VOLUME XIX—NUMBER 300.

MARION, OHIO, WEDNESDAY, JULY 5, 1911.

PRICE TWO CENTS

ACONGRESSMAN SHEDS TEARS

A la Crocodile Over the Woes of American Peers—ses Who Were

SNUBBED BY ROYALTY

Whitelaw Reed, John Hays Hammond and Charlemagne.

All Given a Rap for Their Rush and Hurry in Attending Coronation Festivities.

Reference Made to Vulgar Wealth, Peacock Feathers and Lavishness of Dress—Glad that no Facilities Resulted.

By United Press Wire. Washington, July 5.—"Crocodile tears for the American peers who were snubbed at the coronation were shed in the house today, to the accompaniment of mocking words for the "snobbish American diplomatic set," abroad, by Representative Henry, Democrat, Texas.

The Texan spoke of "International Marriages and the Glitter of Modern American Diplomacy" amid applause from an appreciative Democratic side he roundly denounced American diplomacy, sarcastically confided with American girls who carried titles abroad for social reasons and partly referred by unmistakable intimation to Whitelaw Reed, United States ambassador to Great Britain; John Hays Hammond, special ambassador to the coronation at London; Charlemagne Tower, former ambassador to Berlin, and others.

"We may congratulate ourselves," Henry remarked, "that notwithstanding that very recently two proud and over-ambitious ambassadors entered the ancient capital of England, amid a veritable riot of vulgar display and extravagance of wealth, rushing headlong to the feet of royalty, no serious casualties occurred.

"We should felicitate ourselves, because in other days in the terrible struggle for precedence between ambassadors on great occasions of public splendor, armed conflicts frequently occurred. At least, as Americans, we should be content that no fatalities resulted to our representatives in the wild scramble for kingly favors.

"Permit me to congratulate our ambassadors at the recent historic occasions in London that no serious bodily harm resulted to either in their ambitious desire to touch the throne and to lament the fact that perhaps some permanent wound was left by reason of some other representative out-vieing them in gorgeous and over-lavish display in vulgar wealth, Jew-like peacock feathers and personal payment so essential to such an occasion.

"And here we must admit that such over-zealous glamor and show indicates a dangerous aspect of the new dollar diplomacy. Can any patriotic American who contemplated the rising tide of lavish and almost obscene extravagance, with its source springing from the pockets of the over-rich, fall in the perception that it is rapidly undermining the foundations of every cottage in the republic?

"The most serious and corrupting aspect of the times is the tendency of our great millionaires, still professing admiration for our republican institutions to shine in splendor as great noblemen in foreign courts.

"In their endeavor to pave the way for such special status, the world has been profoundly amused at the expense of this nation by the so-called system of international marriages of the times, secured by the purchase in return for high sounding titles, accidentally held by thin-blooded noblemen."

Henry read a press dispatch giving the names of the American women who have married foreign noblemen, occupied places at the coronation, and also who having titles, were excluded.

NEGRO KILLED POLICE CHIEF

And Fatally Wounded City Marshall at Rockford, Colorado—Will be Lynched if Caught.

By United Press Wire. Rockford, Col., July 5.—Sent on lynching, a mob today is bent on lynching a negro, who last night killed chief of Police A. B. Craie and mortally wounded Night Marshal Jacob Kipper. The chief had received numerous complaints against Harris and, accompanied by Kipper, went to the negro's house to arrest him. Harris

THE SUFFERING IS LESSENERD

But Back Bone of Hot Wave Only Sprained, not Broken.

By United Press Wire.

New York, July 5.—"Sprained but not broken," was the diagnosis today on the torrid wave that has smitten New York since Sunday.

The mercury dropped only a few degrees from yesterday's markings, but the humidity was much less and a timid breeze crept out of somewhere and lessened the sufferings.

Thirty-two victims succumbed yesterday, bringing the death toll for the first three days of the sweats to sixty-four. In addition, there were nearly 300 prostrations yesterday and scores today.

Added to all this, there were twenty drownings. More than 100 persons also suffered injuries while attempting to escape from the heat.

At 9 o'clock today the official temperature was given as eighty, three degrees under yesterday's. On the streets, the thermometers registered from ten to fifteen degrees higher.

HURTS THE DISCUS

Kansas City, Mo., July 5.—Lee Talbot, star of the Kansas City Athletic club today holds the world's record for the discus throw. In a local field meet yesterday he hurled the weight 147 feet and two inches, which is one-half inch better than the new mark made yesterday by Martin Sheridan.

JACK JEFFRIES INJURED

Bakersfield, Calif., July 5.—Jack Jeffries, brother of the former heavy-weight champion, is in a serious condition today as a result of an automobile accident yesterday. His light racing machine turned turtle while he was driving with a mechanic. He was crushed about the legs.

OLD GUARD MANAGES TAFT

Standpatters Led by Fairbanks Promise Him Indiana in 1912.

