

Scorching, Fiery, Raw Eczema

Zemo Cures Worst Cases and Is a Wonder for Every Form of Skin Afflictions.

Get the 25-Cent Trial Bottle Today.

The positive proofs that ZEMO cures any and all forms of skin afflictions have aroused the entire community. The wonderful way in which raw, fiery eczema quickly heals by the magic touch of ZEMO is marvelous.

FLIGHT MEANS GREAT LOSS TO MORMONS

Property of Colonists in Mexico Worth \$7,000,000 or \$8,000,000.

Salt Lake City, Utah, July 28.—Seven to eight million dollars is the valuation placed by the presiding bishop of the Mormon church upon the property of the Mormon settlers, which they will be compelled to abandon on leaving Mexico.

Working balance in treasury office, \$24,578,952. Disbursements, \$1,207,755. Deficit to date this fiscal year, \$2,458,268.

A Skin of Beauty is a Joy Forever.

Dr. T. Folik's Oriental Cream or Magdalo Beautifier.

THE TERROR BEASTS -- By Garrett P. Serviss

Monsters Of Teatonic Folk-Lore Belittled By Fossils Found In Germany

NEAR the old city of Halberstadt, famous among traveling Americans for its beautiful specimens of ancient wooden architecture, there has lately been discovered, in digging for brick clay, a cemetery of extinct monsters of the tribe of the dinosaurs, which has not only aroused the enthusiasm of German paleontologists (a paleontologist is one who studies the life and remains of ancient creatures of the earth) but has also attracted the special attention of the emperor, who, delighted with Mr. Carnegie's gift of a plaster of paris model of the gigantic American diplodocus, is now pleased to find that German soil is capable of showing up something of the same kind, if not of equal magnitude.

A gigantic skeleton foot of a dinosaur.

Excavated bones ready for removal.

claws of these monsters suddenly protruding from the ground, as it is opened up at a great depth in the peaceful pursuit of clay digging, is an experience calculated to thrill the nerves of the most indifferent on-looker. One can comprehend the enthusiasm of the paleontologists when such a discovery is made. Their delight is of a higher order than that of the gold seeker when his pick discloses a huge nugget of precious metal. They are digging up history which may be millions of years old. They are uncovering the old earth as it was in the days of the flying dragons. They are treading upon some of

the very soil that was trod by the monsters themselves. Let us consider the dinosaur. He was the wonder of the planet in his time, the modern name means "terrible lizard" from the Greek words, "terrible," and "sauros," "lizard," because he had some of the physical characteristics of the innocent little lizard of our day. Sometimes, in some of his forms, he attained an almost unbelievable stature. The diplodocus was 75 or 80 feet long, and 29 feet tall. Others were probably as large, such as the brontosaurus, "giant lizard" from brontos, "a giant." These creatures, varying in size, but always terrible in appearance, were scattered widely over the earth in very ancient times. They have been found in America, Europe and Africa, but as far as we know at present the American species held the pre-eminence in size.

But so much would not be gained for knowledge if the paleontologists were content simply to dig out the remains of these tremendous beasts, and to put their skeletons together and set them up to be gazed at in museums. The most astonishing discoveries have been made by studying their structure, and comparing it with that of other animals. Thus it was found that some of these gigantic creatures were apparently predecessors of the bird. Some of them had feet like those of birds. Others bore many resemblances to the modern ostrich. Afterward there arose species of birds which had jaws and teeth, showing their reptilian origin.

One of the most significant facts about the dinosaurs is that some of the largest of them were filled with cavities, the apparent reason for which was to insure relative lightness together with strength. Nature knew the great strength of a hollow tube before man had reasoned it out. A dinosaur with hollow bones could grow to a great size without becoming so weighty that he could not run. Some scientists believe that the running birds of the present are descended from some of these creatures. The real flying dragons of ancient times and the remains of some have been found in the rocks of the present day. One of the things which most strikes the mind in studying these creatures of the past is the evidence that nature, as well as man, proceeds by means of experiment. She has not

developed her creatures suddenly, full formed, but by long processes of evolution. There is no evidence that man-like animals lived in the time of the dinosaurs. These giants were then the masters of the earth. They had small brains but big bodies. Yet they had SOME brain, and they forged an unquestionable link in the chain of life upon this globe. Never was the power of the human intellect better displayed than in the forecast which the great French naturalist, Cuvier made concerning the former existence of gigantic reptiles, such as the dinosaurs. Cuvier declared, as the result of his studies, that there had been a period when our planet was inhabited by reptiles of an appalling magnitude, possessing many of the features of modern quadrupeds. Almost nobody believed him. People thought he was drawing too much upon his imagination. But he knew that the imagination, when kept under proper control, is the surest guide to new knowledge, and it was not long before discoveries were made which fully established the truth of his opinion, and then all men of science recognized the fact that there had been an "age of reptiles." It was during this age that the dinosaurs flourished, and every stroke of the pick disclosing a giant skeleton in the diggings near Halberstadt is a fresh confirmation of the foresight of Cuvier, when that vision of a wonderful lost chapter in the history of the earth arose before his masterful mind.

