

OUT OF WATER.—The large pond on the Penitentiary grounds, which has served to furnish water for the engine, and for brick-making, has gone dry, for the first time since it was enlarged. To-day they commence hauling water from the river to supply the engine, that keeps the factory moving. Brick making, has for the present stopped at the prison. There is a general want for water about town, most of the cisterns are dry and many of the wells. Our neighbor in Main street, is out of the essential element to raise steam.—Last week the Comet press, had to turn out their Weekly edition, which is a very heavy issue. It is astonishing how kindly Hoe's large cylinder, accommodates itself to any view. It makes as good an impression for Breckinridge as it does for Douglas, and adjusts itself with a peculiar fitness for our crank-necked notions. The streets are slightly dusty, and the public pumps of the city—the reservoirs at the corners are in like condition with the wells and cisterns.—The mornings are getting quite cool, and fires begin to feel comfortable.—It is made the duty of the Marshal or his assistant to visit the yards and premises of tenants and examine the pipes, chimneys, etc. Will they do it? People should be very cautious now about their fires.

OUTRAGEOUS CONDUCT.—On Sunday evening last, our city was visited with a most pestilential parade of drunkenness. A company of men paraded the streets under the Democratic doctrine, that "in union there is strength," committing all manner of outrages on persons and property, causing the stores and houses to close, and for a time taking complete possession of the place. It cannot be said the parties are not known—it cannot be said that there is no evidence to convict them, and the question arises, where are the authorities, who are in the regular pay of the people to do what is clearly their duty, if any duty at all is required of them. This is not the first or second time that such disgraceful scenes have been witnessed in Baton Rouge of late years, and the violators of the law do so with impunity. Shall we admit that the parties, who are charged with the duty of arresting such and calling on others to aid them, when their power fails, are incompetent to the duty? Yes—this is the naked truth. The people are responsible for this condition of things. The evils all come out of that Pandora box, of all evil; the ballot box, which we for one are in favor of abolishing, if it can do nothing better than elevate to place, men, notoriously unfit for place. Where is the Mayor of the city—the Justice left to administer justice—the Marshal of the city and his assistant? We are all interested in these inquiries, and if there are not sober people enough—law abiding citizens, to see these evils corrected, the entire machinery of the city government had better be turned out to grass.

FICTITIOUS FIRMS.—The Postoffice not to be used for Fraud.—The U. S. Attorney-General has given an opinion sustaining the action of the Postmaster of Baltimore, who refused to deliver letters addressed to fictitious persons or firms. The Attorney-General says the postmaster has authority under the laws to prevent the service from being used for fraudulent purposes, and then adds: With that end in view, you certainly have power to order the non-delivery of letters addressed to any person under a name which you know to have been assumed, as part of a system intended to cheat and defraud the public. But the fraudulent intent ought to be very clear, for you are not invested with any authority to carry on an extended inquiry into private affairs of persons who receive letters by mail, nor have you the means of ascertaining with correctness that they are. It should also be remembered that the mere misnomer of a man is not sufficient grounds for saying that the name is fictitious, neither a firm an imaginary one because the style of it has no reference to the name of its members, nor can you stop a letter on the sole ground that it is addressed to a person whose employment is immoral, it being the duty of the State government, and not of the Postoffice Department, to punish such offenses.

If a flock of geese see one of their number drink, they will drink too. Men often make geese of themselves.

The Balloon Trip to Europe—A Grand Explosion.

It has heretofore been stated that Prof. Lowe would make an attempt at Philadelphia, to cross the ocean in his balloon, and on Friday last, it was generally understood that the experiment would be made. Well, the experiment was made, to the extent of collecting an immense crowd of dupes, among whom we regret to see was a reverend gentleman, who appeared on the ground by request, and offered up a prayer for the success of the undertaking, but though all appearances seemed favorable, and everything necessary had been provided, the whole affair terminated in one grand explosion of the balloon. Let us hope that the bursting of the balloon the charlatanism of "Prof." Lowe also exploded. N. O. Bulletin.

