

Biliousness

I have used your valuable Cascara and I find them perfect. Couldn't do without them. I have used them for some time for indigestion and biliousness and am now completely cured. Recommend them to everyone. Once tried, you will never be without them in the family.—Edward A. Marx, Albany, N.Y.

Pleasant, Palatable, Potent, Taste Good. Do Good. Never Sickens, Weakens or Grips. 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped C.C.C. Guaranteed to cure or your money back.

TO DISCUSS ROUTE FOR NEW HIGHWAY

Bisbee, Ariz., May 20.—G. A. Mauk, territorial auditor of Arizona, is expected in Bisbee to consult with the Bisbee board of trade regarding the route of the new highway. He will come as the personal representative of Governor Sloan, who is prevented from coming himself, by urgent state business. The visit of Mr. Mauk to Bisbee comes as the result of the fight that Bisbee has waged against the "Hereford route" of the territorial highway. The prospects brighten for the Benson route, which will touch every town of importance in the country. Douglas has been the only city that has at any time favored the Hereford route, as that would have made a nearer route from that city to Tucson and Phoenix.

A petition is being circulated having for its object the keeping open of schools all night, instead of closing at 1 o'clock in the morning as at present. The commencement exercises of the Bisbee high school will begin Sunday with a baccalaureate sermon by Rev. T. G. Decker, of the Methodist church, and continue until the Friday following. The feature of the commencement exercises will be an address by president Arthur Horace Wilde, of the University of Arizona.

Battista Marinoni, the Italian arranged at Tombstone for the murder of two white men in Bisbee last December, was found guilty and given a life term in the territorial penitentiary. Dr. F. G. Williams, city health officer of Bisbee, has been succeeded by Dr. C. H. Hunt, who came to Bisbee from El Tiro camp, in Sonora. The city council made the change, the reason for its action being that Dr. Williams had moved to Warren.

UPPER VALLEY LAND AND CITY LOTS SOLD

H. B. and C. B. Stevens have sold 163 acres of land in the upper valley to Richardson and Thompson. The land is in the fertile Canutillo tract and is one of the choice acreages in the upper valley. The same firm bought four lots in Stevens' addition on the corner of Buchanan and Missouri street, from the Cottingham estate.

Suits made to your measure, \$20 to \$40, at Bryan Bros.

A PROGRESSIVE FIRM

A visit to the establishment of J. B. Sutton Co., disclosed the fact that there is a first class engraving and etching plant in El Paso, capable of turning out the very highest class of work in wedding invitations, visiting cards, stationery, etc., on very short notice. All engraving and other work being done in El Paso, by the very best workmen in their respective lines, in fact, this firm is turning out a class of work second to none in the country. They have just added to their stock a beautiful assortment of the latest styles in tinted note papers and fancy stationery upon which they are prepared to put your monogram on short notice.

Better Than Spanking.

Spanking does not cure children of bedwetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W, Notre Dame, Ind., will send free to any mother her successful home treatment, with full instructions. Send no money, but write her today if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

Photo Showing Colonel Garibaldi and Troops Making Ready For Attack on Juarez

COL. GARIBALDI GIVING ORDERS TO HIS MEN FOR ATTACK ON JUAREZ. COPYRIGHT BY AMERICAN PRESS ASSOCIATION

Col. Giuseppe Garibaldi, descendant of the celebrated "millioner of Italy," was one of the leading factors in the capture of Juarez by the rebel troops. He led the attack on the church and barracks where Gen. Navarro's men made their last stand. In the accompanying illustration Col. Garibaldi is shown giving instruction to his men just before ordering the advance on the fabled city.

WHERE WOOL GROWS ON TREES

INTRODUCING A NEW TEXTILE PLANT IN THE HAWAIIAN ISLANDS.

A Tree Cotton Used for Making "All Wool" Fabrics. Grafting and Budding For Cotton, a New Discovery. Curiosities of Cotton as a Food Plant.

CLIMBING trees for wool bids fair to become before long the approved method of gathering one of the most important crops in the Hawaiian Islands. At the present time, in fact, the federal government is making certain very interesting experiments with a view to developing the industry in question. Strictly speaking, the wool is not wool at all, but cotton. It is a type known as "tree-cotton" because the fiber is kinky and strikingly wool-like. From most people's viewpoint, however, the most remarkable thing about it is that it grows on trees, which attain a height of something like 15 feet. The notion of climbing for cotton seems rather picturesque, but in actual practice the trees will be kept cut down to a size suitable for making picking easy. Their trunks, in the course of a few years, reach a thickness greater than that of a man's thigh, and their large and heavy branches bear a profuse crop of fluffy white bolls.

Comes From Australia. This wool-cotton comes from Australia, and it is understood to be a cross between our own sea island cotton and a certain Peruvian type which has a wool-like fiber. It is an interesting circumstance, by the way, that all of the large quantities of this Peruvian cotton imported into the United States is used by our manufacturers in the production of "all wool" fabrics. As for the hybrid from Australia, it is especially valuable, combining as it does the long staple of the sea island with the woolly texture of the South American parent, and possessing the additional advantages of heavy yield, great ease of picking, and a higher percent of lint than the sea island cotton affords.

