PEOPLES TRANSFER CO

Jubilee Market, Kingston, Jamaica

Here the natives of the city gather daily to do their marketing. The women bring their vegetables in baskets on their heads and spread them out on the ground for the benefit of prospective purchasers. Considerable damage was wrought in this section by the earthquake and fire.

ROSES CAST IN BRONZE

NATURE IS NOW MIMICKED BY METAL ART PROCESS.

Process Found by Brussels Chemists After Long Search and Experiments—Their Methods Are Kept Secret.

Washington.—Consular reports from Brussels announce the discovery there of a new art process by which objects of the most delicate character, such as a rose in full bloom and filigree lace, can be reproduced in bronze by submerging them in a copper solution. Consul General George W. Roosevelt writes about the new discovery as follows: "The first attempt at metalizing objects was known to the industrial world as long ago as 1861-1866, when unsuccessful efforts were made to metalize flowers. After six years of research and experiments, H. Monge and C. Krzanos succeeded in perfecting the art, and recently established a factory at Brussels for the manufacture of bronze plated art objects. The object of this establishment is to place handsomely finished metalized objects on the market, in every particular equal to, but at one-eighth the cost of cast bronze, and to imitatively fix the incomparable forms nature gives to her products, such as flowers, leaves, fruits, and insects. Of these the most skillful have heretofore only furnished fair imitations by covering the object by electrolytic means with an exceedingly thin, but as dense as possible, coating of brass, which transforms the natural objects into bronze. "Without disclosing secret methods of metalizing, no hesitancy was observed concerning the length of time that objects were retained in what is known as the bath. The objects subjected for metalizing are generally well known works of famous artists, artistic objects, such as card and seal receivers. The finished articles, which resemble in weight, texture and color, real bronze, are entirely different from any manufacture flow on the market, as they are declared chemically pure copper."

FINDS A \$30,000 PEARL

Poor Moro Fisherman Now One of the Richest Men in Archipelago.

Manila, P. I.—A single pearl worth \$20,000 has been taken from the Sulu sea by a poor Moro fisherman. So far as is known it is the biggest ever found there. It is as big as a common marble, of beautiful color and without a flaw. The Moro fished it out with the three-pronged deep sea rake of his forefathers and will not tell whereabouts he got it.

An old Moro law requires that all pearls of unusual size and beauty be given to the sultan. Under American rule that law was abolished, but the Moros so fear their powerful dattos that they continue to obey it. This fisherman gave up the pearl, but immediately reported all the facts to Colonel E. Z. Steever of the Fourth cavalry, the acting governor of the Sulu group. Governor Steever forced the sultan to disgorge, had the Jolo Trading company sell the pearl in Singapore, less ten per cent commission the company charged for selling. The fisherman is now one of the richest men in the Sulu archipelago.

RED SNOW FRIGHTENS LO.

Wonderful Phenomenon in the Rocky Mountains Appalls Savages.

Winnipeg, Man.—The Canadian Pacific railroad agent at Glacier, in the Rocky mountains, reports that crimson snow fell in that region of the lofty ranges. This is not the first time such an occurrence has been observed in the Rockies, but the manifestation is apparently early. No satisfactory explanation has been advanced as to its cause.

The snow covering the mountains with the pronounced red hue over their mantle of white has an extraordinarily weird effect. The Indians and half-breeds and others susceptible to superstitious forebodings are regarding the visitation of a portent of dire calamity and are applying themselves with unusual fervor to devotions.

Among the explanations put forward to account for the visitation is the theory that it is caused by red volcanic dust from the mountains, having been caught up by the high winds and held in suspension until brought down by the snow.

Another theory is that it is the dust of plants, while a third is to the effect that some peculiar manifestation in the chemistry of nature has caused the discoloration of the snow.

HORSE BECOMES POLICEMAN.

Returns to Livery Stable With Young Man Asleep in the Buggy.

St. Louis.—A seven-year-old gray horse belonging to the George C. Kern Livery company became a policeman, and after being stolen, arrested a suspect.

The horse attached to a buggy was standing in front of a theater, when some person having no right to do so jumped into the buggy and drove off. Kern notified the police of the theft. A description of the outfit was telephoned to the various districts and policemen in all parts of the city were on the lookout.

