

Temperance Department

EDITED BY J. W. BROWN.
Published for the Temperance Department of the American Society for the Reformation of Mankind.

LINES

Written on seeing a young lady in an intimate friend, partner of the sporting wine.
Dash from the lips that sparkling glass
As thou wouldst quaff the sparkling wine;

What has a Lady to do with Temperance?

Much. The gentle elements of her nature have fitted her for command; and God has made the empire of her heart boundless. Love is the bond of sympathy with all intelligent creatures.

Intemperance afflicts man; it blazes woman. It lays the withering stroke on her heart, and her beauty consumes like a moth, while her joy goes down to the tomb.

In the domestic circle is cast the character of man; it gives expression to nations. If purity and peace are not found there, society will be filled with discontent and contention.

The Liquor Question.

The liquor question will not keep down. It is one of the most vital issues of the day. In all great political, philanthropic, economic and social questions, it is a controlling factor.

Whether it is wise for every state to imitate the example of Maine, may be an open question, but there is no question that the sooner such a public sentiment against this great source of crime and misery is secured, the better for every state.

A body given up for dead was reconstituted at the morgue in New York the other day. How suggestive such a fact is in starting inquiry as to whether many corpses could not be reconstituted which were buried if proper remedies had been adopted.

When articles rise the consumer is the first that suffers, and when they fall, he is the last that gains.

Mr. Garfield's Church Relations

We are often asked, what does the denomination known as "Christians," of which General Garfield is a prominent member, believe?

We gave last week a Confession of Faith, such as is understood to be in pretty general use in the Interior and West, with such modifications as each local church sees fit to make.

Many of their churches furnish instructive illustrations of the tenacity, with which an unwritten creed may be held by a community.

The New York Times has its own opinion of Gen. Hancock, which it expresses in the following vigorous words: Does anybody know what Gen. Hancock thinks about the principles of finance, about the tariff, civil-service reform, interstate commerce, or free ships?

Does anybody know what Gen. Hancock thinks about the principles of finance, about the tariff, civil-service reform, interstate commerce, or free ships? Does anybody care whether he is a competent judge of these fairly equipped to give the country a pure Administration, and to stand between it and corrupt and hasty legislation?

Why are we sick? Because we allow these great organs to become clogged or torpid, and poisonous humors are therefore forced into the blood that should be expelled naturally.

Why are we sick? Because we allow these great organs to become clogged or torpid, and poisonous humors are therefore forced into the blood that should be expelled naturally.
