

BEARING FARMER INSTALS A PIPE LINE SYSTEM

Entire Quarter Section Will Be Networked For Irrigation Purposes.

Dealing, N. M., May 7.—One of the finest pieces of development work in the Almbres valley is being carried on by Harry Houghland and his small army of workmen on the Cummings farm, east of the city.

Mr. Houghland, who is an expert contractor, is putting in a complete system of cement mains on the entire quarter section. He is at present engaged in the manufacture of cement tiles for the purpose of placing at regular intervals mains leading to every subdivision of the farm, installing a complete system of irrigation.

One Man Can Operate. The tile for the mains is 12 inch on the inside and is rendered absolutely water tight. Water will be delivered upon the several acres by means of metal outlets. One man can by this system easily give attention to the entire farm, which will be planted in alfalfa.

Mr. Houghland uses cement in car-load lots and his full force will number 50 men. The Executive board of education has authorized the committee on buildings and grounds to investigate the system with a view of establishing it at the school buildings.

BALMORHEA WILL GET FAIR MEET OF TOYAH VALLEY

Crop Conditions Throughout the Valley Assure Many Fine Exhibits.

Balmorhea, Tex., May 7.—The farmers and cattle growers of the Toyah valley will hold a big fair next here this fall. This was finally decided upon at a citizens' meeting, at which an organization was perfected and plans for the fair were made. Prizes in all departments will be offered and every branch of industry in this section will be represented.

The following officers were elected to have charge of the fair: W. E. Gould, president; C. M. Honaker, vice president; A. C. Schreyer, secretary and treasurer.

TEMPE WILL HAVE NEW COTTON GIN

Growers' Exchange Authorizes Purchase of Site for Necessary Buildings For Plant.

Tempe, Ariz., May 7.—Tempe is to have an up-to-date cotton gin and compress. At the annual meeting of the Tempe Cotton Growers' exchange a new board of directors was elected and authorized to purchase a site for the necessary buildings 19 lots in west Tempe. Bids for the construction of the buildings and for furnishing the machinery will be called for at once.

GOVERNOR WILL VISIT NEW MEXICO POTATO CULTURE

State College Experiment Station So Decides, After Investigation.

State College, N. M., May 7.—That climate governs to a large extent the potato growing in New Mexico is the opinion of Prof. Fabian Garcia of the agricultural experiment station.

It is a fairly well known fact that Irish potatoes do not yield satisfactorily in the lower and warmer agricultural districts of this state. There has been an increasing interest in Irish potatoes and the experiment station has probably received more inquiries about them than concerning any other crop.

The experiment station has had this matter under investigation for a number of years. Many different methods of culture, different systems of irrigation and different varieties of seed, and a large number of the varieties that are advertised by the seedmen, have been tried in the state.

At G. N. Petty's ranch east of town, where a big well has been in process of boring for some time past, a good flow was encountered at a depth of 100 feet. The well will be drilled still deeper. This is the shallowest flowing water well in this locality.

BORE FARMERS TO PLANT 2,000 ACRES IN BEANS

Farmers Form Association For Marketing Crops; to Build Warehouse.

Bowie, Ariz., May 7.—That there will be more than 2000 acres of beans alone, besides other farm crops planted in the Bowie valley, was stated at a meeting of farmers held here for the purpose of forming the Bowie Farm Producers' association. About 20 more were present at the meeting and 20 more have since been enrolled.

The object of the association is to cooperate in marketing crops, purchasing seed, etc. When the actual acreage of beans planted is known, the association plans to purchase a threshing machine, and build a rat proof and fire proof building in which to store the beans before they are shipped.

The association will market the crops in carload lots, instead of each farmer selling as an individual. It will, in different ways, to dispose of fruit, poultry and dairy produce.

Many letters come in from all over the state, stating that even at an altitude of 5000 feet the climate is not satisfactory. On the other hand, we find potatoes doing well at altitudes all the way from 7000 to 8000 feet. Whether the trouble is due to altitude or not, cannot be definitely said at this time, but it can hardly be due to the altitude of the fields, for at the present time is along the line of climate. It is believed that the climate is responsible for the tubers not growing any larger.

LABOR MEN MAY BUILD \$400,000 SKYSCRAPER HERE

Plans Are Being Made by Bricklayers' Union to Raise Necessary Fund.

Negotiations for securing the \$400,000 capital necessary to build a new "skyscraper" on the southwest corner of Mills street and Mesa avenue are under way between W. H. Hittler, who holds the lease on the site, and national representatives of the bricklayers' union, William Dubson, president of the national union, has been in El Paso for several days accompanied by J. R. Reese, national secretary, and W. J. Bowen, special representative.

The labor organization is one of the most powerful in the country and the fact that it is considering a proposition to invest nearly half a million dollars here speaks well for the city, according to those who know of the negotiations.

State senator Charles Hudspeth is handling the proposition from the local end and has had several conferences with the union officials, who are apparently favorable to the idea. Bowen returned last night to his home in New York. He came here originally to discuss matters regarding the proposed erection here of a brickplant by the union, but the new proposition, it is said.

They Are Shy on Marble, but Long on Water, and Soldiers Appreciate Shower Baths as Common in the 4th Infantry Camp as They are in the most exclusive north side homes. The baths in the camp are readily seen at the infantry camp, for the dust is ankle deep and considerable real estate moves to the wind here.

Little Bobbie and His Pa

Pa Gets Bobbie Mixed in His Lines and Ma Tries to Get the Tangle Untwisted.

