

# Think of the Thousands of Unhappy Homes and Broken Hearts All This Has Made This Christmas

Gee, I wish my mother had a lick of sense—all the rest of the family are dead but me.

No wonder Poor Little Johnny will either fill a consumptive's or a drunkard's grave. All his vitality exhausted by poison, dope and excretions from diseased animals.

More than the entire inhabitants of South Dakota are exhausted each year into consumptives and cancers by drugs and stimulants.

Tubercular conference of physicians and scientists say no cure for consumption but rest.

All nerves are exhausted to the part of the body before you can have any disease.

Then why whip them up with more poisons or stimulants and make them worse, and invariably bring death.

Dr. Magendie, head of Hotel Dieu, France, says medicine is a humbug. He made the great test, gave one-half nothing—or bread pills—only lost one out of a hundred. Doped the rest according to medical rules—lost twenty to forty out of each hundred—same kind of diseases, and proved that medicine—not disease—kills.

## Headache Powders Are Making Drug Fiends

Associated Press Dispatch.

Topeka, Kas., Feb. 2.—Headache powders are making drug fiends of many Kansas people. Dr. S. J. Crumline, secretary of the state board of health, told that body at a meeting here today.

The board immediately appointed a committee to make plans to stop the sale in Kansas of acetanilid, which Dr. Crumline says is the chief component of many headache remedies.

"Acetanilid is taken by habitual drug users almost as much as morphine and cocaine," said Dr. Crumline, "and it is almost as dangerous as either. It does not cure headache, but numbs the pain. The drug reduces the number of red corpuscles in the blood and many sudden deaths are due to it."

## 60,000 Go Crazy Annually

Preliminary Census by Government Shows Increase of More Than 25 Per Cent in Sixteen Years.

### VARIOUS MINERAL WATERS LOSING THEIR POPULARITY.

Dr. Miller fenced his hogs off from his famous sulphur springs in Missouri because it exhausted the kidneys of the hogs and produced death. Yet thousands of people took it for kidney troubles and, of course, seemed better for a time, but afterwards generated Bright's diseases and death was the final end. The same as the hogs.

Farmers fed salt and sulphur to horses and cattle to keep off flies, but the young were prematurely born, and nearly all were deformed or blind, yet hundreds of mothers take it in blood purifiers and think it is great, then wonder why providence has seen fit to bring into the world their offspring in a weak and maimed condition.

Below Bowling Green, Ky., they closed up their great health resort which had produced so many famous cures when they found the water was but drainage from the city. Strange how the human race will irritate themselves with any of nature's sewers, or poisons, or stimulants, and because it excites the nerves up to throw the poison out they seem to be better for a time. But sooner or later they awaken to the fact that they have exhausted the kidneys into Bright's Disease, or the system into consumption or cancers, or drop over dead with heart disease, the same as they did from absinthe until the government discovered so many deaths following in its wake that last October they banished it from the United States, after it had been lauded to the sky as such a wonderful cure-all, and formed the basis of so many different drugs. Osteopathy restores the circulation by freeing the nerve and giving it its normal strength. Then it throws the poison out and you are well again, with no bad after-effects.

## Dr. A. T. Still Osteopathic Infirmary

Dr. Ira W. Collins, Physician-in-Chief; Dr. Amelia Burke, Dr. Grace Parker, Dr. Paul R. Collins, Dr. Anna Reznikov, Operators.  
201 West Missouri St. Corner Missouri and El Paso Streets, El Paso, Texas.

## Think of All the Happy Homes Osteopathy Has Made This Christmas

Mr. J. B. Cass, 318 Bliss street, had his eye blinded and badly lacerated by an iron rod, was cured by Osteopathy. One side of eye bursted and was an inflamed mass, nerves were freed so they could not congest at spine and would be free to force the circulation, and the places were rapidly rebuilt by the blood, which made the eye in the first place, and it is rapidly recovering.

Dr. George Still, the chief surgeon of the A. S. O. Hospital, who, like the Mayo Brothers, is among America's greatest surgeons, turns all his cases over to the Osteopaths as they recover so rapidly without the great per cent of loss of life where drugs are given. He says there will soon be no other way of handling surgical cases.

## 8000 Have Tried Osteopathy and Are Happy With a Loss of But Eight Patients As They Testify Below

This certifies that I, G. L. Hannan, am a notary public in and for El Paso County, State of Texas, and that I took the statements of the leading people of El Paso, who had been treated at the Dr. A. T. Still Osteopathic Infirmary, under Dr. Ira W. Collins, for nearly every disease you can think of, and they verified the fact that they were cured, and were enthusiastic in praise of the Osteopathic treatment.