At four a. m. the horse, tired out, covered with perspiration, and dragging the mud bespattered buggy, pulled up at the front door of the livery barn. Hostlers ran out and took the horse in and were greatly surprised to discover a young man asleep in the buggy. The police were summoned and the young man was arrested. When questioned as to how he came to be in the buggy he declared he found it at Jefferson avenue and Pine street, and after driving up and down looking for an owner, had stopped at a corner to wait for a policeman, and had fallen asleep.

FINDS A \$30,000 PEARL

Poor Moro Fisherman Now One of the Richest Men in Archipelago.

Manila, P. I.—A single pearl worth \$20,000 has been taken from the Sulu sea by a poor Moro fisherman. So far as is known it is the biggest ever found there. It is as big as a common marble, of beautiful color and without a flaw. The Moro fished it out with the three-pronged deep sea rake of his forefathers and will not tell whereabouts he got it.

An old Moro law requires that all pearls of unusual size and beauty be given to the sultan. Under American rule that law was abolished, but the Moros so fear their powerful dattos that they continue to obey it. This fisherman gave up the pearl, but immediately reported all the facts to Colonel E. Z. Steever of the Fourth cavalry, the acting governor of the Sulu group. Governor Steever forced the sultan to disgorge, had the Jolo Trading company sell the pearl in Singapore, less ten per cent commission the company charged for selling. The fisherman is now one of the richest men in the Sulu archipelago.

ICELANDERS USE BOTTLE POST.

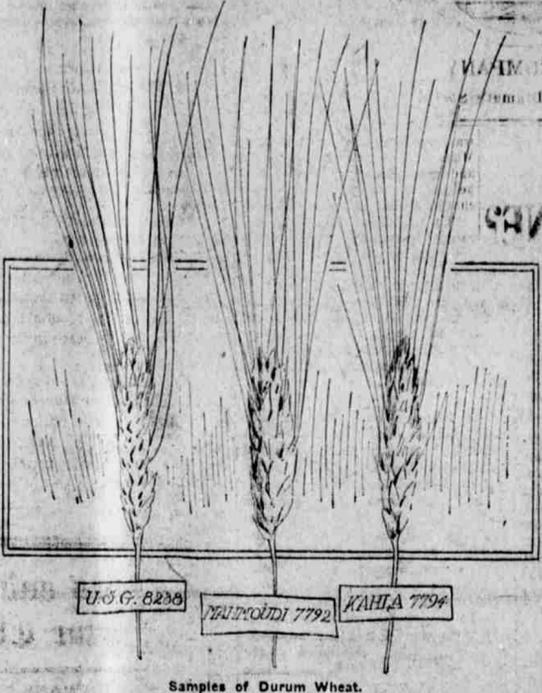

Adopt Unique Means of Communication With Norway.

Christiania, Norway.—On the northernmost coast a bottle has been washed ashore containing letters and a packet of tobacco. The letters, which were written in Icelandic, showed that this messenger from the sea came from the Vestmanna islands, which are situated off the northern coast of Iceland. The few inhabitants of these wild, inhospitable islands have no communication with the outside world except by "bottle post." Whenever they want to communicate with the Icelanders, their nearest neighbors, they place their letters in a bottle, adding some tobacco as a gift to the finder, who is expected to forward the letters to their destinations. The bottle is then carefully sealed and thrown into the sea, when a south wind is blowing, so that the current generally carries it to the Icelandic shores. The bottle in question, however, evidently got out of its course, and had taken fully 12 months to reach the Norwegian coast, a distance of over 1,000 miles, roughly speaking.

DURUM WHEAT FOR THE ARID LANDS OF WEST

Tests in Utah Which Prove That It is an Admirable Grain for Dry Farming.