I WAS learning a piece to speak in school Friday last nite. I mean I was learning the piece I am going to speak last nite & Friday is the day I am going to speak it. The name of the piece was Ivory or something like that & it was about a king named Henry. He lived in Navarre. I think there is someone in the old country. It is a very pretty poem, I think, but it is pretty long, too, & I am afraid I will not be able to remember it. Pa is all the time mixing me up by saying it for me & he forgets & gets the lines in the wrong places more than I do, & Ma can't get him to stop.

I used to be faint in my school for declaiming, and Pa. The teachers always used to give me the hardest pieces to speak because they knew that I never forgot a line & they knew how long I had the lines & got the true meaning of the poem. Now in that piece you are learning, for instance, I used to cry out.

Press war you see my white plumes wave above the ranks of war. & let this be your battle cry three cheers for old Navarre!

No, I don't, and Pa, but they used to like to hear me speak that piece Bobbie is learning. But you didn't get those two lines the way they are in this book, I see to Pa. In the book it says: Press war you see my white plumes wave above the ranks of war. & be yure or-flamme today The Helmet of Navarre.

I think, and Ma, & this piece that Bobbie is learning to recite was rote by a girl named Macanley. I guess that I will go out for the evening & see some of the boys and Pa. Well my own family doesn't believe in my superior knowledge any longer. I think it is time for me to stop talking at home. Then Pa put on his hat & went out. Bobbie, and Ma, did you see how glad Navarre was for a chance to put on his helmet & go out? Go ahead now, & learn your piece in peace.

WILL HOLD PECOS FAIR SEPT. 1 TO 4

Earlier Dates Agreed on This Year's First Shipments Registered Here is Received.

Pecos, Texas, May 7.—September 1, 2, 3 and 4 has been set by the Reeves County Fair association as the date for the 1914 fair. The date for the meet had been made earlier this year as it is claimed by many farmers that their best exhibits cannot be made later in the fall. Another reason for this date is that the Pecos volunteer fire department will entertain the Panhandle and Western Texas Firemen's convention the first week in September. Pecos is already making arrangements to insure the success of the fair.

MOUNTAINAIR WILL ENTERTAIN FARMERS

Mountainair, N. M., May 7.—A new and what promises to be a big feature of the Mountainair chautauqua, which meets this year July 23 to August 7, inclusive is a department of the Farmers' congress. This department will be in charge of Ralph C. Ely, who has already completed arrangements for the attendance of specialists in all phases of farm and ranch work in the southwest. The department of agriculture has agreed to send three specialists, one on road building, one on the site and the dairy and one on livestock raising, especially as applied to the open range. This department will meet daily in the forenoon and one particular phase of work will be specifically handled each day.

MARICOPA COUNTY WILL NOT EXHIBIT AT ARIZONA FAIR

Phoenix, Ariz., May 7.—Maricopa county will not compete for the regular prizes in the agricultural department of the state fair this year. This was decided by the Maricopa board of trade and the fair commission. There will be an exhibit from this county, however, and special prizes will be offered. The fair, which is held at the Phoenix fair grounds, has had a great handicap over the other counties which must ship in their agricultural exhibits from distant points.

WILL TRY SALAZAR AT SANTA FE MAY 12

Jose Ynez Salazar will be tried at Santa Fe, N. M., May 12—Governor W. C. McDonald, best known as a cattleman, has turned to horticulture and is planting a 19-acre plot adjoining the grounds of the state university.

EL PASO PIONEERS MEET ON SATURDAY

The El Paso Pioneer association will hold its annual meeting at 1 o'clock Saturday afternoon at Hart's mill. A Pioneer luncheon will be served. Besides the members of the association, a number of invited guests will be present. Elaborate arrangements to make the affair the most successful of its kind yet held are now under way.

DAILY RECORD

To J. C. Frelck, to build an abattoir, 118 East 10th street; consideration \$1000; April 22, 1914. To J. Van Wagner, to build a porch and main repairs at 1112 Montana street; estimated cost \$1000; April 22, 1914. To Hanesy brothers, to build a bungalow, 1112 Montana street; estimated cost \$1200; April 22, 1914.

SOCIAL CLUBS TO HOLD CONVENTION AT HOUSTON

Austin, Tex., May 7.—Col. J. L. Peeler, president of the Association of Texas clubs, announces that the executive committee has just called the annual convention of the bona fide social clubs of Texas to be held at Houston, on Friday, June 5. It will be in session for two days. The convention will consist of members of this association and every club is expected to send delegations.

HOW NATURE CURES CONSTIPATION

And Why Drugs Are Being Used Less and Less For That Purpose. The custom of Internal Puffing for keeping the intestines pure, clean and free from poisonous matter, curing constipation, biliousness and the more serious diseases which may bring on, has become so universally popular and so scientifically correct in its application as to merit the most serious consideration.

Drugs for this purpose have proven that their doses must be constantly increased to be effective; that they force Nature instead of assisting her, and once taken, must be continued. On the contrary, the scientifically constructed Internal Balm gently assists Nature, but is infinitely more thorough in its cleanliness than any drug, no matter what its nature.

The "J. B. L. Cascade," which is now being used and praised by thousands and prescribed by many eminent physicians, is now being shown and explained by Everybody's Department Store in El Paso. Its action is so simple and natural as to immediately appeal to all common sense. That is the reason for its great and deserved popularity. After for months, Why Man of Today Is Only 50 Per Cent Efficient.—Advertisement.
