FIERCE FIGHTING

Moors Make Determined Attack on French Fortifications.

Tangier, Sept. 12.—Late advices from Casablanca declare the fiercest fighting preceded the capture and burning of the Taddert camp. The Moors made frequent attempts to capture the French artillery, charging repeatedly in the face of a terrible fire that mowed them down in scores. The superiority of the French arms told in the Moors' ultimate defeat.

Paris, Sept. 12.—An official message from General Druce, commanding the French forces in Morocco, states that he has captured and burned the Taddert camp. Heavy losses were inflicted on the Moors in the fighting while the French lost one killed and six wounded.

LITTLE GIRL IS WASHED INTO SEWER

Cincinnati, O., Sept. 12.—At Hamilton, near here, yesterday, a cloudburst flooded the streets for many squares, causing considerable damage, and the hydraulic in the rear of the place threatens to overflow its banks to the consternation of the residents.

Many persons, including several school children, report that they saw a girl apparently about seven years of age washed bodily into a big sewer at Main and Mulvillains.

No reports of a child missing have so far been made by policemen who are inquiring all over the city and also looking for the body. The river is still rising fast with general rains throughout the county and much damage is feared.

PHIL. SHERIDAN WANTS TO BE PUT TO WORK

Washington, Sept. 12.—Lieut. Phil Sheridan was relieved from duty as military aid to President Roosevelt at his own request, according to the statement made by the war department officials today.

He has been for the past two years on duty at the White House and he was moved by an ambition to take up the soldiers' duties.

The successors of Lieuts. Lee and Sheridan have not yet been named, but it is understood that new men will take their places as soon as the Washington social season opens and the president is again located in this city.

BRIDE IS SWEEPED FROM YACHT AND DROWNS

Philadelphia, Sept. 12.—Mrs. Marguerite Croft, bride of a few weeks of John Croft of 124 Casino st., New York, was swept overboard from a yacht in the Delaware river here last night and drowned.

Mrs. Croft and her husband, who were on their honeymoon, were guests of C. F. M. Bennett of this city on the sloop yacht M. R. E. E. The yacht had reached the lower end of the city opposite the Greenwich coal piers when a heavy storm broke and the halyards were torn loose by a gust of wind.

The boat jibed and the boom swung around and struck Mrs. Croft, knocking her over the rail into the water.

Mr. Croft plunged into the stream after her and Bennett launched a small boat, but the efforts to save the young bride were futile.

Croft was exhausted by his frantic efforts to save his wife and was rescued only with the assistance of the men on a passing schooner.

DELAWARE COUNTY SWEEPED BY STORM

Delaware, Sept. 12.—A miniature tornado swept over a portion of the southwestern part of the county yesterday afternoon and almost devastated a small strip of territory in the vicinity of Ostrander. The top was taken off the covered bridge, which spans Big Mill creek, several barns were unroofed and a number of orchards were laid low.

ELECTRICIAN SURVIVES A 2,300 VOLT CURRENT

Piqua, O., Sept. 12.—Lou Reed, an electric line lineman, lived through his third narrow escape from death today, when he hung suspended in the air for several minutes across a live wire with 2,300 volts of electricity coursing

through his body. A companion knocked him loose and saved his life, and although unconscious he quickly recovered and walked home. A year ago Reed fell from a high building and was picked up apparently dead. Last May he suffered a 1,000 volt shock.

NO WARNING GIVEN BY THE ENGINEER

Barberton, O., Sept. 12.—Coroner Davidson will begin an inquest into the death of Harry J. Davis, three year old son of Thomas Davis, killed by an Erie express train at McNamara's spring.

Witnesses say the express train did not blow a whistle nor ring a bell, nor did the engineer stop the train after having struck the boy. The child was killed before his mother's eyes, as she tried to pull him from the track.

CHARDON WOMAN COMMITS SUICIDE

Chardon, O., Sept. 12.—With the throat slashed from ear to ear, the body of Mrs. Allie Edwin, forty-five years old, wife of Henry Edwin, of Troy, O., was found late last night in the hay loft of the Erwin barn.

She had gone to the barn late in the evening. A razor was clutched in one hand when the body was found. She had been ill, and Coroner Ellis speedily reached a verdict of self-destruction.

SHIP WAS LOST: EXPLORERS ARE SAFE

New York, Sept. 12.—The question of the safety of the Mikelsen and Stefanson expedition to the Arctic zone has been settled beyond all doubt by a message received today by the American Geographical society from the joint commanders.

It was sent from Dawson, Yukon territory. The message announced the loss of the expedition's ship, the Duchess of Bedford, but says the members are safe and will continue their work of exploring Bafford sea, surveying the coast and making ethnographical studies.

THEATRE TRUST HAS OVERCOME OBSTACLES

Chicago, Sept. 12.—Levy Mayer, general counsel for Klaw & Erlanger, today confirmed reports from New York that all legal obstacles have been cleared away for the launching of the proposed international theatrical trust. This was accomplished on his recent trip to Europe.

It is stated the purpose of the trust is not to control vaudeville houses, as has been stated, but higher attractions, even including grand opera. The company is said to be prepared to spend from \$100,000,000 to \$300,000,000 if it can obtain complete control.

Get Income from Flowers.

For hills of the valley a vicar in Carmarthen draws £3,500 from a London dealer, while an old lady in Berkshire is said to make nearly \$5,000 yearly out of Marcehal Niel roses.

PROFESSOR PERCIVAL LOWELL. Professor Percival Lowell of Boston is the world's chief authority as to the planet Mars. Professor Lowell has made a study of the planet for many years and has discovered things of startling interest. He says that the canals on Mars discovered thirty years ago by Schiaparelli constitute a vast irrigation system. He believes the planet is inhabited by highly intelligent beings. Professor Lowell established the famous Lowell observatory in 1894 and has made many marvelous photographs of his favorite planet.

