

# A Few Facts About San Diego

\$175,000 High School building.  
\$1,150,000 Federal building, begun.  
Most powerful wireless telegraph station on the coast.  
Three daily and several weekly newspapers.  
190 miles cement walks.  
197 miles graded streets.

Most even and healthful climate in the world.  
Natural and safe harbor of incalculable possibilities.  
First United States port of call north of Panama Canal.  
Harbor defenses costing \$1,500,000.  
United States coaling station.  
50,000 inhabitants, having doubled in 4 years.  
Present building permits total a quarter of a million dollars per month.  
Nineteen public schools, employing 125 teachers.  
State Normal school, costing \$225,000.

1,400 acre city park and several smaller ones.  
\$80,000 Public Library, 30,000 volumes,  
600,000 acres of tillable mesa and valley land west of Coast Range.  
4,000 miles of good country roads with \$1,250,000 available for extension.

### MINING AND OIL NEWS.

## TEXAS OIL COMPANY CAPS ANOTHER TOYAH WELL

### Capitalists Propose Modern Hotel, Sanatorium and Park.

Toyah, Tex., June 11.—It is reported that the Texas Oil Company has finished the last well which it has been drilling, capped it, and has started drilling another one about 1000 feet distant. It is also stated that the results of the last well were satisfactory. Every well in the vicinity of Toyah, which were bored for water have had gas and oil at from 60 to 150 feet.  
The well on section 14, called the O'Neil well, near the edge of town, before the water was brought in, showed oil and gas; and when the well was brought in at 602 feet, the pressure of the gas made a genuine gusher, forcing the water into the air over 100 feet, and it flowed a powerful stream of 100,000 barrels of water a day throwing pebbles and boulders as large as one's fist 25 feet into the air. The flow of water continues unabated at the rate of 20,000 barrels a day. The owners of this well expect to build a park around it of at least 20 acres and after benefiting it with lawns, trees and walks will donate it to the city.  
It is also reported that a company has been formed to build a large modern hotel and sanatorium to cost at least \$150,000, and surround it with beautiful lawns and walks. The promoters are cashier Gibbons of the First National bank, manager Holmes of the Mercantile Company bank the Reeves Mercantile company of Toyah, and Dallas and St. Louis capitalists. It has been found that the water of the well on section 14 has wonderful medicinal properties, and is particularly beneficial in cases of rheumatism and kidney troubles. Besides the curative waters, the wonderful climate is peculiarly beneficial in pulmonary cases, and assurances have been received that the railroad and physicians will cooperate in encouraging invalids and tourists to come to Toyah.

**RED CROSS MINE PLANS BIG DEVELOPMENT WORK**  
Consolidation Proposed With Cleveland Properties at Silver City; Chino Blocking Ore; Large Drill Received.  
Silver City, N. M., June 11.—It is reported that the Red Cross mine management is to begin drilling on its claims eight miles north from Silver City. The properties adjoin the famous Cleveland group of mines and contain large bodies of zinc-copper ores. The present plans of development and equipment carried out will give big returns, as the ore runs 25 percent zinc, 3 percent copper, six ounces silver and \$1 gold per ton. The plant to be installed will have a daily capacity of 100 tons and will be increased to 500 tons later on.  
A consolidation may be effected be-

tween the Red Cross and the Cleveland properties. The latter property has blocked out 225,000 tons of ore, showing an average value of \$25 per ton, or \$5,625,000, which means years of steady production.

Work is progressing steadily on the Chino, which is drilling and placing 1,000,000 tons of 24 percent copper ore in sight every 30 days. A concentrating plant will be erected shortly that will treat 2500 tons of this ore daily, giving a return of 120,000 pounds of copper a day.  
Arrangements are being made to obtain a large supply of water for concentrating purposes as the lack of water is one of the hindrances at the present time.  
A large number of prospects are being opened up within a radius of 15 miles of this city.  
What is probably the largest drilling machine ever shipped to this section of the southwest has arrived. It is a complete No. 25 Star drill, with a portable boiler, consigned to the Mangus Development company. The company has had two Cyclone drills at work for some time.

### WITHDRAWN ARIZONA LAND THOUGHT TO CONTAIN OIL

Swansea Mining Company Planning to Test Property, Oil Indications Being Numerous.  
Phoenix, Ariz., June 11.—Receiver Arnold of the land office has been notified by the department of the interior of the withdrawal of 25,000 acres of land in Mohave county, Ariz., and its designation as petroleum lands. George Mitchell and other officials of the Swansea mines, are interested in the oil district.  
Most of the prospectors in Mohave and Yuma counties have been hunting for gold or copper, although knowing ones saw good oil indications there. A few years ago a number of El Paso capitalists sent some experts in the placer fields of Yuma. Among them was professor E. M. Skeats, whose experienced eye soon read the signs of oil, and so reported.  
Officials of the Swansea Mining company located several thousand acres north of the mine as the result of a prospector finding shale heavily impregnated with the odor of oil.  
The Swansea field is located at what would be the southern end of the district in which the interior department has just made the withdrawal of 25,000 acres.  
Mitchell and associates are said to have nearly completed arrangements to rush an oil drilling outfit into the field and drill a test well. This will cost \$8000 or \$10,000.  
Thousands of acres have been staked off in the Swansea field by miners and others.