The above furnishes additional argument to sustain our position on the subject of prayer. Prayer has got to be a fashionable affliction. The right to pray, is granted in the charter of liberty. A man may pray for himself, or his friends, just as he likes, and he may pray when and where he likes. There is no statute regulating the voice of prayer, so the prayer, may either pray in *spiano*, *ad libitum*, *allegro*, or *basso*. He may pray in the wine of the lamb, or the roar of the lion. How much better it would be to close with prayer, than to open. Suppose the Rev. gentleman who was called on to pray for the balloon, had waited until after the inflation, or after Professor Lowe, had left the lean earth; it is not evident that he would have saved his prayer, and the mortification of having delivered it, to an exploded machine? Suppose instead of employing a man to pray every morning for Congress—for a salary, that Congress could wait and spend the last hour of the session in this way? Would it not be more reasonable, if not more efficacious? To our mind that body has got to be much like the ground over which the priest refused to sprinkle holy water. It wants rain—a regular shower from heaven, to wash it out. So with the local legislature, it would be profanity to pray for it, if it were not a mere form to be observed for form sake—having no place—no effect. There is altogether too much praying—too much precept, and too little example. A good man's life is a constant prayer, and it is, vain and foolish to pray for them who do not deserve to be prayed for. We have not yet heard of prize fights, opening with prayer, but expect, to soon.

BIDS FOR THE PACIFIC TELEGRAPH.—The Secretary of the Treasury opened, on the 11th, the bids for the construction and use by the Government, of the telegraph line to the Pacific, as provided for by the last Congress.

The proposals of Hiram Sibley, representing the Western Union Telegraph Company, was in accordance with the minimum sum in the act of Congress, viz: \$40,000 per annum, and \$3 for a single dispatch of ten words, with the usual proportionate reduction upon dispatches of great length.

Mr. Adams, of Harrisburg, Pa., bid \$29,000, per answer for ten years. Orville Clarke, of Sandy Hill, N. Y., and J. H. Harmon, of Detroit bid, \$25,000 for ten years.

B. F. Picklin, of St. Joseph makes three bids: in the first \$35,000 per annum for ten years; second, \$40,000, and to transmit all Government dispatches at \$1 50 for the first ten words, with the usual deduction on those of greater length; and the third, \$40,000, accompanied with a proposition to run a Pony Express after the first 500 miles of the usual telegraph rates until the line is completed.

There were present at the opening of the bids, Messrs. Sibley, Tickler, J. S. Graham and A. W. Bee; the last named is connected with the Placerville and St. Joseph lines. The Secretary of the Treasury will probably make the decision the last of this week.

BOSTON SUGAR MARKET.—The Boston Commercial Bulletin, of the 8th, says:

Within the past three months there has been a brisk speculative feeling in the sugar market, and then a gradual decline till the difference in the minimum prices to-day and the minimum prices within the period we have named, is full five-eighths of a cent on hhd. sugar, and three-quarters on box sugar. The stocks in all the principal cities are immense; in Boston that of box sugar is more than two to one of last year.

The Lake Michigan Disaster.

RECOVERY OF BODIES AND BAGGAGE.

The Chicago Evening Journal, of the 10th, continuing its record of the appalling disaster on Lake Michigan, says:

Early yesterday morning, the beach between Chicago and Lake View was covered with persons in carriages, on horseback, and on foot, eagerly scanning the still turbulent surges of the lake, for some signs of the poor humanity which had been swallowed up by it. Now and then some dark object came in sight, tossing hither and thither—now buried from view, and again appearing. As it passed some bold swimmer would plunge in and drag to the beach the body of some poor unfortunate, with dishevelled hair, distorted and blackened countenance, and clayed garments, which for more than two days had been the sport of the wild waters, and was at last reluctantly yielded up to sleep in a more peaceful grave.

