BY IMPURITIES IN THE BLOOD

If Old Sores were due to outside influences, or if the cause was confined strictly to the diseased flesh around the wicer, then external treatment and simple cleanliness would cure them. But the trouble is in the blood, which has become unhealthy and diseased, and keeps the sore open by continually discharging into it the impurities and poisons with which the circulation is filled. This poisonous condition of the blood may be the remains of some constitutional trouble; the effect of a long spell of sickness, or because the asteral refuse of the body, which should pass off through the proper avenues, has been left in the system and absorbed into the blood. Again, the cause may be hereditary; but it does not matter how the poison becomes intrenched may be hereditary; but it does not matter how the poison becomes intrenched in the blood, the fact that the sore will not heal is evidence of a deep underlying cause. Salves, washes, lotions, etc., may cause the place to scab over temporarily, but the blood is not made any

PURELY VEGETABLE

purer by such treatment, and soon the old inflammation and discharge will return and the sore be as bad or worse than before. S. S. S. goes down to the very bottom of the trouble, cleanses and purifies the blood, and makes a permanent cure. S. S. S. enriches and freshens the circulation so that instead of

CHILE'S AMERICANIZATION. Appliances from This Country Every where in Evidence

Chile is described by J. Gilbert Van a Pullman car built in the United States; the modern railway was engineered and constructed by Americans; the apphalt road over which he rides to his hotel was laid by an American; an American elevator takes him upstairs; his telegrams are sent over an American wire by an American cash register itemizes his bills; American manister it chines print its morning paper, and American furniture is found everywhere. A veritable fury of progress and industrial development seems to have selzed upon the Chileans, bankers estimating that within the last three years about \$360,000,000 have been invested in new industrial under takings. This sum is being expended A Bad Back is Always Worse in the in working new nitrate fields; in re suming copper mining, in developing gold, silver, tin and coal deposits; ir building raffways, steamships, canaly for irrigation, cold storage plants, saw mills, etc.; in stocking sheep farms and in inaugurating a great number of smaller outerarises.

All calculations of wheat tradeers were upset during the last half of ' the week by the cable news from Argentina. For weeks the advises have told of the enormous crop about to be harvested in that country and now right in the middle of their harvest, with the crop in some of the largest provinces about two weeks away from the sickle, very unsettled and stormy conditions have spread over nearly the entire wheat raising portion of that country. Friday, cables direct from Buenos Ayres claims 26 per cent, injury to the crop in two large provinces where six million acres of wheat are raised. This news forced and advanced in all the foreign market for several days. Prices on This side naturally followed and May wheat at its high point today at \$1.07 5-8 was up 6c for the week. There was reaction 1 1-4c at the close due to profit taking by holders who had been right on the advance. Dispatches from Montreal claim that Canadian wheat has already been over exported. Northwest receipts of spring wheat are falling

off even in the face of fine weather, plenty of cars at high prices. This appears to confirm the claim that a much smaller proportion of the crop remains in first hands than usual at this time of year. The St. Louis Modern Miller reports Russian fly in Oklahoma wheat fields based on investigations of state experimental station. As matters stand at the close of the week no man living can tell whether May wheat will be at \$1.10 or at \$1.04 by next Tuesday. Monday cables show continuation of bad weather for Argentina, nothing can prevent further strong advance. If conditions there greatly improve it will be hard to prevent a sharp break. The situation surely suggests that best results can probably be secured by having discrecommission man who is on the commission man who is on the ground and ready to take advantage of the news the moment it is received. There is an enormous holding of wheat by strong people who will not let the narket run into holiday duliness and opportunities ar seldom better than at this writting for geting quick and almost certain profits out of the market by
