

Medical Doctors Are Afraid of the Osteopaths

(FROM CHICAGO TRIBUNE, JULY 27)

Afraid to accept their challenge to a cure test of 800 patients to be divided among the different schools---every kind of disease---the one who lost the least number to take the prize. The Osteopaths even offered a purse of \$10,000 each, making \$40,000, to go to any charity.

Still the medical doctors were afraid and thus acknowledged the Osteopaths to be superior to any method of healing known to the world. Would you want to put your loved ones in the hands of a profession that realizes that they cannot cope with another?

Would any honest man stay in a profession like that and realize there was a better way and that he was slaying hundreds of precious lives? Well, I should say not. If they have any love for humanity they would accept the challenge of the Osteopaths and, as our beloved president, Dr. Arthur G. Hildreth, said, "We wish to make the test for the sake of suffering humanity---to ascertain which school is best able to cope with disease." For among those Osteopaths were hundreds of graduates of the leading medical colleges who had given it up and studied Osteopathy, because they claim, like the great typhoid fever specialist, Dr. Jones, that when they gave drugs they lost from 75 to 200 out of every thousand, while now they average only about one. And it is the same with all other diseases. Out of 4,000 cases of obstetrics Dr. Chas. Still never lost but one case and never had a laceration. They claim that the drugs they used to give would kill a well man, and they ought to know. No wonder Osteopathy has taken nearly every state in the Union in only seventeen years. And the Dr. A. T. Still Osteopathic Infirmary has lost but eight patients out of eight thousand of every kind of disease. For the medical doctors know as well as you do that Osteopathy is the only way to cure diseases or they wouldn't be so afraid of them. NEVER WAS THERE A GREATER CONTEST OR ONE OF MORE VALUE TO HUMANITY SINCE ELIJAH PROVED WHO WAS GOD IN ISRAEL IN HIS GREAT CONTEST AGAINST THE 450 PROPHETS OF BAAL. And he put them out of business and the people said, "It is well." So that is the best way for us to prove who is curing the people and who is filling up these grave yards with people in the prime of life---one-third with consumption, one-fourth with typhoid fever, one-tenth with cancers---all caused by exhausting the nerves by stimulants and poisons and anti-toxin excretions from diseased animals.

The Chicago Tribune, July 27: "Osteopathy will not get a chance to make good its challenge to its opponents in the medical world."

"The most important of these, the American Medical Association, refuses to 'play.' Likewise the American Institute of Homeopathy and the American Association of Eclectic Medicine."

"The osteopaths wanted to decide which method of treatment is best. The American Osteopathic association meeting at the Hotel La Salle offered to divide 800 patients among the four schools. The banner was to go to the school having the least fatalities."

The Tribune, July 29, further says: "The American Osteopathic association sharpened the point of its challenge to the eclectic, allopathic, and homeopathic schools yesterday by a wager of \$10,000. Each of the contestants in the 'cure test' tournament, according to the revised plan, is to put up \$10,000, winner take all, and the proceeds to go to whatever charitable institution the winner names."

"It would be the easiest way I know of adding \$40,000 to the endowment fund of our A. T. Still Research Institute," Dr. Charles D. Still, Kirksville, Mo., said yesterday.

Challenge Gets No Reply. "Dr. Still is the son of Andrew Taylor Still, the 'father of osteopathy.'"

"The convention, however, ended last night without a response from any of the schools of medicine challenged to show their mettle in practice upon 800 patients."

Just listen to the flimsy excuses made by the medical doctors when seen by the reporters of the Chicago Tribune:

"When the osteopaths have qualified themselves as physicians we will consider the discussion of such a contest," asserted Dr. George F. Suker, secretary of the Chicago Medical Society. "When I first read the challenge I thought perhaps it was something that could be done. But what is the use? What could we gain by it? For us even to participate in such a thing would give the osteopaths an influence they do not deserve."

See Benefits in Osteopathy. "All allopaths admit there is some-

thing in scientific massage. They use it frequently. Rubbing is beneficial at times. But when osteopaths claim to remove an abscess from the brain, set a bone, cure typhoid fever and pneumonia, it is carrying the thing too far."

This Dr. Geo. F. Suker says: "When the osteopaths have qualified as physicians." The facts are that at least a hundred of those osteopath doctors held diplomas from the leading medical colleges of America, which they had discarded as worthless and studied osteopathy. Besides, fifty of them were State Medical Examiners, and every living soul of them held diplomas from recognized osteopathic schools. See what a contemptible cur he was. He says,

"What would we medical doctors gain by it?" Well I should say, "You wouldn't gain by it, but suffering humanity would about five million lives annually, while you would simply get such a jar you'd never wake up." This Dr. Suker says there is something in scientific massage, and that they use it frequently. The facts are osteopaths never massage. They find the abnormal conditions of the spine which is pressing on the nerves or blood vessels or other organs and restore them to normal. And there isn't a medical doctor in America except those who have studied osteopathy that would know an osteopathic lesion if they would see it. Nor would they know any more about fixing it than a

