she visited there six years ago, and at the Electrical Congress in Chicago read one of the most interesting of the papers.
At 16, Mrs. Ayrton had graduated and began to earn her living as a professor at Girton college, Cambridge, then in its infancy as a college for women. She was surely the youngest teacher in the history of Girton. It was there that she took up her first researches into mathematics and physics. She invented a sphygmograph for recording pulse beats, but finding something similar on the market, abandoned hers and patented a line divider—an instrument for immediately dividing up a line into any number of equal parts.

For nine years Mrs. Ayrton devoted herself to her family life. Then in 1893 her husband was summoned to the United States on business. His services have often been asked as an expert by India, Japan, the United States, in fact, all parts of the world. In his absence, Mrs. Ayrton continued his work, his investigations and experiments on the electric arc. Seven years later, when his paper on the subject, read before the International Electrical Congress, was unfortunately burned in Chicago, Mrs. Ayrton surprised her husband by writing a substitute on the points he had noticed, which he declared was better than the original.

Is Lover of Butterflies.
From the cabinets of naturalist R. W. Denton, of Wellisley, Mass., suggestions in hues and shapes for Worth gowns. La Farge windows and many other results of artistic excellence. Mr. Denton is a collector and dispenser of butterflies—of the wonderfully colored beauties of the tropics. He has one of the finest collections of butterflies in the world.

The Mystery Of the Nerves

Professional men, as well as laymen, have been puzzled over the mystery of the nervous system, but this mystery is certain that never exists in a condition from pure, rich blood, and with the exception of accidental injuries, diseases of the nerves arise from a thin, watery condition of the blood.

On this principle, Dr. A. W. Chase's Nerve Pills were prepared, for the great restorative actually forms a certain amount of pure, rich blood every day. Not only is this treatment scientifically correct, but the enormous success which it has attained has prevented it from being a cure for all diseases resulting from thin, watery blood. When you cannot sleep well, suffer from nervous headaches and indigestion, brain fog, irritability, trembling or twitching of the nerves, and feel downhearted or discouraged, turn to Dr. A. W. Chase's Nerve Pills as the most certain means of restoring vitality to the nervous system, and of averting nervous prostration, paralysis or some dreadful form of helplessness. 50 cents a box, 6 boxes for \$2.50, at all druggists, or Dr. A. W. Chase Medicine Co., Buffalo, N. Y.

For sale in Marion, Ohio, by Flock's Drug Store.

er education than any man has brought to the White House since Jefferson's day, a life unstained by vice of any kind, a clean mind, and a boyish heart, simple, confident, just, have combined to keep Theodore's faith in God and his belief in the common honesty of the common man unshaken.

Thus writes William Allen White in his "Roosevelt: A Force for Righteousness," in the February McClure's. Successful contemporary portraiture is so rare an achievement that an article like this of Mr. White's merits unqualified attention. Throughout, he displays the sureness of touch and soundness of intuition that have distinguished his earlier work; some of his passages indeed, seem inspired so brilliantly do they hit it off. What for instance could be better than this:

"A middle-aged, middle-sized figure, struggling against pudginess, simple, boyish, direct; impulsive for the right and intolerant of wrong; human to the core, with his blind side for his friends and his sleepless eyes for his enemies—a group of gentlemen for whom he never has to blush. . . . a happy mixture of the cheerful idiot, the seer of visions and the captain and crew of the "Nancy being"—a man who does the undisciplined thing in such a boyant way!"

Mr. White's analysis of Roosevelt's career, and "the tremendous effect of his precepts and his consistent example," is handled in this writer's most brilliant and able manner.

Among Magazines

THE AVERAGE STATE LEGISLATURE.
The legislature couldn't make one good law in three months, let alone three thousand without turning in some direction for aid and counsel. Our well meaning farmers, and grocers, and manufacturers, are probably endowed with that profound ignorance of basic problems which comes out in the form of a loud contempt for "science" and "theory." But now they are, in the language of the committee report, up against it. They have got to make three thousand laws in three months, without much of an idea, in some cases, of what the "blessed things" are all about. A good many of our farming and manufacturing friends would really like to make good laws; but probably not one of them is competent to draw a bill that will hold together. To make it worse, these laws, good or bad, will come down forcibly on every man, woman and child in the State.

In view of this fact that the legislature, made up of bungling, good-hearted amateurs, with a leavening of crooks, is bound to turn out just about so many laws anyway—do we citizens, the real "interests" most vitally affected by the mass of legislation, take any adequate measures either to put in a better man, or to supply accurate and thorough information as a basis for the legislation? Not at all. We send our legislators down to the capital, and go on, serenely vague, about what we like to call "our business." The snail's on the thorn. God's in his Heaven, all's right with the world! And meanwhile the attorneys for the railroad and the "public service" company, and the big brewers and manufacturers are drawing up bills which our farming friends don't understand, and are crowding them through with doubtful statistics and specious reasoning which our farming friends may question, but which they have neither the time nor the resources to dispute.—Samuel Merwin in "Success Magazine."