G. L. HANNAN,  
Subscribed and sworn to before me, this 26th day of October, A. D. 1910.  
A. S. THURMOND,  
Notary Public in and for El Paso county.

### ASTHMA.

I took the statements of asthmatics who had been given up by physicians, and they are now well.

### BLINDNESS.

I took the statement of a lady who had been afflicted with blindness, and others who had been treated for other eye troubles, and who can now see to read and are perfectly well.

### FEMALE DISEASES.

I took the statements of ladies who had suffered with female diseases; they are now strong and well, and some of them had continued so for years, since taking treatment. They were all enthusiastic in its praise. No operations given in any instance. Tumors had been shed by several.

### DEAFNESS.

I took the statements of the deaf, who can now hear as well as anyone else.

### PARALYSIS.

I took the statements of paralytics who can now use their limbs perfectly.

### CATARH.

I took the statements of catarrhal patients who had shed the adenoids, and some who had had large mastoid abscesses, and all were cured.

### FITS.

I took the statements of those who had had fits, and they are now perfectly well and were loud in praises of the treatment.

### CONSUMPTION.

I took the statements of consumptives and others formerly afflicted with throat troubles, and they are now perfectly well and had been for years.

### LUNG FEVER.

Several people who had been cured of lung fever by Dr. Collins' treatment made the statement to me that after being given up to die they had been perfectly cured by this treatment.

### GALL STONES AND LIVER TROUBLES.

I took statements of patients who had been cured of liver trouble and gall stones by Dr. Collins' treatment, after being considered past relief by physicians.

### STOMACH TROUBLES; INDIGESTION.

I took the statement of those who had been suffering with liver, cramps and stomach troubles and indigestion, who say that they are now able to eat any kind of food and enjoy life.

### BRIGHT'S DISEASE.

I took statements of people who had Bright's Disease in their families, who had been given up by physicians and after treatment by Dr. Collins, were wonderfully cured.

### RHEUMATISM.

I took the statements of those who had suffered with several different kinds of rheumatism, and they claim that they are now perfectly well and have never had it since—in one instance the patient had been treated eight years ago without having had a return of the disease.

### SPINAL MENINGITIS.

I took the statement of those formerly suffering with spinal meningitis, and they were loud in their praises of the treatment.

### CHILDREN'S DISEASES.

I took the statement of mothers whose children were cured of all kinds of children's diseases, and they were enthusiastic in their praise of the Osteopathic treatment.

I took the statement of mothers whose children had suffered with spasms and who could not lift their little heads from their pillows, that are now strong and well.

### TUBERCULAR AND SHRIVELED LIMBS.

I took the statements of mothers whose children had been cripples for years with tubercular and shriveled limbs, who have recovered so completely that they say that no one could tell which limb it was. One young lady assured me that she had been a cripple for nine years, and would still be so but for Dr. Collins' treatment.

### TYPHOID FEVER.

I took the statements of those who had gone through typhoid fever, and all were loud in their praise of the treatment of Dr. Collins, which had cured them.

### SCARLET FEVER.

I took the statement of mothers who had children cured of this dreaded disease by the Osteopathic treatment, and they were enthusiastic in its praise.

### BLOOD POISONING AND OLD SORES.

I took the statement of those who had had blood poisoning ranging from

Hey! Fellers! come drink with me. My mother is the smartest woman in this town. No dope. No consumption. No cancers at our house. No dead ones. My mother sends for the Osteopath for everything. See what good things everybody said to the Notary Public about it.

## THE OLD OAKEN BUCKET

How dear to my heart are the scenes of my childhood,  
When fond recollection presents them to view;  
The orchard, the meadow, the deep tangled wildwood,  
And every loved spot which my infancy knew.

nail in foot to old sores of several years' standing, and it was remarkable how well they recovered after trying all other kinds of remedies.

### NEURALGIA AND HEADACHES.

I took the statements of those who had suffered with neuralgia in its worst form for years, and all kinds of headache, and they in each instance claimed to be cured.

### APPENDICITIS AND ABSCESSES.

I took the statements of those who had been cured of appendicitis, and they were each cured. No operation in any instance. Some had abscesses which opened up and drained and healed nicely.

Think of those you have known who have been foolish enough to let a surgeon scare them into an operation. They are nearly all dead now. Why should you resort to surgery, which cannot cure as great a percent of diseases as Osteopathy can, and no danger from Osteopathy!

All kinds of children's diseases are handled by Osteopaths.

Man—do not know that we often treat them when from two to ten days old and start them right. Many did not know how many children were born un-

der Osteopathy until they saw some of the babies in the paper.