By United Press Wire. Indianapolis, Ind., July 5.—President Taft has the support of the old guard of Indiana pledged to him today. Winding up a strenuous day with a speech in support of the reelection agreement, the president then saw some 400 Republican banqueters roused to an enthusiastic point by a short talk delivered by former Vice President Fairbanks, pledging him Hoosier state's support.

Taft was tired but smiling when he boarded his train last night. The day was the hottest in years as the mercury registered a maximum temperature of 103.2.

The visit of yesterday and Monday was the first Taft has made to Indiana since he was elected president. The Reverend wing of the party took no part in the president's entertainment.

A LOVERS' QUARREL

Benton Harbor, Mich., July 5.—Henry Dehmer, twenty-one, of Chicago, is dying today in Mercy hospital from a self-inflicted bullet wound while his sweetheart, Mary Peterson, also of Chicago, whom he attempted to kill yesterday but who was saved by the stay of her corset, which deflected the bullet, is only suffering from a slight flesh wound.

The couple were sitting on the lawn in front of the hotel on Paw Paw lake when they quarreled and Dehmer drew a revolver, firing first upon Miss Peterson and then on himself. Physicians say he cannot recover.

ON RETURN TRIP

Dover, Eng., July 5.—All the aviators who started from Hendon today on the return trip across the English channel in the international aviation circuit race, have arrived here except Kimmerring, Valentine and Renaux. The first two were forced to descend because of engine trouble, while Renaux has not been heard from.

THREE DEAD

La Grange, Ill., July 5.—Mrs. Emma Gorde, who, with her husband, Henry C. Gorde, was injured yesterday when their automobile was run down by a Chicago, Burlington and Quincy train at Brookfield, when their two children were killed, died here today. Gorde, himself, is in a critical condition and is not expected to live through the day.

Washington, July 5.—Loyal Washingtonians were shocked when they learned that "Irreverent" sports had married the "safe and sane" fourth by a pugilistic battle between two local lightweights.

ROYAL COACH WITH KING AND QUEEN ABOUT TO ENTER BUCKINGHAM PALACE GATES AFTER THE CORONATION

London, July 4.—The return of King George V and Queen Mary through the streets of London to Buckingham palace after the coronation ceremonies was marked by fully as much pomp as attended the triumphal procession to Westminster abbey. Multitudes lined the sidewalks and cried "God save the king" as the royal coach approached. The photo here displayed shows the royal equipage containing the British ruler and his queen about to enter the gateway of the palace on the return drive. In the background appears the Victoria memorial.

A WORLD WIDE COMBINATION

Judge Gary Seeks to Found a Gentleman's Agreement Among Operators.

AN IRON AND STEEL TRUST

A Two Days Conference Opened Today at Brussels Which Seeks Far-reaching Results.

The Object is to Prevent Ruinous Competition and Price Cutting.

Also Control of Production and World Wide Regulation of Prices—Would Such a Combine be Under Ban of the Law?

By United Press Wire. Brussels, July 5.—A conference of leading representatives of the steel industry of the world, having for its object a "gentleman's working agreement," and presided over by E. H. Gary, chairman of the board of directors of the United States Steel corporation, began a two days' session here today.

The main purpose of the conference is the formation of an international iron and steel institute aiming at an ultimate control of prices and operations, a world-wide steel and iron trust, along the lines of the American Iron & Steel Institute, eliminating all competition.

The proposition for this gigantic combination was made at the conference today by Judge Gary. The object, he declared, was to prevent the destructive fluctuation of steel prices and maintain a business equilibrium in the world's steel industry.

"Ruinous competition and price cutting" between the big steel and iron interests in the different countries, control of production and world-

FATEFUL DAY TOMORROW

Judge Kinkead will pass on Motion for a new Trial for Diegle.

GRAIN PIT AGITATED

Corn Made a Big Jump going up 4 1/4 Cents—Wheat and Oats Also Rising.

By United Press Wire. Chicago, July 5.—There were scenes of wild activity in the grain pit today, the fierce heat and drought giving the bills their cue. Corn was believed to have been the greatest sufferer. At the very opening, July corn was up 4 1/4 cents and September corn up 3 cents. At 10 o'clock, July corn was off slightly, 3 3/4 above Saturday's close, while September was 1-2 higher than the opening. Wheat opened up from 58 to 1 1/2. Oats were up 1 3/8 to 2 1/8 at 10 a. m.

Only One Death

New York, July 5.—New York's "safe and sane" fourth of July has come to stay. There was yesterday one death in Greater New York yesterday directly attributable to fireworks and such forms of celebration. One lad was shot and killed but the police believe today this was a case of murder.

Compared with 1909, the last "un-safe" and "unsafe" fourth, the record is as follows:

1909—Three deaths, 321 injured, four fatally injured, forty injured by stray bullets and gunshot wounds, 111 fires.

