

BRADFORD MINE TO SINK SHAFT 200 FEET DEEP

Work Is to Be Resumed at Property, After Many Months of Idleness.

Patagonia, Ariz., July 29.—Preparations are now being made by A. L. Har-

ron to a resumption of operations at the Bradford mine in this district. He proposes to sink a shaft 200 feet deeper.

Much good copper ore has been shipped from the Bradford in the past and many believed more good ore will be encountered before the shaft reaches the contemplated depth.

The Bradford is operated by the Bonanza Copper company.

Gets Judgment Against Mine. Dr. A. W. Hardtmayer has secured a judgment in the superior court against the Bonanza Mining company and Jack Cudahy for \$1125 and costs.

Word has been received here from Tom Fraser, well known mining man, that he has taken over the Red Rock mine at Red Rock, and will at once sink a shaft 200 feet from the present 200 foot level.

Thomas A. Tate and B. E. Garter of Blabee have secured a bond and lease on the Connecticut group of claims in Josephine canyon and will start work at once.

The Connecticut has shipped many carloads of very fine copper ore within the past two years. It is owned by R. E. Richardson.

Deal For Flux Mine Is On. Progress is being made in negotiations for the purchase of the Flux mine, one of the very largest properties in this district.

Hillsboro, N. M., July 27.—Alfred Strum reports a strike on the property of the Bi-Metallic Mining and Milling company at Tierra Blanca.

A large quantity of rich float has been found and trenches recently dug show a large ore body 21 feet wide.

The main float body extends about 200 feet.

NEW STRIKE MADE IN SIERRA COUNTY

Hillsboro, N. M., July 27.—Alfred Strum reports a strike on the property of the Bi-Metallic Mining and Milling company at Tierra Blanca.

A large quantity of rich float has been found and trenches recently dug show a large ore body 21 feet wide.

The main float body extends about 200 feet.

We have several sets of this left and will continue to sell until our stock is exhausted at only \$8.00

ROGERS Furniture Co. 110-112 N. Stanton St.

AUGUST REYMERT FORMALLY OPENS CAPE COD CANAL

Required an Expenditure of \$12,000,000 to Complete Mammoth Project.

Buzzards Bay, Mass., July 29.—The Boston Cape Cod and New York canal connecting Buzzards Bay with Massachusetts Bay and enabling coastwise

travel to avoid the dangerous passage around well strewn Cape Cod, was formally opened today by August Belmont of New York, president of the

constructing and operating company. The canal shortens by 70 miles the shipping distance between the ports to the north and the south of it.

Although the canal has actually been open from one end to the other since early this month, no vessels other than those belonging to the owners of the canal, have been allowed to pass through it.

The canal will be open to traffic tomorrow and will be completed in all its details about the first of October.

is 12 Miles Long. The Cape Cod canal is 12 miles long, including a cut through Buzzards Bay to Sandwich, Mass. It has a bottom 100 feet in width, shelving out to 200 and 400 feet at the passing end, and has a draught of 25 feet at low tide.

Greater in its dimensions than the Suez canal, as originally constructed, it can accommodate the largest coastwise vessels afloat, with one or two exceptions.

At the eastern end is a massive breakwater 3000 feet long, which contains more than 350,000 tons of granite. This is designed to protect vessels using the canal from the storms that sweep across Cape Cod bay.

The \$12,000,000 which has been expended in the constructing of the canal has been spent in excavating some 7,000,000 cubic feet of sand and boulders.

The canal is in reality a river, making all of Cape Cod an island, for there is considerable difference between the tides in Massachusetts bay and Buzzards bay, causing a sluggish current.

To Play Important Part. The canal is destined to play an important part in the future commerce along the Atlantic coast.

At the present time more than 25,000,000 tons of freight are transported over the Cape Cod route annually, including coal, 12,000,000 tons; stone, 200,000 tons; Nova Scotia plaster, 250,000 tons; cement, 25,000 tons; oil, 210 tons; ice, 200,000 tons; lumber, 2,000,000 tons; and sand, 50,000 tons.

Other commodities carried in barges and freighters amount to 2,000,000 tons, while regular steamship lines of the higher class carry as cargo 2,000,000 tons of freight around the cape every year.

Many Travel Around Cape. It is estimated that 500,000 persons a year are carried around Cape Cod in the past 50 years. It is said, 2000 vessels of various kinds have been wrecked while attempting the passage and between 700 and 300 lives have been lost.

Tolls for vessels passing through the canal will average in the neighborhood of 7 cents per cargo ton per passage and for vessels without cargo over 500 tons gross register, the rate will be about 5 cents per ton.

SMELTERS COMPETE FOR SAN SIMON ORE

San Simon, Ariz., July 29.—So desirable is the class of ore from the Willie Rose mine, near here, that the El Paso and the Copper Queen smelters are competing for it, it is stated.

A representative of the latter company is to be here in a few days to inspect the ore and, if it suits him, to make a bid for its treatment.