Of the different varieties of wheats recommended for the arid region, possibly as far as yield is concerned and ever for other qualities as soon as they become better known, the most promising varieties belong to the Durum group (Triticum durum). These are the hardest grained wheats grown, and from their is furnished the greater portion of the world's supply of macaroni wheats. Most of these wheats have been imported from Russia, and hence are very hardy and drought-resistant. They are always headed and are usually grown as spring varieties. As a drought-resist-

Samples of Durum Wheat.

ant group of wheats, they are probably in the lead. As stated above, the Durum wheats are very hard, and for this reason are difficult to mill, and hence very unpopular with the millers. It is the general idea also that they produce a very poor grade of flour, but in Russia, where the art of milling has reached a high state of perfection, this is not considered so, especially when a small percentage of soft wheat is mixed with them. There is an increasing demand through the world for these hard wheats, and if the farmers only decide to grow them the millers will undoubtedly equip their mills with machinery for handling them or else go out of the business.

Since the Durum wheats are usually grown from spring seedling, it is doubtful whether they will ever become a very popular variety whose spring seedling is the most successful. There is a possibility, however, that these spring wheats can be made to grow as fall varieties. The Utah experiment station has undertaken to grow several of these varieties from fall seedling, and the trials are proving satisfactory. Only a few plants of the hardest varieties survived the first winter. Sufficient seed was saved from the surviving plants for the second year's trials, which gave better promise than the first trials. This year, as a result of five or six years' tests, two or three of the varieties yielded as high as 24 bushels per acre, and it looks as if a number of permanent varieties have been established. But according to a report on Durum wheat which recently appeared in the Vernal Express, a yield of 24 bushels will look small to some of the dry farmers of Utah, especially

California Dairyman's Novel Milk Outfit

The Pacific Dairy Review prints the picture which we reproduce. A California dairyman has hitched a Jersey heifer to a wagon on which is built a large case like a cream can. Imagine the effect of such an outfit driven through the average town. Dealers in "sterilized milk" could use some appropriate vehicle, such as a white bottle. Such things are often used with good effect by other dealers, but milkmen seem to be shy of such display.

The Veal Calf.—Calves should not be used for veal before they are four weeks old, and six weeks is better. For really good veal, the calf should have lived at least ten weeks. Many states have passed laws regulating the slaughter of calves for veal. Some have placed six weeks as the limit of age and others have made it as low as four. Below four weeks the flesh is very soft and sometimes stringy. Such meat is for some reason quite unpalatable, and it is in this season that the state departments have passed laws to regulate the matter.

Lantern Trolley.—Stretch a wire across the stable, near the ceiling, back of the stalls, to hang the lantern on and make a hook of heavy wire to hold the lantern. You can affix the lantern to any desired place, without fear of its being upset.

Corn Stored in Bags.—One farmer stores his corn in bags and hoists it to the top of his barn when it is thoroughly dry. It is suspended on hooks out of the way of the farm operations and beyond the reach of the mice and rats.

B & O TRAIN KILLS TWO

Men were Walking on Track on Their Way to Work When Struck

Loveland, O., Feb. 6.—Harry Switzer, aged 23, of Hills Station and Denton Brazila, aged 50, of Midland City, were killed at Lonsberry Station today by a B. & O. express train. The men were employed at a gravel pit and were walking up the railroad track on their way to work.

FINDS RICHES IN YARD

JEWELS AND MONEY LEFT BY MYSTERIOUS WOMAN.

Bank Book May Be a Clue—Diamonds and Pearls in Rings and Brooches Lay Untouched for Several Days.

Berkeley, Cal.—Diamonds, pearls, rubies and silver coin tucked away in a common wickerwork basket, containing also a lot of silverware and a woman's bank book, were recently found by Charles Wieman, a merchant of South Berkeley, in the front yard of his residence, at No. 3300 Adeline street. The jewels are estimated to be worth about \$1,500. The entire collection reposes, secure and perfectly safe, in the big vault of one of the Berkeley banks. The police are working on the mystery involved in the strange find, unable to gain a clue to show whether the valuables discovered by Wieman were thrown away by a demented person or by a flying thief, or by the owner. Wieman is as thoroughly mystified as are the police. He literally "gives it up," having relinquished the jewels and other articles found to the authorities.

Not the least extraordinary feature of the strange affair is the fact that the basket containing the diamonds and other jewelry lay in Wieman's front yard for several days before he took notice of the package.

Wieman supposed the basket contained trash thrown away by some person who chose to use the Wieman premises as a dumping ground. Finally Wieman picked up the basket, opened it, and his eyes bulged when he saw its contents.