Some in the Courthouse Square.—As fast as the bodies were recovered, they were conveyed to the marshal's old office in the courthouse, in wagons and by the special train, which ran to Evanston, early in the morning. All day long, the courthouse square was filled with eager and excited crowds, a large majority of them females. Nearly every one had lost some friend, and sobs and moans, and occasional frantic shrieks went up from the vast throng, which swarmed upon the stairs and in the areas, and even clambered up to the windows. As each new body came in, the excited crowd pressed forward, eager to catch one glimpse, fearful and yet hoping that it might be the body of some friend or relation.

Mothers were seeking for children and children for mothers; husbands for wives and wives for husbands; and as one would be recognized, the flowing tears, piteous moans and wringing hands, told of the frantic grief and mental agony of those whose death had bereaved. Strong men, "who had no friend, no brother there," wept like children, while women, more easily overcome than men, gave to the unfortunate the sympathy of their tears.

In the Marshal's Office.—Inside the office the sight was appalling. Twenty-two bodies were stretched upon floor in rows. There were grey headed men, matured women, youth and infancy, some faces which seemed only sleeping, so white and calm were they, others swollen, distorted and blackened; some dressed in rich garments, others in a few rags and shreds, all that was left in that terrible conflict for life. One sweet little child, about six years of age, chubby and white as marble, had smiled in dying, and death had beautifully that smile upon his beautiful face. There it laid; upon one side a beautifully formed girl, with long, black dishevelled hair, and on the other, a large, strong gray haired man, his lips firmly set, his eyes staring ghastly and his fists tightly clenched, as if he had fought a long and stout fight for his life. It was a fearful picture of death. Some looked as peacefully as if they had died in quiet homes among friends; others, however, gave token of a terrible struggle between life and death.

Recovery of Col. Lumden's Trunks.

The same paper elsewhere says: Several trunks have been found in the vicinity of Evanston. Two have been recognized as belonging to the Lumden family, of New Orleans, and one to Charles Lacy, saloon keeper of the Lady Elgin. One of Mr. Lumden's trunks had been found and carried off by some men living in the vicinity. Justice Hutton, of Evanston, hearing of it, immediately proceeded to recover it, but the men would not give it up, they having been told by some Milwaukee men that Mr. Hutton had no authority to take possession, and had it not been for the timely assistance of Lyman Mower, of this city, it is doubtful if the contents of the trunk would ever have been recovered. The trunk contained clothing and some valuable jewelry as follows:

5 bracelets; 1 gold locket, with two miniatures; 2 hair bracelets, gold trimmed; 1 gold core, pearl set; 1 string pearl beads; 1 set diamond ear drops; 1 set corallian ear drops; 1 hair core, gold trimmed; 1 gold stud, engraved "Blanche" on back; 1 set cora beads; 8 pieces broken jewelry; 3 gold brooches; 1 diamond pin; 3 cent piece and a Garmat coin.

The trunks are in possession of Thomas E. Adams, Esq.

VICKSBURG ITEMS.—The Vicksburg Whig, of yesterday morning, furnishes the following items of news:

We regret to learn that N. D. Coleman, is lying dangerously ill at the residence of W. S. Parham, Esq., in Madison parish La.

Dr. Young, President of the Vicksburg, Shreveport and Texas Railroad, informs the Shreveport papers that the work on this road is progressing rapidly, and the track will be laid to Monroe, before next January.

Gen. E. L. Acee, is now engaged in Coahoma county advocating the project of a railroad from this city to Memphis, by the most practical route.

NEW PATENTS.—Among the new patents issued September 4th, we notice the following:

Thomas Byrne, of Baton Rouge, La., for improvement in the preparation of flour, and for improvement in the mode of applying sulphurous acid to cane juice.

Ferry G. Gardiner, of New York, N. Y., for improvement in cotton presses.

Maximilian Wappich, of Sacramento, Cal., for improvement in cotton presses.

John Revere, of Boston, Mass., for improvement in sheathing ships, &c.

LOUISIANIANS AT THE NAVAL ACADEMY.—Among the admissions to the Naval Academy at the recent examination was James Morris Morgan, First District, Louisiana; Henry L. Vaughn, of the Third, and G. N. Sparks, of the Fourth.

