Mrs. Lytle's Will--

The will of the late Lillian S. Lytle has been filed in probate. By its terms, her son, Frederick, receives a solitaire diamond ring; her daughter, Gertrude, she gives a cluster diamond ring, a double diamond and a diamond earring. The residue of the estate goes to her husband, Mortimer E. Lytle, who is named as executor with no bond required. The will was executed on Jan. 19, 1911, and was witnessed by William H. Thompson and A. B. Williams.

Seeks Judgment--

V. L. Fisher has brought an action on a judgment note of \$120, signed by Thomas Hackley, and secured by a chattel mortgage on certain property of Hackley's. He seeks judgment in the sum of \$120 with interest from Nov. 6, 1914, less a credit of \$8. He is represented by W. A. Hosack.

Answer Filed--

W. W. Walkey, administrator of Julia A. Loney, has made an answer in the action instituted against him by Elva Loney, executrix of the Ruben C. Loney estate. He admits appointment as administrator but denies all other allegations. He avers that the money and warehouse receipt composed a part of the estate of Ruben C. Loney, which was bequeathed to Julia A. Loney and that it rightfully came into the hands of his decedent and that no part of it is required to pay costs of administration. P. A. Berry is attorney for Walkey.

Safe Medicine for Children

"Is it safe?" is the first question to be considered when buying cough medicines for children. Chamberlain's Cough Remedy has long been a favorite with mothers of young children as it contains no opium or other narcotic, and may be given to a child as confidently as to an adult. It is pleasant to take, too, which is of great importance when a medicine must be given to young children. This remedy is most effective in relieving coughs, colds and croup. Obtainable everywhere.

ARBORETUM

ON KENYON'S WOODED HILLS ADD BEAUTY TO THIS FAMED LOCALITY.

W. E. Bontrager, head of the tree and flower department of the state experiment station at Wooster, is the author of a very interesting article in the last issue of the Ohio Forester, in which he relates incidents concerning the development of the arboretum for Kenyon college.

On the hill upon which Kenyon is situated, the state has planted many beautiful trees, which are aimed to add to the natural forest beauty of this far-famed locality. The attempt has been a marked success. The first nursery was established at Kenyon in 1909. Under the state's direction the trees have been transplanted to various parts of the hill's woodland. In his article, Mr. Bontrager says:

"Their diversity and variety promise to add much to the attractions of this already supremely beautiful piece of natural woodland and with the lapse of time the wisdom of this far-sighted movement will become more and more apparent."

Spring

Spring is looked upon by many as the most delightful season of the year, but this cannot be said of the rheumatic. The cold and damp weather brings on rheumatic pains which are anything but pleasant. They can be relieved, however, by applying Chamberlain's Liniment. Obtainable everywhere.

OHIO Proposes Health Insurance For Entire State

Columbus, O., April 11--Enactment of a law providing health insurance for all wage workers receiving less than \$100 a month will be asked of the next general assembly of Ohio. There exist strong assurances for a most active campaign for such a statute in which two powerful and active forces will be found in competition. One of these is the American Association of Labor Legislation, and it was through its social insurance committee that a law was drafted covering health insurance. This law will be brought to Ohio for study and action.

Ohio has been selected as fertile ground for the enlargement of social insurance because of the eminent degree of success that has been attained with workmen's compensation in the state, the existing statute being regarded as a model.

The private insurance interests in the state have joined hands, and have prepared to fight for provision that the insurance be undertaken by the leagueed companies, thus eliminating the possibility of a state monopoly. The association of underwriters will oppose the extension of state ownership in any form of insurance by resisting all efforts to widen the present scope of the compensation law.

The proposed health insurance law would be compulsory for all engaged in manual labor. Compulsion is favored because experience in other lands has demonstrated that the lowest paid workmen who most need the protection of the plan are the last to avail themselves of it voluntarily.

The benefits to be provided, if the bill becomes law, are medical, surgical and attentive, including charges for hospital care, medicine and supplies. A cash benefit equal to two-thirds the weekly wage beginning on the fourth day after illness is to be paid. Funeral benefits not exceeding \$50 are also to be provided.

The cost and administration are to be about 3 per cent of the total wages paid. It is to be divided between the employer, the workman and the state, the first two paying two-fifths each, and the last one-fifth. The theory of contribution on the part of the employer and the state is that the workman is partly responsible for the condition of his health and receives the benefit of the plan, the employer pays because most sickness is traceable, directly or remotely, to occupational diseases, and the responsibility of the state to each community for the preservation of health is recognized.

The proposed plan goes so far as to provide maternity benefits for working women after they have been members of associations six months of the year preceding. All midwifery expense is to be paid, and in addition eight weeks' sickness benefits are appropriated to each member.

Part of the state's contribution is to be set aside to accumulate and become a guaranty fund against catastrophes in the form of epidemics.