"In the blood is the life of all flesh."—The Bible.

So you see when you whip up a nerve which is all tired out it makes you seem better for a while, but it congests at the spine while you are exhausting it, and in the end you have some fatal chronic disease.

While Osteopathy loosens the nerve and it re-establishes circulation and you are well again.

We loosen nerves in whooping cough and throw the poisons out and you are well again, while so many children are never well after whooping cough, because if they take a stimulant it over-excites the heart, and if they take a depresser it weakens the nerves to the lungs and fills them up. Thus an Osteopath cures without unsatisfactory changes, because he can loosen the nerves to the lungs and stimulate them and at the same time quiet the heart, and because they have such control over circulation is why their cases come out so nicely and recover without future danger and affliction.

We cured the Ardois cases in that part of the city, and all those twenty other cases in that part of El Paso, of every kind of baby disease.

Over two thousand of our cases were children—over two thousand of our cases were female diseases, and we never used a knife nor any kind of drug.

## NEWS OF THE LABOR WORLD; WHAT THE COUNTRY'S UNIONS ARE DOING

The Inland Printer for November, had the following concerning the Union Printers' Home and the retirement of L. C. Shepard, the oldest trustee of the home:  
"It is the unanimous verdict of all visitors that the Union Printers' Home at Colorado Springs is a well-maintained institution. If we were disposed to be patronizing, we might say it was a marvelous undertaking for workmen without business training to handle. But the Inland Printer has always been firm in the belief that the printer is capable of accomplishing anything he wants to accomplish. So for the home management we seek no handicap, and say it has been well managed when compared with any similar institution managed by men selected from any walk in life."  
"The man most intimately and actively identified with the home for the longest period of time is L. C. Shepard, of Grand Rapids, Michigan, who retires on November 1 after 16 years' service as a trustee. He is a type of the printer who is fast passing away."

having an army record and having spent a portion of his life in the front office end of the theatrical business. He was associated with the late Kirk La Shelle—also a printer—until the very evening of that author-manager's great success, since which time he has declined all offers to return to the atmosphere of the footlights. Mr. Shepard prefers to remain at his trade and for a number of years "held down" a proof desk in Chicago. At present he holds a similar position in Grand Rapids, where he owns some residence property.

### Trainmen Ask That Statisticians Make Further Estimates.

Wide difference in estimates on the cost to the eastern roads of the increase asked for by the Brotherhood of Locomotive Firemen and Engineers will necessitate further conferences in New York and perhaps a considerable halt in negotiations while railroad statisticians prepare detailed figures. President C. C. Carter and his associates of the brotherhood first presented demands which the railroads declared

called for increased yearly expenditures of \$20,000,000. Modified demands were then presented, which the managers, who speak for 50 eastern railroads, declared would call for an increase of \$15,000,000 yearly. President Carter contends that \$4,000,000 would cover the increase and asked that the statisticians of the railroads prepare a itemized statement showing just how the grand total of \$15,000,000 would be reached. The statisticians, it was stated, will prepare these figures. The managers declared the increases asked by the brotherhood amount to 56 percent. The first schedule submitted they estimated called for increases of 78 percent.

### Jury in New York Awards \$10,000 to Brakeman Who Lost Foot.

The federal employers' liability act was tested in New York county courts for the first time recently when a jury in the supreme court decided that under its provisions Terrence Burnett was entitled to \$10,000 from the Erie railroad because he lost a foot while serving as brakeman in the interstate service of this line. Under the federal act the plaintiff's counsel contended that the brakeman was entitled to recover, even if he was guilty of contributory negligence, but in that event the damage should be reduced to the extent to which the jury found the brakeman's negligence contributed to the result. Justice Delany took the view contended by the attorney and so charged the jury.

### Technical Fight on 10-Hour Law At Jackson, Mississippi.

The petition of G. W. Wadman, stock-

holder of the Jackson Oil & Refining company, of Jackson, Miss., against the company and state and county officials, filed in the United States district court in that city, seeking to restrain the operation of the 10-hour labor law, has been denied by federal judges before whom the petition was argued. Attorney General Collins and his assistants went to New Orleans to argue the case, and were opposed by Marcellus Green, of Jackson, who appeared for the oil mill. The attorney general's office received the information that the court had upheld the new law.

### Labor Council Active for Better Laws for Women.

The labor council of Houston, Tex., has unanimously endorsed the Speer bill for the removal of the legal disabilities of married women. The council has written letters to all labor councils of the state and has enclosed copies of the bill and has asked the formal endorsement and cooperation of the labor councils. This co-operation is being freely promised and actively extended. The Palestine labor council was one of the first labor organizations to give the proposed legislation its endorsement, and this endorsement also was unanimous.