The first horse railroad in England has just been inaugurated at Birkenhead. Mr. G. F. Train, of New York, first started the work, and under his superintendence it was completed.

LATER FROM SOUTH AMERICA.—By the bark *Roebuck* at New York, from Montevideo, we have three weeks later dates from Buenos Ayres to July 21, and from Montevideo to the 28th, both inclusive.

Gen. Urquiza had been on a visit to Buenos Ayres, accompanied by Dr. Derqui, President of the Confederation, the immediate object of his visit being the celebration of the National Independence on the 9th of July. They had been received with much enthusiasm by the people.

During the military review which took place on the 9th in the Plaza Victoria, in the presence of Generals Mitre and Urquiza, and of Derqui, when the 4th regiment of National Guards was passing in front of Urquiza the standard bearer, instead of "presenting" his flag, folded it up and carried it.

Some young officers also sheathed their swords. These acts of insubordination, however, were overlooked, being but the expression of private dissatisfaction, the people of Buenos Ayres being in favor of Urquiza's fusion policy.

By decree of the national Government the election of deputies to the convention *ad hoc* were to take place on the 5th, 6th, and 7th August.

Extensive discoveries of gold are announced in the Province of San Juan, and troops had been dispatched for the maintenance of order.

Subscriptions were on foot among the Italian residents of Buenos Ayres in aid of Garibaldi. There are a good many Italians here, and they are generally wealthy.

The U. S. surveying steamer *Argentina* and the U. S. brig *Dolphin* were in port on the 21st.

The British residents of Buenos Ayres had presented an address to Urquiza, in which they express sentiments very pleasing to him. His response was brief but appropriate.

The markets were very dull, there being an indispotion or business until the departure of the visitors.

A DOUBLE MOUNTAIN ON THE MOON. A correspondent at Fairhaven sends the *New Bedford Mercury* the following:

This evening, Aug. 26th, at 7h. 10m., I saw for the first time the unmistakable fact of a double mountain on the lunar surface. This very delicate phenomenon may be detected and verified by any telescope capable of exhibiting the companion of Polares. Yet the telescopic aspect of the mountain is not that of the double order.—It appears like a minute mountain—a top of one of larger base—and were it not for the shadow, no one would ever suspect it other than an isolated peak. It protrudes a strong shadow towards the margin of the moon's limb, and is a well defined cone, athwarted from base to summit by a slender, well defined vein of sun-light which latter feature establishes the fact of its duplicate order.

It is one of those exceedingly delicate points of observation which tends to amply to compensate the lower of the sciences for even weeks of research.—That others may share in the satisfaction, I give the position of the moon, when it may be examined with the required aid. To time of the moon's first quarter add two days eleven hours, by this it will be seen that on October 24, at 7h. 25m., evening, the position of the moon will be such as to offer to all the opportunity of witnessing one of the most interesting of lunar phenomena.

Three English gentlemen have lost their lives on Mount Blanc.—T. M. Rochester and F. Vavasseur, both of Cardiff, and R. Fuller, of London. In descending, whilst tied together in the usual way, one slipped, and dragged his companions and the three guides over a steep and long slope of snow. Attempts to arrest the descent were in vain, and the two guides at the end, seeing they were about to be launched into a precipice, let go and forced their hands and feet into the snow. The three bodies were found at the foot of the precipice Tiarraz. An experienced guide was also killed.

METHODIST IN FRANCE.—The Methodist Church in France held its ninth annual conference on the 20th of June, at Nimes. The records present a membership of 1,480, and 115 on trial. The whole number of stated and regular hearers is about 8,000. There are 23 ministers, 75 local preachers, with 51 churches and 101 other preaching places. They have one monthly periodical.

"Set 'em up!" Mr. Philbrick, a bookseller at Saratoga, while playing at ten pins the other day, got twenty-seven ten-strikes in succession. The boy said, "t was no use to set up pins for such a fellow," and retired in disgust.

DIED. At his residence on Grasso Tete, on the 16th inst., Mr. JAMES WINSOR PIPES.