**DAILY RECORD**  
Building Permits.  
To J. C. White, to build a one story brick tenement house, Eighth street, between St. Louis and Stanton streets; estimated value \$2400.  
To Atlas Brick company, to erect a frame garage, Dallas street; estimated cost \$50.  
To John H. Grant, to build a shed, corner of Brown and Nevada streets; estimated cost \$10.  
Deaths Filed.  
Central avenue, between Westoby and Westoby Cass, died wife of J. E. Bischoff, July 11 and 12, block "A," consideration \$400; July 19, 1912.  
Ysleta, Tex.—Benigno Alderete to Francisco Solis, 2.8 acres Ysleta grant; consideration \$1000; July 23.  
Port Boulevard, between Byron and Ord street—E. E. Perry and wife to W. J. McDermott and wife, lots 29 and 21 and west 15 feet of lot 15, block 40, Grandview; consideration \$500; July 11, 1912.  
Michigan avenue, between Encalypus and Laurel streets—Juan Carlo to George E. Brown and Nevada streets; consideration \$500; July 29, 1912.  
Corner of Louisiana avenue and Frankfort street—Westoby Cass and wife to J. E. Bischoff, north one-half block of Brown street, lots 2 and 3, consideration \$400; July 15, 1912.  
Park, between First and Second streets—B. Dockery to Ed B. Jones, lot 14, block 7, Magdalo; consideration \$30; Park street; consideration \$1100; July 28, 1912.  
Wright avenue, between Nevada and California streets—Charles L. Baron to George E. Brown, lots 2 and 3, block 57, Franklin Heights; consideration \$1200; July 28, 1912.  
Hot Wells, Texas—John D. Hackett and William L. Smith to N. L. Ward, lots 2 and 4, block 72, Hot Wells; consideration \$1; March 7, 1912.  
MANY LAND AGENTS  
Dalhart, MAY VISIT TO DALHART  
Colonization and immigration proposition in the history of northwest Texas has been 2000 years. Over 20 representative land agents from as many different states are here familiarizing themselves with local conditions of the Dalhart country. They arrived on the Rock Island road and will remain several days. The party was entertained on the ranch of Ed. C. Williams. Several days will be spent in viewing the Capital and the E. O. & W. railway lands.

SARPINTS AN' SICH

By ELBERT HUBBARD.

THERE are several things in New Jersey besides mosquitoes, Jersey justice, Jersey lightning and presidential timber. Came to Roycroft not long ago a young man by the name of Foster, from the town of Elmer, N. J. He had three grips—one on his dignity, one for his clothing, and the other grip was full of snakes. They seemed like kindly, gracious, generous snakes, filled with frogs and intent. Some of these snakes were black, with yellow spots on them, and underneath the snakes were pink, with art colored geometric studies. These few were green, and one was a bright purple.

Snakes of the same variety take on rich colors at different times of the year. In time snakes will become an extinct product in America. There are very few now as compared to what there were 50, 40, 30 and 100 years ago. Civilization is at war with the snake, and deep in the heart of man is a prejudice against this pleasing "insect."

When Snake is Safer. In any event, the snake is much safer when crawling and wiggling along on the ground than if he walked upright like a man. So the change wasn't wholly a bad thing.

When Snake is Safer. In any event, the snake is much safer when crawling and wiggling along on the ground than if he walked upright like a man. So the change wasn't wholly a bad thing.

and before the hurryup wagon arrives, the wonderful blond girl with the wealth of golden hair, why always the assistance of the snakeologist. Suddenly she recognizes him as her long lost lover.

The policeman enters, and thinks sure that he has 'em. He hesitates to make the arrest, accusing the hotel man of violating the excise. The hotel door is hastily locked by the girl with the golden hair in order to keep the properties of the scientist from escaping. The policeman cannot get out to join the colored man, much as he would like to.

The naturalist wears a snake for a necktie; another one for a belt; a turtle is on his manly breast for a badge, and a horned toad is used for a watch fob.

The golden girl, to show the policeman and the hotel clerk that nothing is dangerous, when your mind is rightly poised and focused on beautiful things, decorates her hair with the various insects of the naturalist, all right on the head of the golden girl, and small turtles are distributed as souvenirs among the guests who have by this time pushed their way in from the elevator and other parts of the building.