1911—One death, 85 injured, none fatally injured, 20 injured by stray bullets and gunshot wounds, 23 fires.

The Pennsylvania Railroad company is one of the largest holders of real estate in the city of New York.

FATEFUL DAY TOMORROW

Judge Kinkead will pass on Motion for a new Trial for Diegle.

LIKELY TO BE REFUSED

Then Sentence Will be Passed and His Guilt Measured by the Court.

Reasons Why a New Trial Should be Granted Have Been Presented.

Certain Specified Cases of Misconduct on the Part of the Judge, Attorney and a Jurymen Alleged, But They May Fail.

By United Press Wire. Columbus, O., July 5.—Rodney J. Diegle, senate sergeant-at-arms, who was convicted Monday of aiding Senator I. R. Andrews to secure a \$200 bribe from Detective Frank Harrison Smiley, today filed a motion for a new trial.

Judge Kinkead will not pass on the motion until tomorrow.

If the motion is overruled, Diegle will be sentenced and his attorneys will ask for a stay of execution of sentence pending the circuit court's decision on the case.

Error is charged on account of alleged irregularity in abuse of discretion by Judge Kinkead by which the defendant was prevented from having a fair trial; that the jury organized in one room and then deliberated in two other rooms.

That the jury was kept confined for thirty-six and one-half hours while the heat was oppressive, and that Judge Kinkead twice ordered them to deliberate further when Foreman John A. Waleatt had announced on each oc-

HEAT SPELL UNPARALLELED

Atmospheric History Contains no Record Equal to the Present.

MIDDLE WEST SUFFERS MOST

Sixth Day of Withering Intensity Promises to be the Hottest one at Chicago.

More Than 120 Deaths in That City are Attributed to the Weather.

Seven Hundred and Fifty Thousand People Sought Sleep in Parks—Hot Also at St. Louis—Drought Cutting Down Potato Crop.

"SAFE AND SANE" A GREAT GAIN

Remarkable Decrease in Fatalities and Injuries.

Country Generally Felicitated Over the Results of the Better Way to Celebrate.

By United Press Wire. Chicago, July 5.—Figures compiled today show that the "safe and sane" movement brought forth best results in the smallest number of casualties ever recorded in American history.

Only twenty-four persons were killed and 381 injured, compared with 121 dead and 2,729 injured in 1910 and 46 dead and 3,988 injured in 1909.

In nearly every town and city where the use of explosives by citizens, privately, was forbidden, there were no accidents reported. In other cities, where there was permitted a discharge of fireworks and firearms under certain limitations, there was a decided falling off in the number of dead and injured.

President Taft's appeal for a "safe and sane fourth" was an added official endorsement which lent strength to the appeals of the campaigners for a national observance of the nation's birthday.

And the "safety and sane" of the day did not lessen the enjoyment. In nearly every community, there were parades, meetings, band concerts, displays of fireworks under municipal control; and other features which gave patriots all the chance they wanted to celebrate the day.

Chicago, Ill., headed the list of the "unsafe" cities with three dead, while New York was second with two dead. Nineteen other cities reported one dead each. San Francisco and Washington, alone of the cities where the sale of fireworks absolutely was prohibited, reported any injuries, two persons being hurt in each of those cities.

More than 120 deaths have been officially charged to the heat, while physicians declare the infant mortality, directly attributable to the heat, has gone up to staggering figures.

The nights have been nearly as hot as the days, so that sleep has been impossible. At 3 o'clock this morning usually the coolest part of the day, the mercury officially registered ninety degrees.

According to the weather bureau, atmospheric history does not contain a record of so severe a heat spell as that which is sweeping the Middle West. The condition has existed since June 13 and although there have been a few cool days since then in the main the weather has been abnormally hot.

It is estimated that 750,000 persons slept—or sought sleep—in Chicago's vast parks last night.

Government gauged thermometers on the street level during yesterday ranged from 104 to 107.

At the weather bureau, today the official forecast was for continued warm today and tomorrow.

St. Louis, Mo., July 5.—For the third successive day, the temperature at 9 o'clock this morning was ninety degrees.

The excessive heat and prolonged drought has reduced the estimated potato crop fifty per cent. in southern Illinois, Missouri, and Kansas and other crops are threatened.

Boy Drowned

Columbus, O., July 5.—Mystery surrounds the identity of a boy supposed to have been drowned in the Olentangy river near the Big Four railroad bridge early last evening.

The police received a telephone message reporting the drowning of a boy said to have been about 16 years of age. When the police reached the scene, no one could be found who knew anything definite about the affair. A negro bathing in the river had suddenly left the spot after declaring he had touched the body when he dived into the river. The boy's clothes were found on the river bank. Police dragged the river until 11 o'clock Tuesday night and resumed their work early this morning.

Mrs. Rose Terry of Klamath, Ore., is said to be the only woman in the country in active management of an electric lighting plant.