The ore is now going to the El Paso smelter. The last car shipped is expected to net \$12 to \$15 a ton.

A carload of mining machinery will soon be ordered. It will consist of a hoist, oil engine, drills and compressor.

The lower shaft is now 124 feet deep and continues to look better with every shot. It is planned to continue to a depth of 150 feet before attempting to crosscut the ore body.

WORK AT REYMERT MINE IS RESUMED

Florence, Ariz., July 29.—Work has been resumed by the Gunn-Thompson people at the Reymert mine, in accordance with an announcement made a short time ago.

The shaft, which is now 240 feet deep, will be sunk to at least the 300 foot level, it is believed.

It was originally intended to spend \$150,000 to \$200,000 on this property; and that intention may now be adhered to. The management now hopes to locate a copper deposit. The mine was first located as a silver property.

LITTLE BOBBIE'S PA

BY WILLIAM F. KIRK. WE HAVE got a new cook up to our house, she has been there two days & Pa asked Ma last night when her week wud be up & I doant think he was thinking about giving her a raise either.

The name of our new cook is Vivian. I doant hear her last name, it is a Irish name I think. I like the things she cooks but Pa says she talks too much. She is a scabblat.

It has been a terrible hot day down in the city, and Pa is Ma's man. I feel sorry for the poor peepul on the east side, he sed, & I wish I cud do something to help them.

The Girl Who Flirts

By BEATRICE FAIRFAX.

MY first as well as my last word to the girl who flirts is: Don't. But what I want to do in this little talk is to make her see the why and wherefore of my "Don't."

Every day's mail brings me dozens of letters from girls who see attractive young men on the streets as they go about on business or in search of pleasure. Each girl begs me to tell her some way of meeting her particular swain. There is none.

The growth of large cities has done away with community or neighborhood life to a great extent. People today may live in large apartment houses and know nothing of their neighbors.

Now the girl who permits a man to whom she has not been introduced to speak to her may be talking to a lone-

the other is likely to get hurt in feeling or reputation.

When you are introduced to a boy, the person who says "Hello, you are a fine girl—here is Harry who is a fine boy—I want you to know each other" stands sponsor for both of you. An introduction eliminates several of the most dangerous elements of chance in the acquaintance of man and woman. It frees them from ugly suspicions as to the morals and ideals of one another. It serves as a guarantee of character and position if the introducer is a reliable person, and it keeps you within the "rules of the game."

Society is a large community run under certain community rules. One of them is that a nice girl may not talk to strangers. The minute a girl permits a strange man to address her, she gives him a certain leeway to question her real fitness of character.

She lays herself open to suspicion, to gossip and to insult. It is not worth the risk. Surely you agree with it, if it girls? Surely you agree with it, if it girls? Surely you agree with it, if it girls?

It is a flirtation there is always the girl can be certain that this is a harmless "first offense" based on a true feeling of attraction. There is always a question and a suspicion. If she lets one of whom she knows nothing—she asks her, how do I know how many other boys have done the same thing? A friendship so lightly entered into will surely be as lightly broken by one of the casual acquaintances—but

SCOTTISH RITE COMMANDER DEAD

News of the death of grand commander James D. Richardson, of the Scottish Rite supreme council of the United States, has been received by secretary W. H. McCullough, of the El Paso bodies of that rite of Freemasonry.

Mr. Richardson died at his home, in Murfreesboro, Tenn., Friday at the age of 71 years. He was a member of congress from his state for a long period, but gave up his political work several years ago to devote the remainder of his life to the Scottish Rite.

Mr. Richardson was in El Paso six years ago, when he made an official visit to grand commander Jose Castellon, of the supreme council of Mexico, at Mexico City. El Paso consistory No. 2 and coordinate bodies have displayed mourning emblems for the dead commander and formal announcement of his death will be made at the next regular meetings of the bodies.

WEAK LUNGS OFTEN LEAD TO SERIOUS ILLNESS. If you have weak lungs and your system is run down you are sure susceptible to serious lung trouble. By the use of Eckman's Alternative many have been restored to health. Head of this case: 211 S. Atlantic Ave., Haddonfield, N. J. "Gentlemen:—In the fall of 1905 I contracted a very severe cold which settled on my lungs. At last I began to raise spittle and my physician then told me I must go to California immediately. At this time I was advised to take Eckman's Alternative. I stayed at home and commenced taking it the last week of October. I began to improve and the first week in January, 1906, I resumed my regular occupation, having gained 25 pounds, fully restored to health. It is now seven years since my recovery has been effected, and I cannot praise Eckman's Alternative too highly." (Abbreviated) (Signed) W. M. TATEM. Eckman's Alternative is most efficacious in bronchial catarrh and severe throat and lung affections and upbuilding the system. Contains no harmful or habit-forming drugs. Avoid substitutes. Sold by leading druggists. Write Eckman's Laboratory, Philadelphia, Pa., for booklet of recoveries. Kelly & Pelland, Knobsbury Drug Co., People's Drug Store.—Advertisement.