Ohio medical men are deeply interested in the promotion of the new law. Dr. E. B. Heyhurst, director of the department of occupational diseases of the state board of health, is to deliver a thesis upon the subject before the Columbus Academy of Medicine.

The advocates of the law declare that there are 3,000,000 people in the United States sick at all times, and that each of the 30,000,000 wage earners loses on an average of nine days each year from illness.

FULTON GOVERNED IN HIS DECISION BY MT. VERNON CASE

Wherein Judge Seward's Rescinding Action of Granting a Divorce Was Overruled in Appellate Court

Judge Fulton decided the motion for a new trial Monday morning in the novel case of George Neff vs. Bessie Neff, says the Newark American Tribune.

In reviewing the case, the court said that a petition for divorce had been filed in December of last year; that on December 29 the case came on for hearing and he granted a decree of divorce and so announced from the bench. For a time he had not attended to making the entry in the court journal of his action in the divorce case.

Later a motion was made to set aside the verdict and rehear the case. In denying the motion for a rehearing the court cited the case heard some years ago in Mt. Vernon by then Judge Seward. The latter had granted a divorce and a few minutes after learned that the reason for asking the divorce was that the plaintiff wanted at once to marry again. That he had at once attempted to secure license papers for that purpose. The court went back to the journal and rescinded the action of granting a divorce.

Still later the Mt. Vernon matter was taken to the court of appeals and the rescinding action was overruled and the divorce decree originally granted held valid and in full effect. Judge Fulton decided the Neff case in the light of the action by the higher court.

COL. HUNT STIRRED BY THE MUSE ON OCCASION OF HIS FIFTIETH WEDDING ANNIVERSARY--UNIQUE ANNOUNCEMENT.

The Banner is in receipt of an extremely clever announcement of the fiftieth wedding anniversary of Col. and Mrs. Leroy G. Hunt of Xenia, formerly of this city.

The announcement is in the form of a postal card and bears the legend at the top: "1866--April 17--1916." At one side appears a photograph of Col. and Mrs. Hunt with smiles on their happy countenances that age could not erase or eradicate.

In the center of the card, there is the following diversion on "Tipperary," in Col. Hunt's writing: "It's a long way to a golden wedding."

It's a long way to go, Through the long years of joy and gladness, To the grandest of them all, Farewell, clouds and shadows, Good-bye to them all; It's a glad, glad way to golden weddings,

But we're there, hooray!" The card is signed: "Col. and Mrs. Leroy G. Hunt."

THE "ENDLESS CHAIN" DANGER OF CATARRH

S. S. S. the Proper Safeguard.

Catarrh is a "cold" in its chronic form. The air is filled with bacteria which is taken into the mouth and nose through the process of breathing. When the body is in a healthy condition no harm results. But with our modern methods of indoor living and sedentary occupations, the mucous membranes are usually not able to "throw-off" this harmful bacteria, making catarrh a very common ailment. These germs breed and multiply, causing inflammation, the blood rushes to the membranes to fight off the bacilli. When the blood is in a vigorous condition its "defensive" efforts are successful. Otherwise the cold "hangs on"--turns into catarrh.

Catarrh is a chronic inflammation of the mucous membranes. Mucous membranes are the lining on all the internal cavities of the body. Get that--ALL cavities! There is the "endless chain" element of danger.

The only way to treat catarrh is to purify the blood. The surest way to purify the blood is to take S. S. S. Write us for special advice. Swift Specific Co., Atlanta, Georgia.

A Traveling Man Cured

P. B. Counterman, a traveling man of Joplin, Mo., writes: "Twelve years ago I was a great sufferer from stomach trouble. I tried nearly every medicine I could hear of, among them I used fifteen bottles of one popular preparation, but never found anything that did me any permanent good until I took Chamberlain's Stomach and Liver Tablets, which have effected a permanent cure. It has now been five years since I took these tablets, and I have had no more stomach trouble during that time. I have recommended Chamberlain's Tablets to a great many sufferers with stomach trouble, and have met many of the boys on the road that are afflicted with disorders of the stomach as they have to put up with all kinds of half cooked grub at the different country hotels, which is one cause of this dreadful disease."

Made My Life Worth Living

"I feel it my duty to tell others what Chamberlain's Tablets have done for me," writes Mrs. L. Dunlap, of Oak Grove, Mich. "I have suffered with pains in my back and under my shoulder blade for a number of years, also with a poor appetite and constipation. I tried all of the remedies that I heard of, and a number of doctors, but got no relief. Finally a friend told me to try Chamberlain's Stomach and Liver Tablets. I got a bottle of them and they soon helped my stomach; by their gentle action my bowels became more regular. Today I feel like praising them to all who suffer as I did, for me and made my life worth living."