### Rhode Island Federal Employees Form Temporary Association.

About 150 civil service employees from various parts of Rhode Island assembled in the Federal building at Providence and formed a temporary organization under the tentative name of Rhode Island United States Civil Service Reform and Amalgamation Association. The object of the association is to work for a system of pension, promotion and compensation for civil service employees, and it substantially takes the place of the former United States Civil Service Retirement association

which was dissolved by court order.

### Suit Against Master Horsehoers.

The federal government has filed a civil suit in Detroit, Mich., against the horsehoers' combination. In a petition in equity, attorney general Wickham charges the injunction against the Master Horsehoers' National Protective association, its officers and manufacturers of drilled horse shoes, adjustable calks and rubber hoof pads from continuing an alleged combination and conspiracy to confine the sale of those articles in this country and Canada to horsehoers and prevent their sale direct to horse owners. Through unlawful agreements and contracts it is charged the defendants have seriously interfered with interstate and foreign commerce in violation of the Sherman law.

### Central Vermont Settles.

The Central Vermont Railroad company, by its counsel, William J. Brennan, of New London, and C. W. Whitler, of St. Albans, Vt., has confessed to a violation of the federal "hours of service act," before Judge James L. Smith in the United States court and has paid a penalty of \$500, fine and costs of \$24.19. The fine was based on \$100 imposed under each of five counts. The federal act prohibits the employment of trainmen on an interstate train for more than 16 consecutive hours.

### Greystone Strikers Firm.

By unanimous vote 820 strikers of the Benn Mill at Greystone, Rhode Island, gathered in a mass meeting, rejected the offer of the company management of a 5 percent increase in wages. It was declared that the raise must be at least 10 percent or nothing.

### Three Shaves a Day.

Three shaves a day are none too much for the extravagant young men of Haverhill, Mass., now that young women barberesses are strike-break-

ing in no less than 24 shops where the effect of the barbers' strike is being felt.

### State Troops Withdrawn.

While no proclamation was issued by governor Glasscock lifting martial law in the coal strike district of Kanawha county, West Virginia, all the remaining state troops have been withdrawn from the zone.

### Only Organization of Kind.

The only organization of its kind in the world is what its official card claims for the Ipswich Clam Diggers' union, 14,295, American Federation of Labor. The union was formed recently.

### Notes of Union Labor.

A school of oratory for women, to meet the growing demands for speakers in suffrage campaigns has been opened in Chicago.

A union of chauffeurs, stablemen and helpers to be chartered by the International Brotherhood of Teamsters, has just been completed in East Liverpool, Ohio.

The journeymen barbers of Chicago are engaged in an active campaign to clean up unsanitary barber shops and to organize the 5,000 journeymen barbers in that city.

A large school book publishing company in Boston, Mass., has just entered into an agreement with the allied printing trades and will hereafter be run as a union shop.

Unexpected success has attended the campaign of the chorus girls backed by the Amalgamated Musicians' union, of London, Eng., for a minimum wage of \$10 per week. All of the large productions in London have acceded to the wage demanded.

The Bangor, Maine, Railway & Electric company has just conceded an increase, which approximates two cents per hour. Advances have been made

in other departments of the company, and the total increase will reach near \$15,000 per year.

In the bureau of Engraving and Printing at Washington, D. C., a new machine has just been started, it being a perfected press which will revolutionize stamp printing. This press prints, gums and perforates the stamps, then cuts them in sections of 100 each, turning out the finished sheets of stamps in one process.

The patternmakers of Cleveland, O., have just secured an excellent agreement with a local wire works company. Wages have been increased to 45 cents per hour and there is also to be a reduction in the working time of 15 minutes every three months until the eight-hour day is finally established.

The United Brotherhood of Carpenters, of Wheeling, West Virginia, after many years of effort upon its part to bring into the confines of the union all the journeymen carpenters, has finally been successful in securing a contract with the last contracting firm employing non-union carpenters. This agreement unifies the last carpenter contracting firm, and makes the union shop universal in the carpenter trade in the entire Wheeling district.

### Catarh Cannot Be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarh Cure is taken internally, and acts directly upon the blood and mucous surfaces. Hall's Catarh Cure is not a quick medicine. It is prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best known ingredients, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarh. Send for testimonials, free.

Take Hall's Family Pills for constipation.

Sold by Druggists, everywhere.

## Christmas Presents

That are useful. See our lines of Guns, Rifles, Razors, Knives, etc. Not hard to make a selection here.

## Shelton-Payne Arms Co.