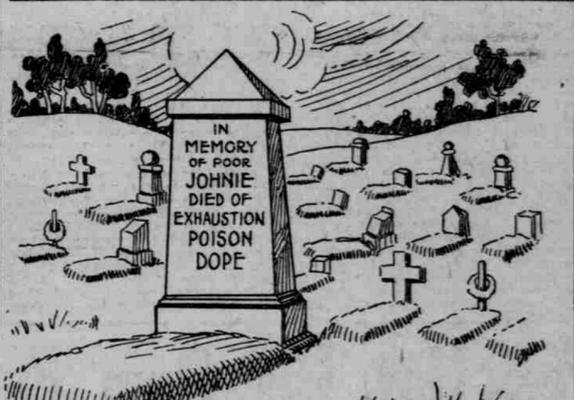

cannibal would about conducting a Sunday school convention.

He says, "When osteopaths claim to cure, an abscess of the brain, typhoid fever, or pneumonia, it is carrying it too far." The great typhoid fever specialist, Dr. Jones, who is a reformed medical doctor himself, says he only lost one case of typhoid fever out of 1146 by osteopathy, while under drugs he used to lose from 75 to 200 out of the same number. And he was the best they had. He says no well man could take the drugs they give the sick and live. Dr. Mayo, the great surgeon, says the same. Nearly every one of these cases of fits we have cured here in El Paso have had abscess on the brain which we cured by loosening the nerves that surround the blood vessels of the

brain and they absorb the abscess, just as we loosened the nerve to the blood vessels of the brain and stopped that awful hemorrhage from the brain when all the surgeons had given him up to die after he had bled a bucket full. Oh! we know what we are doing all right when we offer you forty thousand dollars to try your hand. There is a hundred cases of pneumonia right here in El Paso that were given up in many instances by the dopers that we have cured and never lost a case. So the thing for the poisoners, stimulants and injectors of anti-toxins from diseased animals to do is to stop lying about the osteopaths and come up and show your hand or go way back and sit down among the relics of barbarism. For you are a dead profession and you have

defied the truths of the living God by putting these intemperate cups to your neighbor's lips, and you are now reaping his wrath, and instead of bathing yourself when you come in contact with any disease (Bible) you inject the excretions of diseased animals in you, and are thus spreading disease among humanity, and so weakening them by your poisons and stimulants that according to you medical doctors, you have left humanity in such a weakened debauched condition that one-third die in prime of life with consumption, one-fourth with typhoid fever, and one-tenth with cancer. And now the people have risen up in their wrath and 43 states have passed laws in favor of osteopathy and pronounced you a dead profession. And the osteopaths by this contest have made you acknowledge it yourself.

Look at Poor Johnnie and Then You Can See Why the Dead Wagon Is Continually Backed Up to These Medical Hospitals and They Shove Them Out Through the Windows and Back Doors in Doves to Keep You from Knowing It, While They Stand at the Front Door and Smile and Lure You In---"Come Into My Parlor Said the Spider to the Fly"---They Always Remind Me of Moths Around a Lamp: While Thousands Lay Dead at Their Feet Other Foolish Ones Rush in and Are Destroyed.

through the windows and back doors and hurrying them home so they could die there and they would keep people from finding out what a drove died each year from their poisons and carvings. While at the Osteopathic Infirmary, where there was three or four times as many being doctored everybody was smiling and getting better and no dead wagons continually marring the scenery. How can the mothers and fathers cry to their offended God in the hour of their affliction.

Who wrote "Cursed is he who putteth the intemperate cup to his neighbor's lips." All poisons are intemperate and exhaust you unto death. God said: "If any man come in contact with anyone who hath any kind of an issue from the flesh, go bathe thyself." Not inoculate yourself with the vile excretions from diseased animals with your vaccinations and anti-toxins.

YOU HAVE BRANDED GOD AS A LIAR AND YOU ARE REAPING THE CONSEQUENCES AT THE RATE OF 7,552,500 DEATHS ANNUALLY, THOU FOOL. "For the Fool has said in his heart, There is no God."

God has said: "IN THE BLOOD IS THE LIFE OF ALL FLESH." It is mixed in God's own laboratory and it made every organ in you. And you can get it to circulate in the part where the stagnant blood is decaying and causing what ever disease you are suffering with. By freeing the nerves by Osteopathy where these poisons have congested it at the spine and shriveled and exhausted it. And it will be restored to its normal condition and force the circulation of the blood and you are well again. And you can help by cold and warm applications and baths, and fruit juices and proper foods. And there is no use in VIOLATING any of God's laws by the use of poisons and excretions from diseased animals and stimulants and electricity. For Osteopathy has proved it the world over by only losing about one case in a thousand in every kind of disease. For out of eight thousand cases of every kind of disease at the Dr. A. T. Still Osteopathic Infirmary there was only a loss of eight. For it is in perfect harmony with every law of Nature and God. And therefore it will some day be improved on but never changed. For the laws of God never change. No wonder 43 states have made laws in its favor and appointed entire or in part medical boards of Osteopathy to examine the doctors. For it has taken the world, and now has 7000 doctors scattered all over the United States and Europe and is only 17 years old. There never was such progress made in the history of the world in any other science.