RAT DOES TRAPEZE ACT.

Waika Telegraph Wire, Beest by Sparrows Until the End.

A gray rat walking along an electric wire 30 feet above the ground for many blocks furnished a novelty on West Baltimore street. The feat, which exceeds that of any trick rat ever exhibited in a show, would seem a dream of the imagination but for the fact that the spectacle is absolutely vouched for by thousands of persons who watched the strange sight from six o'clock until eight.

Beest by a number of English sparrows, which seemed to take a fiendish delight in attacking the badly handicapped rodent, he at times varied his steady gait along the wire by acrobatic performances calculated to ward off the attacks of the birds. He would sit up on his haunches on the slender wire, no larger than a lead pencil, and reconnoiter before continuing his hapless journey from pole to pole. After a most gallant fight for life, which deserved a better recognition under the rules of fair play, the unfortunate animal was finally knocked from the wire at Carrollton avenue and Baltimore street and dispatched by a dog. Just how the rat got on the wire in the first place has not been satisfactorily explained, but it is thought that a dog chased him somewhere—some persons say as far east as the neighborhood of Howard and Baltimore streets—and forced him to run up a pole.—Baltimore Dispatch to Washington Post.

WHEN A "HUNCH" HELD GOOD.

Chinese Laundry Ticket Suggested a Bet on "Wing Ting."

Kay Spence, a well-known horseman of Mexico, Mo., won \$1,000 at the Louisville, Ky., race meeting a short time ago as the result of a "hunch." Mr. Spence has a large breeding stable of "runners" near Mexico, and attends all the big racing events in the country. Not long since he was in Louisville and entered the betting ring to see what odds were being offered on the various entries.

He found that Joaquin was the favorite at even money, and pulled his wallet from his pocket, intending to bet on that horse. His attention was attracted by something that fell from his wallet to the ground, and he stooped and picked it up. It was a Chinese laundry ticket. He looked at the "books" again and found that there was an entry with a Chinese name, Wing Ting, at ten to one. That settled it, for he considered he had received a "hunch" that could not be overlooked. Wing Ting won handsily. Needless to say, those who backed the favorite considered Spence the seventh son of the seventh son.—Kansas City Star.

The Blessedness of Giving.

The tremendous benefactions of Carnegie and Rockefeller are having the effect, we are told, of giving the small-fry philanthropists cold feet and scaring them out of the game, until it comes to pass that the man who will only the begrudgingly \$100,000 or so, to bestow, evinces a decided disposition to buy fun less expensive, if likewise less intense with his money. This goes to suggest that philanthropists are but flesh and blood, after all, and banker not to enter in a race where they are to be not only beaten but distanced at the post. The widow's mite is unexceptionable, of course, and it seems a pity that nobody hears the widow's name thundering down the ages.—Puck.

LEGAL NOTICE

Sealed bids will be received by the Board of Public Service of the City of Marion, State of Ohio, at the office of said Board until twelve o'clock (noon), Tuesday, Sept. 17, 1907, for furnishing the necessary labor and material for paving Mary street from Silver to St. Joseph street, with hard burned brick or block.

MOVING AND TRANSFER.

THE PADDOCK TRANSFER STORAGE CO. Transfer Storage and Crating.

Compass Points and Health.

A quaint theory is that of a French mystic, who holds that the four points of the compass have an influence on human health and well-being. Traveling west, asserts this authority, induces melancholy; traveling eastward brings a cheerfulness; southward, languor and irritability; and northward, calmness. It is a question of electrical currents, and the influence is felt not only when traveling, but also when at home. The best posture for working is to face either north or east. In these positions you receive positive waves of electricity, the negative currents coming from the other two points, south and west. Even the sleep is improved, it seems. If the foot of the bed be turned to the north or east, to sleep in the contrary position induces nightmare and general uneasiness.

A remarkable case of suicide by the 14-year-old daughter of a farm laborer named Bechman was revealed at an inquest at Weston-super-Mare, England, recently. It was stated that the girl was of an obstinate and determined character and guilty of persistent falsehoods. She was entranced with a dress to take to the village dressmaker for remaking for herself, but returned with the statement that it was too good to cut up. Unknown to her parents she sold the dress to a villager for four shillings, and on this being discovered she walked to a level crossing, put her head across the rails, and was decapitated by a passing train.

4. Another 8 rooms. Every room nicely papered, painted inside and out. Barn. 2 1-2 squares from City Hall only one price \$2500.00.

CHASE REAL ESTATE CO. PERSPIRATION ON THE FARM. An Up-to-Date Agriculturist Delivers Himself of a Few Facts.

"Yes, it is hot," said the farmer, lighting an Egyptian cigarette. He was a farmer of the new type, a scientific farmer, graduated with high honors from a college of agriculture. "Yes, it is hot. My grains and vegetables must be perspiring tons today." "But grains and vegetables don't perspire." "The farmer's gold front tooth flashed, as he smiled, like a little sun. "Don't they?" he said. "They do, though. Look at that sunflower there. It is only four feet high, yet on a hot day it perspires two pounds of perspiration." He waved his silver-headed stick over his fertile fields. "All that stuff perspires," he said. "beans, peas and corn perspire, during the five warm months, 200 times their own weight. Our perspiration is nothing to that, is it? Imagine me, for instance, a man of 160 pounds, perspiring 32,000 pounds every summer. "The perspiration of the cabbage is the most profuse of all. Do you know that an acre of cabbage gives off daily in the summer over ten tons of perspiration?"—Buffalo Express.
