PETROGRAD, Russia, April 24.—Archangel, the oldest port of the Russian empire, in a few weeks more will awaken to her vital war importance; for, when the Arctic ice clears from the White sea, Russia will be able to communicate with her allies through a free western port and to receive much needed war supplies and other manufactures over a route thousands of miles shorter than that by way of Vladivostok.

It says: "Holding only about 10,000 square miles of French territory, or less than one-twentieth of France, the Germans have behind their advanced lines nearly one-half of industrial France and the homes of one-tenth of her population. Pas-de-Calais, Nord, Aisne, Ardennes, Meuse and Meurthe-et-Moselle, of which the Germans hold all or almost all, are the important parts, are the banner departments of France. Here are the mines, the foundries and factories, and the dairies and farms, which, in the past, the wealth and the strength of modern France. In this narrow strip under German occupation, there is produced 70 percent of all coal mined in France, 90 percent of all of the native mined iron, and nearly half of the republic's output of manufactured articles."

WELL DIRECTED SHELL BRINGS DOWN GERMANS IN BIG WAR BALLOON Basel, Switzerland, April 24.—There has been just witnessed here a vivid picture of the war. A German balloon, attached probably to some heavy near Altkirch, rose, as usual, several hundred yards into the air and swung lazily in the light breeze that blew from across the southern summit of the Vosges, when a French shell, hurled with remarkable precision from a French gun, struck it.