7,552,500 DEATHS DUE ANNUALLY TO DRUGS AND ANTI-TOXINS

Poor Johnnie died of Exhaustion, Poison Dope and Anti-Toxins, Poisons from Diseased Animals.

Dr. Jones, great Typhoid Fever specialist, who lost only one by Osteopathy out of 1146 cases, said: "No well man can take the drugs and anti-toxins given to sick people and live."

Dr. Mayo, the greatest Surgeon of America, said: "No intelligent man ought to spend two hours in the study of Materia Medica. It is a dead profession and all drugs are poisons and exhaust instead of build up the patient." According to the Medical Doctors themselves. They have left us in such a condition of exhaustion and shriveled nerves from poisons and stimulants that one-third of the Johnnies and Marys, and Mothers and Fathers die in the prime of life with consumption. That is annually die with consumption 1,500,000 One-fourth annually die with Typhoid Fever 1,125,000

One-tenth annually die with Cancers 450,000

Total deaths caused by drugs 3,075,000 Deaths by other diseases 4,500,000

Total deaths by drugs 7,575,000 If they had all been doctored by Osteopathy there would have been no Consumption, Typhoid Fever or Cancer cases. That would have saved annually 3,075,000 Out of the 4,500,000 other diseases we would have lost only 22,500 and saved the lives of 4,477,500

Total lives saved annually by Osteopathy 7,552,500 That would have died under drugs.

No wonder the shrewd business man brought his wife to us, as thousands of others have done, when he saw the dead wagon backing up to the drug hospitals and they kept poking them out

The Home of Happy Johnny Osteopath

Whose father is a wise man, and believes God meant just what he said when he wrote, "Cursed is he that putteth the intemperate cup to his neighbor's lips." And, "If any man comes in contact with any man who hath any issue from the flesh, go bathe thyself." And, "In the BLOOD is the life of ALL FLESH." It made every part of your body and if you restore the circulation by Osteopathy it will carry out the stagnant, decaying blood that is

causing the disease, and you are well again. That is why the Dr. A. T. Still Osteopathic Infirmary has cured eight thousand with a loss of only eight. And 43 states have recognized it as the only way to cure disease. For it is Nature's way. And the curing of the greatest percent of all kinds of diseases of any science ever discovered proves it the only way to cure diseases and keep us well and happy. And no danger from Consumption, Typhoid Fever and Cancer.

Poor Little Johnny.

His nerves are already exhausted and have allowed stagnant blood to accumulate and decay and caused the disease. Now these nerves will be utterly exhausted and shriveled up fighting the diseased matters of the anti-toxins and poison drugs they are injecting into him. He will seem better while the poisons last and they will say, See how he is improving. Then he will go into some chronic disease. And more poisons will heal it up. Then the stagnant blood will overtax the poor, tired lungs.

Consumption the Result. One-third of us die in the prime of life with consumption, one-fourth the digestive organs exhausted into typhoid fever victims, and one-tenth die with cancers. No wonder Dr. Mayo, the greatest surgeon of America, said: All these anti-toxins are simply poisons from diseased animals and all drugs are simply irritating poisons which exhaust the nerves in the end and some chronic disease or death is the result. He says you claim the patient is getting better and it seems so while the poison is in the system and is irritating it up. And if the trouble is only slight they may live in spite of you. But the death rate is so great against you that "no intelligent man ought to spend two hours in the study of Materia Medica. It is a dead profession and we let them die in their hotels and on their way home when they come here with all the vital-

ity exhausted from poisonous drugs and anti-toxins, for they would say we killed them on the surgeon's table, when in fact you killed them before they left home."

Dr. Jones, the great Typhoid Fever specialist, who only lost one case out of 1146 by Osteopathy, when he had lost from 75 to 200 out of the same number under drugs, was right when he said: "No well man could take drugs and live, that are given to the already exhausted sick people. No wonder the dead wagon is continually backed up to these various medical hospitals and they poke them out through the windows and back doors and fill them up on poison dope and rush them off home before they die on their hands, while at the Osteopathic infirmary, where three or four times as many are being doctored, everybody is smiling and getting better. And there is only one death out of a thousand. You cannot put these intemperate cups of poison and stimulants to your neighbor's lips and not reap the consequences of an insulted God, who wrote, 'Cursed is he who putteth the intemperate cup to his neighbor's lips.' YOU ARE BRANDING HIM AS A LIAR. And you are REAPING HIS WRATH in the loss of your loved ones. HEAR THE VOICE OF RACHEL WEeping FOR HER CHILDREN. And she would not be comforted because they were naught."