The wranglers in the corner plays the wedding march from Lohengrin. All ends happily as the door is opened and the policeman slides out for fresh air and to render his report.

That Beautiful Grove. SMITH JOINS REBELS; ESCAPES EXTRADITION

The Detective After Him Is Given Five Minutes to Leave Town.

J. Willy Smith, the alleged bank embezzler of Atlanta, Georgia, will join the rebel cause and as a result will be given his freedom from the Juarez jail soon. He told Gen. Pascual Orozco Monday that he wished to become a rebel, providing the rebels protected him from the American officers and they say Smith will be given his liberty to show his sincerity to the rebel cause. Smith at present is still in jail, but he is allowed many liberties by the rebels by Orozco's special order.

Following the announcement of Smith's wish to fight for the rebel cause, O. C. Turrell, a Pinkerton detective, who has been in Juarez for the last two weeks trying to have the rebel authorities extradite Smith, after he succeeded in having them arrest the Georgia banker, was given five minutes to leave the city by the rebel officer Monday evening. The alternative offered him by the rebel officer was to go to jail, or he took the car designated and will not go back to Juarez. This is the first protection which the rebels have begun to give Smith, and it indicates that they intend to stand by him on account of his decision to be a rebel in Orozco's army.

Motherhood

The highest point of woman's happiness is reached only through motherhood, in the clasping of her child within her arms. Yet the mother-to-be is often fearful of nature's ordeal and shrinks from the suffering incident to its consummation. But for nature's His and discomforts nature provides remedies, and in Mother's Friend is to be found a medicine of great value to every expectant mother. It is an emulsion for external application, composed of ingredients which act with beneficial and soothing effect on those portions of the system involved. It is intended to prepare the system for the crisis, and thus relieve, in great part, the suffering through which the mother usually passes. The regular use of Mother's Friend will repay any mother in the comfort it affords before, and the helpful restoration to health and strength it brings about after baby comes. Mother's Friend is for sale at drug stores. Write for our free book for expectant mothers which contains much valuable information, and many suggestions of a helpful nature.

BRADFORD REGULATOR CO., Atlanta, Ga.

MAN IS BUT A WILD ANIMAL

London, England, July 30.—The recent address of ex-premier Arthur J. Balfour before the first International Eugenics congress, which is now in session here, has stirred up considerable comment among the scientists attending the convention. Mr. Balfour said

in part: "Eugenists do not say that survival is everything; we deliberately say that it is not everything. The truth is that we ought to have the courage of our opinions and we must regard man as he is now as being from the point of view of eugenics a wild animal, and if we have to carry out to its logical conclusion the most scientific work which is being done by a congress of this sort man must become a domesticated animal."

SANDERSON VOTE IS A SMALL ONE

Sanderson, Tex., July 30.—Only 45 votes were polled in the primary election here Saturday. Colquitt, for governor, got 25 of these and Ramsey 10. Sheppard for United States senator received 12 and Walters 28. This is only about one-third of the voting strength of the Sanderson box. Very few railroad men participated in the election. Fletcher Bros have begun work on the new well for an independent company recently organized here. The company is putting the well down for the use of the individual members only. Fred Franks and Mrs. Viola Franks were united in marriage here at the Terrell hotel, Jesse McKee officiating. They will reside at Juno, Val Verde county. Judge J. R. Ross and wife have gone to Batesville on a business trip. They expect to be gone about a week. Sheriff J. J. Allen has arrested an 11 year old boy, a runaway. He beat his way from San Antonio to this place, and intended going further west. He will be returned to his parents at San Antonio. Mrs. C. T. Partin of Beaumont, has joined her husband here. Mr. Partin recently resigned as manager of the Sanderson Waterworks company. R. A. Stewart who has been quite sick, is able to be about.

MISSING GIRL HELD FOR RANSOM?

Mount Vernon, N. Y., July 30.—Miss Dorcas Ijams Snodgrass, a pretty young nurse of the Mount Vernon hospital, has been mysteriously missing since July 17. Wealthy relatives of the young girl, who live in various parts of the south, have announced their willingness to finance a search for the missing nurse to all parts of the world. It was at first thought that the young woman had eloped with a Dr. Smith, who resigned as house surgeon from the hospital two days before Miss Snodgrass disappeared, but her sister, Mrs. John L. Crider, with whom she was stopping, stoutly denies this rumor, declaring that Dorcas was engaged to Edgar J. Schmidt, an electrical contractor. The police having received a tip that a young woman is being held a prisoner in one of the apartment houses of the uptown residential sections of New York has caused a finecomb search of the district to be inaugurated by the detectives of that city.