Mary A. Downey's name appears in the bank book, which was issued by the German-American Savings bank, of San Francisco. The book shows that she has on deposit in that bank \$101. Whether Mary A. Downey is alive or has committed suicide; whether she threw away her jewels and money in a spasm of dementia or while fleeing from this region; whether thieves stole her belongings and in some way lost the loot, or whether the stuff was simply lost in Wieman's front yard are questions to be answered later, if answered at all. The police hope to get information that will lead to the solution of the weird problem involved in the affair. Thus far they are quite in the dark.

The collection of jewelry in the basket includes a pair of magnificent diamond earrings, a large ruby ring surrounded with a dozen pearls, an emerald ring, a plain ruby ring, a plain pearl ring, a primrose shaped ornament, with a diamond centerpiece, small pins, a tiny gold cross, a gold bracelet, two baby pictures, set in gold, with yellow ribbon attached, a purse containing several silver dollars, silver knives and forks, some handkerchiefs, and other articles of no particular value. A shawl strap held the basket.

A strange woman was seen previously in the vicinity of Wieman's home, acting in a suspicious manner. A child was with her. The woman is said to have run back and forth, while the child stumbled along. Neighbors commented on the circumstance, but did not notice whether this strange woman carried such a basket as the one found by Wieman.

Brazil's Big and Enterprising Capital. Rio de Janeiro, the capital of Brazil, has approximately a million inhabitants, and this figure is destined to increase rapidly, owing to the great improvements which have been inaugurated and pushed to conclusion during the last three years, says Appleton's Magazine. First in importance of these fundamental improvements is the light for the complete sanitation of the city, which is being brought to a successful close. The Havana system of prophylaxis, consisting in the extinction of the mosquito which transmits yellow fever, has been successfully applied, and the terrible scourge which at one time gave Rio de Janeiro the name of the "White Man's Death" is to-day practically banished from the capital city.

Cure Grip in Two Days

THE BABY WAS WELL

Although Buried for Twelve Hours Under Avalanche of Snow.

Denver, Feb. 6.—Charles Brunell and wife, and Jack Reynolds were killed in a snow slide at Kirwan, Wyoming, yesterday which nearly destroyed that little mining camp. A revised list of the dead in the Monarch mountain avalanche places the number at six. The four-year-old baby of Fred Mason was found alive wrapped in bed clothing and had been buried 12 hours under a section of roof.

GAS LEAK KILLS TWO

Mother and Babe in Room This Morning.

Youngstown, Feb. 6.—The dead bodies of Mary Spann and her four-months-old son were found this morning. It is believed she had put the child to bed and was undressing when she was overcome by escaping gas.

Health the Prize Most Sought For

You want to be strong and healthy. Everybody does. Women as well as men. There was a time when women prized themselves on looking pale and delicate. That day has past. Today robust health is the ideal. A well-rounded form, firm flesh and muscles, strength and elasticity of movement and a healthy glow to the complexion—these are what all are striving for and many are attaining their object by the use of Dr. A. W. Chase's Nerve Pills.

When the food which is taken into the body fails to supply the required amount of rich, life-sustaining blood, external assistance must be sought until the system is fully restored. Dr. A. W. Chase's Nerve Pills supply the very material which goes directly to the formation of blood—pure, health-giving blood. Weakness, irregularities, headache, dizzy spells, feelings of fatigue, disarrangement and despondency soon disappear before the splendid restorative influence of this great medicine. So cents a box, at all dealers, or Dr. A. W. Chase Medicine Co., Buffalo, N. Y. For sale in Marion, Ohio, by Flock's Drug Store.

MADAM DEAN'S FRENCH FEMALE PILLS

Sold in Marion by Dr. T. Maloney & Son

MOTT'S PENNYROYAL PILLS

Safe and reliable. They overcome the most obstinate cases of chronic constipation. No remedy equals MOTT'S PENNYROYAL PILLS. Sold by Druggists or Dr. Mott's Chemical Co., Cleveland, Ohio. For sale by Tschannen Bros.

ED PINAUD'S HAIR TONIC

The one sure, safe remedy for hair troubles. It makes the hair beautiful, heavy and lustrous. Use it every day and watch your hair improve.
