**GOVERNOR MILLS REPORTS ALL NEW MEXICO INSTITUTIONS IN GOOD SHAPE**

(Continued From Previous Page).

held, \$256,356, this cost representing buildings, furnishings and lands. In addition to these and its institutional buildings the territory owns six hand-some national guard armories, at Santa Fe, Las Vegas, Las Cruces, Roswell, Silver City and Albuquerque, representing a total cost of \$101,476.

The total cost value of buildings, real estate, equipment, etc., of the various territorial institutions of all classes, exclusive of the capitol buildings, is \$1,537,065.17. This total does not include lands granted by congress for the support of educational and other institutions.

**The Penitentiary.**  
The condition of the New Mexico penitentiary at Santa Fe has been satisfactory. During the year ended June 30, 1910, a substantial new guard-house has been completed, a south wing, containing a new cellhouse, has been practically completed, and the institution is in excellent physical condition.

**Return School, Springer.**  
This institution was opened October 1, 1909. The first year of its operation has been successful thus far, there being 25 juvenile prisoners on June 30, 1910. A farm is maintained which is worked by the prisoners, thus giving them healthy employment.

**Deaf and Dumb Asylum.**  
This institution, located at Santa Fe, now has 36 pupils who are doing excellent work. The boys are being taught printing, shoemaking, wood turning, carpentering, etc., and the girls general housekeeping, plain and fancy sewing, etc. Practically every deaf and dumb child in the territory has been received into this institution.

**Institute for the Blind.**  
This institution, at Alamogordo, is young, but is doing excellent work. Twenty-six pupils are in attendance and every effort is being made to bring to the school every blind child in the territory. The faculty now con-

sists of the superintendent, matron, both of whom are practical teachers of the blind, and three instructors, including an instructor in music.

**Miners' Hospital, Raton.**  
This institution, established by legislative act in 1903, for the care of injured miners, is maintained chiefly by territorial appropriation, supplemented by revenue from pay patients. During the year an addition has been constructed at a cost of \$12,000, giving an additional 20 rooms.

**The National Guard.**  
The national guard now consists of one regiment of infantry (11 companies and a band) and a battery of light artillery, with a total strength of 844 enlisted men and 54 officers. The war department has treated the guard very liberally by furnishing 348 sets of infantry equipment for the light battery valued at approximately \$25,000, neither charged against our allotment.

**Archaeological Institute.**  
The Archaeological Institute of America is a national institution existing by virtue of act of congress, and this institute has thus far established four schools of archaeology, local, respectively, at Rome, Athens, Jerusalem, and Santa Fe. The school located at Santa Fe, the School of American Archaeology, is working hand in hand with our territorial museum; the two thus rendering each other valuable aid, resulting in their mutual advancement.

Santa Fe was selected as the location of this school because it is in the midst of the richest archaeological fields of the United States. Already this institution has attracted world-wide interest, and the summer school conducted at the Rio de los Frijoles, about 20 miles from Santa Fe, was attended by scientists and students not only from various universities throughout the United States but from Europe as well.

**Mounted Police.**  
The New Mexico mounted police consists of a captain, sergeant, four regular privates, and two additional privates who serve with pay, all appointed by the governor.

**ARNOLD DECLARED THE WINNER FOR MARSHALSHIP.**  
Tucson, Ariz., Nov. 21.—Judson Arnold was declared nominated by the Democrats for city marshal, the independent votes cast for Frank Murphy, the present marshal, being counted out by the city council. This gave Arnold a majority of eight votes.

**WEDDING.**  
Mr. and Mrs. Edw. B. Gray, of Texas street, El Paso, announce the marriage of their daughter, Bessie Johnston, to George L. Foreman, of Roswell, N. M., on Saturday. Mr. Foreman is connected with Armour & Co., at Tucson, Arizona, where the young couple have gone to make their future home.

**PROGRESS ON THE PANAMA CANAL IS GOOD**

(Continued from Page One.)

ly hampered in many places, owing to the floods.

**Culebra Cut.**  
The most important work in the central division was that done in Culebra cut, the digging of which is one of the most stupendous undertakings in connection with the building of the canal.