Only the Beginning. This, however, is only the beginning of the story, for experiments made in Hawaii have already shown that wool-cotton trees can be grafted and budded just like fruit trees. Thus any vigorous trees of the kind can be used as stock on which to bud the finest varieties of wool-cotton—the process, as nearly everybody knows, consisting in cutting a bud, with a piece of bark attached, from a plant of the desired strain, and inserting it in an incision made for the purpose in the stock. It is now planned to grow seedlings of a vigorous sort in the nursery, to be grafted with common fruits, and when these are two or three years old, to bud them. Practically every bud inserted grows. Indeed, the experiment in charge at the government experiment station, on the island of Oahu, says that "the day seems near at hand when one may purchase budded seedlings of wool-cotton by the hundred or thousand. These will be planted out in orchards like so many fruit trees, and a full year of cultivation will be saved."

This, of course, is wholly a new discovery. But it is not the only one made in connection with this interesting investigation. The experts have found much to their own astonishment, that they can take ordinary cuttings of the wool-cotton tree, plant them in the ground, and grow big trees from them. The cuttings take root immediately, put forth leaves, and presently become thriving plants, assuming at first a bushy form. The importance of this is obvious enough. Cotton ordinarily, in our own southern states and elsewhere, is grown from seed. Consequently there is no uniformity in the plants produced. Nobody can tell how a seedling is going to turn out. On the other hand, when cuttings of a superior strain are planted, results are absolutely certain, and all of the plants grown from them will meet the specifications for that strain. In a word, this method of planting will enable growers to produce a certain unvarying and highly desirable grade of wool-cotton right along, year after year.

Deafness Cannot be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed, it is entirely closed, and the perfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever; this case is cured by the use of the Mucous Membrane Cure, which is a perfect cure for the mucous surfaces. We will give One Hundred Dollars for any case of deafness caused by catarrh that cannot be cured by the Mucous Membrane Cure. Send for circular free. Sold by Druggists. J. C. CHENEY & CO., Toledo, O. Take Hall's Family Pills for constipation.

expensive, because of the growing demand for it as food, and, to take its place, great quantities of soy-bean oil are being imported from China. This valuable seed, by the way, is the most important agricultural product of Manchuria. The beans pay duty, but the soapmakers have managed to persuade congress to admit the oil free. Mexico Makes Soap. All the cotton seed oil produced in Mexico is converted into soap. In the Laguna district (the great cotton-growing region) one firm, whose headquarters are in the United States, monopolizes the business of soap-making. The oil is utilized for both laundry and toilet soaps. Apart from soap-making, however, it has few industrial uses. Candles are made from it, and the residue from the refining processes is converted into phonograph cylinders.

The cotton crop of the United States amounts to an average of 12,000,000 bales per annum. Selling at 14 cents a pound, it brings the farmers \$340,000,000. The seed incidentally produced amounts to about 5,000,000 tons, of which one-fifth is used for planting. It seems quite possible that at a future day cotton will be grown as much for seed as for fiber. When that time arrives, the southern farmer will get as much per bushel for his cottonseed as the western farmer receives for his wheat. The price paid to farmers for their cottonseed 20 years ago was \$6 to \$7 a ton; they now get \$25 to \$30 a ton. At \$25 a ton, it nets them \$37,500,000, and, when duly converted by various processes, it is made to yield \$100,000,000 worth of products, the edible output of the refinery, in the shape of table oil, lamp substitutes, etc., being alone worth much more than half this enormous sum. Rene Bache.

ACCUSED SENATOR PREPARING DEFENCE

Columbus, Ohio, May 20.—I. R. Andrews, state senator, is one of the

men indicted on charges of alleged grafting in the legislature. He has given bail and, with counsel, is now outlining his defence. His home is at Irontown. TO TALK OF TOBACCO EVIL TO LAMAR SCHOOL PUPILS. Physical director H. L. Mitchell, of the Y. M. C. A., will address the pupils of the Lamar school Monday afternoon on the effects of the use of tobacco. This subject is one of the principal requirements for membership in the grammar school league and all who belong to the league are required to take a pledge to abstain from the use of it. All kinds straw and Panama hats at Bryan Bros.

SETS OF "WAR EXTRAS" READY FOR MAILING. A few sets of the extras issued by The Herald Tuesday and Wednesday, May 9 and 10, during the battle of Juarez, have been wrapped up ready for mailing. They make very interesting souvenirs to keep or to send back east. 50 cents a set. Suits made to your measure, \$20 to \$40, at Bryan Bros. Mut and Jeff are with us. Another appearance today on Classified page. Every day in The Herald hereafter.

The Hope Of the Brooklyn Team

Cy Barger, the big fellow who is the only hope of Red Doolin to win a game now and then for his Brooklyn Dodgers. When anybody else is in the box, the boys generally enjoy the spectacle of their opponents making a dozen runs or so, while they keep well within the three mark, sometimes three runs below it. But Cy Barger is different. His last out, against St. Louis, marked the holding of Brenahan's Cardinals to a lone tally, while his teammates fell upon everybody Roger sent to the slab, gathering in a total of 11 runs. Barger, if with a better team, would be in the first flight among National league twirlers.
