NEW ORDER INTO EFFECT

Trainmen Now Change at Galion.

LOCAL YARD CHANGES

Will Not Be Started Until Next Year.

Eight Hour Law for Telegraph Will Require 1800 Additional Men.

The new order which was recently issued by the Erie to the effect that passenger engines should be changed at Galion instead of this city, went into effect yesterday afternoon and hereafter engineers running on trains No. 11, 16, 9, 10 will end their runs at Galion. The change will not in any way effect local railroad circles and trains No. 3 and 7 will continue to change here.

The eight hour law for railroad telegraphers will go into effect on March 1, 1908, and it is conservatively estimated that it will require at least 1800 new men to provide for the extra amount of labor which will result.

The American Railway Association held an important session at Atlantic City yesterday for the purpose of taking measures to avert the repetition of the western car famine of last winter. Representatives of nearly all the trunk lines were in attendance. Conferees admit that an alarming shortage of rolling stock confronts the railroads but they refuse to state whether there was any definite line of action taken. The problem is a serious one and another conference will be held a little later.

M. S. Conners, general superintendent, and William Michaels, chief engineer of maintenance of way of the Hocking Valley, with headquarters at Columbus were looking after business in local railroad circles for a short time this morning.

The Erie will not begin any of the many planned improvements in the local yards this year but will commence construction work early next spring. At that time the depot will be enlarged and an addition built to the round house.

A special passenger train running as second No. 3 passed through the city this afternoon at 3 o'clock over the Erie. The train consisted of seven coaches occupied by laborers who were enroute for Chicago, where they will be employed on the Erie improvement work.

The hours of many of the operators will be shortened from 9 to 7 hours and where this is done the cash increase will not exceed 30 per cent, and the minimum increase will be 15 per cent. The experienced operators who are not given the advantage of shorter hours will receive an increase of as much as 40 per cent.

The six operators employed on the country board will be especially benefited. These operators will receive an increase of 30 per cent, and besides will have their working time shortened from 9 to 7 hours. Manager Odaffer stated today that in arranging the increase the directors will especially reward the old operators for their long and faithful service.

SWEDISH ARMORED CRUISER FYLGIA.

A fine armored cruiser of the Swedish navy has been visiting several American ports, and the fact that Prince Wilhelm, son of the crown prince of Sweden, accompanied the vessel has added to the interest. The Fylgia, on which the prince serves as a lieutenant, is a modern vessel of war. Her length is 377 feet, width 40 feet and draft 16 feet. She has a displacement of 4,000 tons, and her armament comprises eight 5.9 inch and fourteen six-inch guns and two submerged torpedo tubes. The Fylgia was sent over in response to an invitation from the Jamestown exposition. Prince Wilhelm came also on a similar errand. The vessel stopped first in Hampton Roads, where various entertainments at the exposition were accorded the prince. Then the Swedish visitor proceeded to New York and Newport, where both royal ship and royal scion received much attention. The Fylgia carries a crew of 450 men.
