While Others Feast This Family Has Nothing and Is Without Hope For Future

While the more fortunate of El Pasoans are enjoying their turkey dinners and are rejoicing in the substantial prosperity which has come to them and do the American people, there is a family in Altura Park in the direst need, and unless aid is given them, the burden of trouble for a sick mother and wife and a crippled husband will be added to by the mother going to the poor farm and three little children being sent to some charity institution.

Cured His Rupture

I was badly ruptured while lifting a trunk several years ago. Doctors said my only hope of cure was an operation. Trusses did me no good. Finally I got hold of something that quickly and completely cured me. Years have passed and the rupture has never returned, although I am doing hard work as a carpenter. There was no operation, no loss of time, no trouble. I have nothing to sell, but will give full information about how you may find a complete cure without operation, if you write to me, Eugene M. Fuller, 215 E. 12th St., Des Moines, Iowa. My name is on the wrapper of this medicine and I will not let any one else put my name on it. I will not let any one else put my name on it. I will not let any one else put my name on it.

What action will be taken, so far as has been made public, is not known. NEW LAW ALLOWS LAND FOR PARKS AND PLAYGROUNDS

Phoenix, Ariz., Nov. 26.—The secretary of the interior has notified the Arizona land office that under a new law he is authorized to set aside 20 acres in each section of land under a government reclamation project as a public park, play ground or community center. People using parks so set aside must pay for their maintenance, but water service is to be paid by those who pay the construction costs of the project. It is expected that there will be a demand for park reservations under the Salt river and Yuma projects.

SANTA FE WITHDRAWS TAX SUITS ON FIVE COUNTIES

Phoenix, Ariz., Nov. 26.—Tax suits filed by the Atchison, Topeka & Santa Fe Railway company in the Arizona counties of Mohave, Yavapai, Coconino, Navajo and Apache, have been withdrawn. These suits were filed to contest the valuations placed by the state board of equalization upon the Santa Fe grant lands in those counties. The board decided that the lands were worth from 75 cents to \$3.50 an acre. The land department of the company claimed that practically all the valuations were excessive and filed suit. Recently, however, the matter was turned over to the tax department, which decided to drop the litigation. It is probable that during the next year the tax commission will take some steps to classify the Santa Fe lands so that more equitable valuations can be fixed.

It is expected that the road will be finished in five or six months. About 150 men will be employed. Thus Phoenix will be given direct railroad connection with another flourishing mining camp. The Magma company decided on the construction of the branch in order to avoid hauling ore and supplies to and from Florence, now the nearest railroad station.

RAISE ALL YOU CAN; BUY THE REST FROM YOUR NEIGHBOR.

Use home valley honey. The lessons of Chicago and Kansas City should not be lost upon the mayor and the city council. Real estate values in those cities amounting to millions of dollars have been impaired by the stockyards of those cities. The stinks arising from the stockyards district in Chicago made that city unlivable among the people of the earth for nearly half a century and the nuisance was only abated when, after long years of fighting against the stockyards, the city was compelled to spend sixteen million dollars for a drainage canal which would carry the poisonous sewage of the stockyards district to the Illinois river and thence to the Mississippi and finally into the Gulf of Mexico. The maintenance of this canal will be a burden upon the taxpayers of Chicago for all time to come.

SHOULD BE IN EVERY AMERICAN HOME

President Wilson in a recent message to the National Educational Association, in session at St. Paul, said that "nothing less than a comprehensive revision of the national life is necessary for a teacher." By this means he is enabled to think nationally and not sectionally or locally. This is equally true of all our citizenship, and the only means of acquiring this comprehension is to know and understand history. The work now being offered by this paper to its readers is far and away the best work of its kind. Its division of history into local episodes that mark the boundary line of the different periods of the world's progress, is a stroke of genius. The marvellous illustrations, both in color and half-tones, 150 of them, the handsome text, and the beautiful de luxe style of binding, making the five volumes the most attractive and readable by a newspaper to its readers. Our coupon published elsewhere in today's issue, should be clipped at once.—Advertisement.

On a certain July midnight, nearly two thousand years ago, the capital of the mighty Roman Empire lay slumbering peacefully amidst the sculptured slopes of its seven hills. The sluggish Tiber slipped silently along the southern walls, unweaved by sail or oar, to mingle its tawny waters with the blue Tyrrhenian Sea. There was no moon—no shine of stars.

What Happened When Nero Fiddled and Rome Burned? On a certain July midnight, nearly two thousand years ago, the capital of the mighty Roman Empire lay slumbering peacefully amidst the sculptured slopes of its seven hills. The sluggish Tiber slipped silently along the southern walls, unweaved by sail or oar, to mingle its tawny waters with the blue Tyrrhenian Sea. There was no moon—no shine of stars. A thick murk, so dense as to be almost tactile, filled the endless reaches of space, and enshrouded the city as with a pall. There was no stir of life—no sound—no movement of man or beast—no rustle of leaf or twig—only the awful stillness of a corpse-like world. Suddenly in one corner of the great Circus Maximus—in a little wooden booth used by the jugglers and mountebanks of the day—a slender, yellow tongue of flame shot out from a crack in the wall and licked its way to the roof. Crawling slowly along, it crept from board to board till the flimsy structure burst into blaze. The next booth followed, and the next; and soon the mighty edifice of the Circus itself became a sheet of lambent fire. The nude form of an Ethiopian glided from an alley in the rear, darted into the Appian Way, and ran swiftly toward the Esquiline Hill, where frowned the palace of the infamous Nero. Breathless, he reached the heavily armed sentinel who stood on guard. A sign, a word, and he passed into the lofty hall where a slave guided him to the tyrant's couch. Prostrating himself on the ground, he pointed to the southern heavens, which by this time were lurid with the flames of conflagration sweeping the world's proudest city, Imperial Rome. Nero was evidently expectant of the event, for, spurning the slave with his foot, he summoned his attendants and bade them bring his lyre, his garlands and his festal garments. Arraying himself as was his wont in Grecian theatres, he stepped forth, smote the strings and danced a grotesque figure to the measured rhythm of the music. His eyes gleamed with a wild insanity—his gibbered speech was that of a madman. For six days and seven nights the city burned while the last of the Caesars fiddled and made merry with his drunken favorites. Larned's Great "History of the World" tells how the Christians were accused of the atrocious crime of setting Rome on fire—how they were clad in the skins of wild beasts and mangled by dogs; how they were crucified to make a Roman holiday, and how they were set on fire by way of nightly illumination of Nero's gardens.
