## Men's Winter Suits

(Season 1909-1910 Styles)

### On Sale Tomorrow At 1/2 Price

The most extraordinary sale of the season starts here tomorrow. This is a sale of men's winter suits at half price. The suits are a broken lot carried over from last season. Many of the styles and patterns are just as good as this season's and we could possibly sell many of them at this season's prices, but that is not our way of doing business. We propose to close them out and make the price accordingly. There is a full range of sizes and colors to commence with, but as these suits can't last long at the prices you had better come tomorrow. For a business suit or a suit for every day wear these will meet every requirement. These suits are offered in two lots.

UNION COUNTY FARMERS ARE PROSPEROUS THESE DAYS

Clayton, N. M., Oct. 11.—Union county farmers and ranchmen are among the most prosperous people of the southwest these days.

While Union county lands are increasing in value by leaps and bounds, the products of the soil and range are being marketed for snug sums.

Ten thousand head of sheep were shipped out of Clayton last week. The big clip of wool has scarcely moved out, and now sheep are being sold at good prices and in large quantities for feeding purposes.

Practically all the homesteaders have raised good forage crops and large crops of broomcorn, as well as grains of all kinds. Garden truck has been plentiful and farmers have been selling an abundance in Clayton at fair prices.

Melons which have been sold here have proved the best quality and flavor and Clayton could be made a shipping point for both cantaloupes and watermelons.

Broomcorn of very good quality has been selling for several weeks here, and there is still a large quantity in the country.

a number of big lots, hauled into town, and the market is better now than ever. The price ranges from \$75 to \$125 per ton, according to the grade of the product, and this is usually field run, few farmers taking the trouble to grade the cuttings. Broomcorn can be raised at a profit in this county.

Alfalfa is yielding the most fabulous returns. From the cheapest land of like grade in the United States come crops of \$150 per acre, with almost a minimum of labor.

The great Cimarron valley this year will produce more than three carloads of alfalfa seed and thousands of tons of the very best hay.

J. M. Potter will market 600 bushels of seed from 50 acres of alfalfa, after cutting three crops of hay, from land which only a short time ago sold for \$5 an acre. The alfalfa seed sells readily for 15 cents per bushel.

D. D. Record has sold \$100 worth of alfalfa seed from 10 acres of land, and has three cuttings of hay. Frank Anderson has sold a large quantity of seed and has a big lot of hay. There are several other large raisers of alfalfa in the Cimarron valley.

In addition to the big yields of alfalfa, the valley farmers of Union county and the closely lying lands of Oklahoma and Texas tributary to Clayton raise an abundance of fruit and grain.

The seasons here are much longer than the seasons in the same altitude in Colorado and Wyoming, and where irrigation is possible, abundant crops are raised with little effort.

In the dryer sections scientific farming is overcoming the natural climatic conditions and the exceptional fertility of the soil yields abundant returns when properly farmed.
