DEAFNESS CANNOT BE CURED. By local applications, as they cannot reach the diseased portion of the ear, there is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed deafness is the result, and this condition cannot be cured by any local means, as they do not reach the seat of the disease. It is essential that the inflamed mucous lining of the Eustachian Tube should be brought back to its normal condition, and this can only be done by a course of treatment which will destroy the cause of the inflammation, and thus prevent its return. We will give One Hundred Dollars for any case of deafness (caused by otitis) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & CO., Toledo, O. Sold by Druggists.
