

Cottolene

Perfect Piecrust

A lady recently visited a friend in Keene, N. H., whose husband was very delicate, and yet she noticed that he could eat all the pie he wanted. She began to wonder how it was that he could do it, when she had to give up this delicacy because of disagreeable after-effects. She writes as follows:

"I found it was because the pies were made with Cottolene; and as I am a great lover of pie, I began using Cottolene, and have never had a bit of lard in the house since that time. I now enjoy my pie, as it does not give heart-burn as formerly."

Cottolene makes crisp, flaky, digestible piecrust, that tastes good, and that can be digested by any stomach. The reason is that Cottolene is a pure, vegetable oil product, containing no hog-fat.

Lengthens your life**

GUIDES VICTORIOUS IN JUAREZ DISPUTE

Order of Mayor Abolishing Them Is Declared Un-constitutional.

From the American point of view a peculiar case is being fought out in Ciudad Juarez. It is between the city government and the guides, who show tourists the sights of the border city. A majority of the merchants who cater to tourist trade met with mayor Porcillo a fortnight ago and asked that the guides be abolished. Instead of confining themselves to showing sightseers the sights, the licensed guides were steering prospective purchasers into a certain store, the merchants declared. The mayor announced that all guides would be abolished after December 1. The guides went to a federal court, alleging a violation of the constitution in the mayor's order. The contention was based on article No. 4 in the constitution, which declares the right of men to pursue any harmless and honest employment. And the guides will continue to guide.

TWO NEW RIGS IN TOYAH FIELD

Corsicana and Toyah Oil Companies to Commence Drilling at Once.

The Corsicana Petroleum company has its new rig built, the machinery on the job and will begin boring for the slimy stuff Monday of next week. If nothing goes wrong. The people are planning their faith in this company and the Toyah Oil and Pipeline company, which was recently incorporated.

With these two companies in active operation it will no longer be possible to conceal the real situation here. The Toyah company has located its tract 11 miles northwest of Toyah, and six miles southwest of the Texas company's wells, in section 17, block 7. Like the Corsicana company, the Toyah people have nothing to conceal and are going to explore the field thoroughly.

LET YOUR STOMACH HAVE ITS OWN WAY.

Do Not Try to Drive and Force it to Work When It is Not Able or You Will Suffer All the More.

You cannot treat your stomach as some men treat a balky horse; force, drive or even starve it into doing work at which it rebels. The stomach is a patient and faithful servant and will stand much abuse and ill-treatment before it "balks," but when it does you had better go slow with it and not attempt to make it work. Some people have the mistaken idea that they can make their stomachs work by starving themselves. They might cure the stomach that way, but it would take some time to treat a balky horse; force, drive or even starve it into doing work at which it rebels.
