

EL PASO HAS 299 MORE SCHOOL PUPILS THAN ONE YEAR AGO

Census Costs the City \$500. Manual Training for the Negro School—Supt. Crozier's First Report.

It cost El Paso \$500 to learn that there are 299 more children of school age within the corporate limits of this city than there were when the census was taken last year. The total number this year is 7196 compared with 6897, one year ago.

R. N. Muhl, who took the school census of the city, made this report to the school board at its regular meeting Monday night and the remarkable thing about the whole report is the number of Mexican children who total up more than half.

F. E. Sawyer was appointed purchasing agent and clerk of the school board and will assume his duties at once at a salary of \$100 per month. This does away with the secretary's position, as he will occupy the position as well as performing whatever other clerical work the board may call upon him to do.

The salary of the superintendent's stenographer was cut to \$75 but no one was appointed, superintendent Crozier reporting that he was not ready to decide on anyone as yet and probably will make no appointment until after July.

Tools and paraphernalia, necessary to the manual training work costing \$1000 was ordered for the ensuing year.

Health of Teachers. Health of teachers and pupils is a matter of vital importance, and deserves even more consideration than it has received in the past.

Worsham offered another motion that all be included, saying that he did not think they should cut out any department. Winter said he believed the motion out of order unless a motion to reconsider was offered.

Dr. E. H. Irvin, of the external committee, presented a report in which it was recommended that some one be appointed repair man and supply distributor under the direction of the superintendent of manual training at a salary to be fixed by the board.

The report also recommended the appointment of a purchasing agent, bookkeeper and clerk at a salary of \$100 per month and suggested the selection of F. E. Sawyer.

Superintendent Crozier's request for supplies and equipment was included in this report. He stated that it was desired to teach manual training in the second year at high school and this would necessitate the purchase of new tools and benches.

Mr. Dorbandt then said: "The committee would be very glad to supply the Douglas school if the finance committee would stand for it. It looks like discrimination not to give the negroes the manual training but we are afraid we already have too much."

Winter then inquired how many students at the high school had elected to take the manual training course and when superintendent Ross informed him there were 10, he asked if they could not take it in with the other boys and thereby avoid the necessity of putting in a department at the high school.

Mr. Dorbandt replied: "It looks to me as if we could do for such a small sum we ought to do it."

Winter then inquired how many students at the high school had elected to take the manual training course and when superintendent Ross informed him there were 10, he asked if they could not take it in with the other boys and thereby avoid the necessity of putting in a department at the high school.
