

SEVEN KILLED

By an Explosion of Gas in a Coal Mine.

AT PRICEBURG, PA.

All of the Victims Were Frantically Burned, the Clothing Being Burned Off Most of Them.

Scranton, Pa., June 19.—Seven men were killed outright and two others seriously injured in two explosions of mine gas in the Johnson No. 1 mine, at Priceburg, Tuesday. The first explosion, which occurred about 3 p. m., was caused by the carelessness of a doortender who, by leaving a door open, allowed gas to accumulate in the workings. One man was injured as a result of this explosion. The second explosion, which resulted in the death of seven men and the injury of another, occurred about 5 o'clock and resulted from the ignition of the deadly firedamp which accumulated after the first explosion.

Of the eight men who were working in the main gangway at the time of the second explosion, seven were killed instantly.

A runner who was near the foot of the shaft when the second explosion occurred frantically gave the alarm and a rescue party hurried to the scene of the explosion.

All the victims were frantically burned, the clothing being burned off most of them. News of the explosion spread rapidly through the village of Priceburg, a mining hamlet just north of Scranton, and hundreds of wives, children and other relatives of those who are employed in the mine hurried to the breaker. So badly disfigured were the remains of those who were killed, that identification at the time was impossible and the wildest excitement prevailed.

HUMORS IN THE BLOOD

Coming of Warm Weather Forces Them Out, Causing Itching, Burning Skin Eruptions.

The blood and skin are so closely connected that whatever affects the one has a corresponding effect on the other. When the blood is pure and healthy the skin will be soft, smooth, and free from all eruptions; but when the blood becomes infected with some unhealthy humor the effect is shown by rashes, eruptions, boils and pimples, or other disfiguring and annoying skin disease.

The skin is provided with countless pores and glands which act as a drainage system to rid the body of impurities through the perspiration that is constantly passing through these little tubes. There are other glands that pour out on the skin an oily substance to keep it soft and pliable, otherwise it would become hard and dry from constant exposure to wind and sun. When the blood becomes filled with humors and acids these are thrown off through the pores and glands, burning and irritating the skin and drying up the natural oils so that we have not only Acne, Eczema, Salt Rheum, etc., but such dry scaly skin eruptions as Tetter, Psoriasis and kindred troubles.

These humors find their way into the blood through a disordered or deranged condition of the system. There is a certain amount of waste or refuse matter collected in the body every day. This is useless in nourishing or keeping the system in health, and nature intends that it shall find an outlet through the channels of bodily waste. As long as these members perform their duties properly the blood remains pure and free from infection; but when from any cause they become dull and sluggish, this refuse matter is left to sour and be taken into the blood in the form of humors and poisons. The skin is a perfect index to the blood; when we see one afflicted with a skin disease, or pimples, rashes, eruptions, blotches, etc., constantly appearing, we know that down deep in the blood a humor has taken root, and instead of supplying nourishment and strength to the fine, delicate tissues of the skin, it is pouring out its acid and unhealthy accumulations.

The skin is not only affected by the humors generated within the system, but poisons from without, such as Poison Oak and Ivy, Nettle Rash, etc., as well as poisons from metals, acids, etc., enter through the open pores and glands, and so thoroughly do they take root in the blood that they are ever present, or return from year to year to annoy the sufferer. The treatment of skin diseases with salves, washes, lotions, etc., is along the wrong line. True such treatment relieves some of the itching and discomfort, and aids in keeping the skin clean, but it does not reach the real cause of the trouble, and at best such things are only palliative and soothing.

A thorough cleansing of the blood is the only cure for humors in the blood. S. S. S., a gentle acting, safe blood purifier, made entirely of vegetable ingredients from nature's forests and fields, is the proper treatment. S. S. S. goes down into the circulation and neutralizes the acids and humors, thoroughly cleansing and purifying the blood, and curing skin diseases and affections of every kind. It supplies to the body the fresh, nutritive qualities necessary to sustain the skin and all other parts of the body, and rids the blood of any and all poisons. S. S. S. cures Eczema, Tetter, Acne, Psoriasis, Salt Rheum, Poison Oak and Ivy, Nettle Rash and all troubles of the skin.