**PENOLAS MINING COMPANY BUYS THE SAN JUAN MINES**  
Torreón, Mexico, June 11.—The Penolas Mining company operating the famous Ojuela mines and Mapimi smelter, one of the largest in Mexico, has acquired control of the San Juan mines in the Mapimi district, state of Durango. The San Juan Mining company was organized with 5000 shares at a par value of \$20 a share. The price paid by the purchasers is \$400 per share, being on a basis of \$2,000,000 for the entire properties.  
The Penolas Mining company is con-

posed principally of German capitalists. They operate one of the richest properties in all Mexico. The San Juan mines are located between the smelter and the Ojuela mines, both of which are operated by the Penolas Mining company.

**SOWER ASKS TITLES FOR DURANGO TAMAZULA MINES**  
Edward R. Sower, a well known mining engineer of Cullacán, Sinaloa, has applied for his titles to six claims, embracing veins of gold, silver and copper, located in the Tamazula camp, district of Topia, state of Durango.  
Sower, after graduating at the School of Mines in Socorro, N. M., went to Sinaloa and discovered a vein rich in bismuth and gold. Interesting the Richardson Drug company, of St. Louis in the enterprise, he invented a process for saving the bismuth for which he received \$1 a pound. The mine proved very profitable.

**OIL CLAIMS STAKED OUT IN TOYAH FIELD**  
Mr. and Mrs. C. R. Troxel have returned from Toyah where they have been for the past week. Mr. Troxel states the Texas company is still drilling on its lands. There are a great many new filings being made over the line in El Paso county.

**MINE DEAL OFF.**  
Torreón, Mexico, June 11.—The \$5,000,000 deal for the Naica mine in the state of Chihuahua, Mexico was not consummated. The deposit of \$50,000 and the option was forfeited.

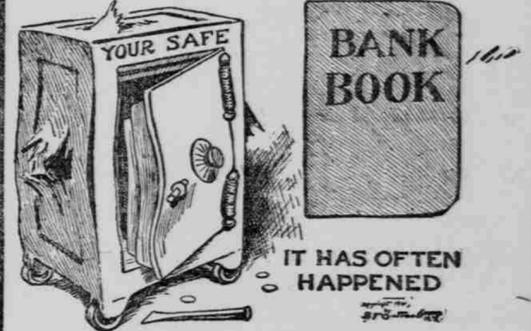

### MEXICO FACES INHERITED FOE

(Continued From Page Nine.)  
poses of worship. In such there is usually found a tablet in the wall and an altar for sacrifices. The interior decoration of the rooms was often elaborate, besides the stucco and the native colorings many carvings being in evidence. On them were painted in brilliant colors pictures which furnish the modern historian with much information of the dress, manners, gods and customs of the people. Often these designs are in low relief.  
**Temple of Palenque.**  
One of the most famous Mayan works of art is in the Temple of Palenque, where is a remarkable tablet on which is carved a sacrificial scene. Copan is the most interesting Mayan town, though it is not really in Yucatan, being just over the border. Stephens found there a score of soapstone idols—great pillars of stone carved into most elaborately designed human forms. They were usually four sided, and the front and back represented a human figure, finely dressed with feather head dress, ear rings and ornamental jewelry of all sorts. The sides were generally covered with the queer hieroglyphics so common in all Maya carving, called "codiciform" characters.  
Prof. Leopold Batres, in charge of prehistoric investigations for the Mexican government, has made many valuable discoveries among the Maya ruins and last year headed an expedition which brought to Mexico City the famous Palenque cross from the ruined Mayan city of that name.

### WILCOX INTERESTED IN INCORPORATION SCHEME.

Board of Trade is Promoting the Proposition—Ranch Sells for \$3000. Rancher Builds Home.  
Wilcox, Ariz., June 11.—The incorporation of Wilcox is being advocated by the Wilcox board of trade, and its meeting with general favor. The surrounding country has been rapidly settling and improving, and the town is interesting itself in municipal betterment.  
R. W. Tenley has arrived with a carload of household goods from Greenview, Texas, and will soon erect a house on his homestead one mile north of Wilcox.  
H. W. Lupton has completed a modern cottage on his tract of lots in addition No. 2.  
J. W. Dimars purchased the Townsend ranch three miles west of town,

## THE SAFEST PLACE TO KEEP YOUR MONEY IS IN THE BANK. THE BANK HAS IT SAFE FOR YOU.

IT HAS OFTEN HAPPENED  
FAMILY SAFE EASY FOR BURGLARS  
BANK VAULTS ABSOLUTE PROTECTION

THE family safe is a thing of beauty, but it is of little more real protection against the wily burglar than an ordinary cupboard. Of course, it gives the thief a little trouble for a few moments, if it should happen to be locked, but the combination is easily wrenched off by even the apprentice cracksman, and your diamonds, your jewelry and silver, your prized heirlooms, vanish in a twinkling.

But how different is the bank vault! Made of armor-plate steel hardened to turn the edge of almost any tool. Fitted with the most ingenious time locks, that can be opened only by high and trusted officials of the bank and even by them only during office hours.

Be wise, be provident, be economical, use the bank vaults, and know that your treasures are safe, and let the children use the home safe as a doll's house.

**\$1.00** starts an interest account.