In this connection the report says: "During the fiscal year 1909, 1,921,750 cubic yards of material were excavated from the Culebra cut, leaving 34,823,521 cubic yards to be removed in order to complete this section of the canal. The remaining amount includes an increase of 6,408,560 cubic yards over the estimate made in September, 1908. This increase is due to widening the canal north of Pedro Miguel lock so as to form a basin, adding thereby 932,572 cubic yards, and to allowing 5,475,988 cubic yards of slides and breaks, as a number of new ones developed during the year and could not be foreseen when the estimate of September, 1908, was made.

"The total amount of material removed from all slides and breaks in the central division during the fiscal year amounted to 2,849,553 cubic yards, or about 15 percent of the amount removed from the Culebra cut."

**Landslides Delay Work.**  
In the Pacific division, also, the work of excavating was seriously hampered by landslides.

When the excavation was nearly

completed on the lock sites at Pedro Miguel, two slides occurred on the last side, delaying the work and increasing the amount to be removed by 75,299 cubic yards of earth and rock. The total amount of excavation during the year was 27,935 cubic yards by steam shovels, and 65,513 cubic yards by hand, of which 44,943 cubic yards were classed as preparing foundations. Excavation proper was done at an average cost of \$1.188 per cubic yard, including plant changes and division expenses.

At Miraflores, the excavation for the upper locks was practically completed during the year, the work of preparing the foundations, erecting concrete plant and placing concrete begun. The total amount excavated was 234,731 cubic yards by steam shovels and 59,098 cubic yards by hand, scrapers and cranes; the actual excavation work being done at a cost for the last six months of \$1.369.

**Big Force of Men.**  
During the year special attention was paid to reducing the cost of maintenance and operation of equipment in the shops, including the standardization of salaries and wages.

Relative to the men now being employed on the canal, the report says: "The average number of gold employees on the rolls of the commission during the past year was 4,369, and of the Panama railroad 753, or a total of 5,122. During the year there were 2890 separations from the service of the commission, and there were employed in the United States, 1099, on the isthmus, 1092, and reemployments on the Panama railroad, 967, or a total of 3158, indicating that more than 60 percent of the force was changed during the year showing the usual unstable condition of the gold force. Laborers recruited during the year aggregated 2519; all were West Indians; the larger part of them from Barbados.

**New Homes.**  
New quarters constructed during the year consisted of 19 houses for married employes, accommodating 38 families. Eleven buildings, accommodating 29 families, were converted into 70 married quarters. The bulk of the new construction was at Ancon and Gatun.

**Health Conditions.**  
The health conditions on the isthmus are reported by the chief sanitary officer as an improvement over those of the preceding year. The total admission to hospitals and sick camps, including those sick in quarters, netted for the year 26,539. The daily average of sick was 23.01 out of every 1000 employed, as against 23.49 for the preceding year. The total number of deaths among employes was 348, equivalent to an average of 10.84 per 1000.

In addition to the number of deaths reported among the Americans, 7639 were deported on the recommendation of the medical examining boards as physically unfitted for the tropics, 19 were recommended for extended leave without pay for the same reasons, and 6 were given extended leave with pay in the United States on account of injuries received in line of duty.

**No Plague or Fever.**  
No cases of plague or yellow fever originated on the isthmus. One death from yellow fever, in the person of a young Englishman, occurred at Ancon hospital on January 24, 1910. The deceased passed quarantine at Colon January 6 and was taken ill on January 8. The case was diagnosed as yellow fever on January 22. On January 24 a thorough fumigation was undertaken of the building in which the deceased lived while in Panama, as well as the factory in which he worked.

**ATTACKS CHURCH OF ROME IN SPEECH**

Cholera Reports In Italy Spread for Evil Effect, the Charge.

Rome, Italy, Nov. 21.—In a speech opening the session of the municipal council, mayor Nathan complained that interested hotel keepers abroad, especially in America and Switzerland, had given currency to exaggerated reports of a cholera epidemic in Italy, thus serving "the lower interested motives of the clericals, who wish to detract from the success of the festivities in 1911 in celebration of the proclamation of Rome as the capital of United Italy.

**Fortunatus Questions His Daddy**

Say, daddy, when do the first permanent teeth come through? Usually about 5 or 6 years of age, but before any of the "baby set" are shed a child cuts 4 permanent molars called "6th year molars."
