GEO. CLEMENTS WINS AT ADCLUB

Selected as Publicity Director of Imaginary Chamber of Commerce.

George H. Clements, publicity director of the chamber of commerce, was elected advertising manager of an imaginary chamber of commerce, at a session of the El Paso Ad club in the Sheldon grill, Wednesday at noon.

There were three contestants for the post. Joseph A. Wright and E. L. W. Polk being the other aspirants. The imaginary amount of money to be used for the publicity was placed at \$20,000 a year.

How Would Spend Money. Mr. Clements said he would expend \$725 a month for the maintenance of office; printed matter \$4500 annually; advertising in farm papers \$3000; advertising in magazines for investors, \$2500; illustrated lectures \$5000; touring agencies \$400; publicity men excursions \$100.

Use National Weeklies. Joseph A. Wright suggested advertising in the great national weeklies and advanced the idea of having ten traveling representatives to go about the country, interesting farmers and investors in the valley and city. He said that each of these men brought in as many as five acceptable investors a year, it would be a paying investment.

Bring Factories. E. L. W. Polk emphasized the manufacturing possibilities of El Paso, advocated close studies of the raw products of this valley and the securing of factories to change these products into finished articles of trade. He also suggested the publication of well written stories picturing and describing the valley.

Traveling Men. George Morrell, of Newport, Ky., made a brief talk in which he said: "If you want El Paso to be well advertised, then secure the cooperation of the traveling man, for he is the best press agent that a city can have."

The work of Charles E. Russell, chairman of the committee investigating the status of El Paso business, was accepted by the admen and Mr. Russell was thanked upon his careful compilation of statistics. Presently, Mr. Mix stated that the document had been forwarded to the national research committee, where it would be printed.

President Mix also announced that the executive board had appropriated \$50 to be donated to the chamber of commerce fund and the only regret of the directorate was that the amount could not be considerable more.

Henry T. Bowie, representative of El Paso at the executive session of the Texas Ad club in Fort Worth on Monday, made his report and stated that, while the feeling among the admen was that El Paso is a long way off, there is the confidence that the convention here on February 14, 15 and 16 will be a big one. Mr. Mix designated Mr. Bowie as chairman of the entertainment committee for the convention.

RAILROADER CLEARS TRACK AND PREVENTS TRAIN WRECK. Steubenville, Ohio, Dec. 8.—Penny's train railroad officials today were investigating an attempt made Tuesday night to wreck their fast St. Louis to New York train No. 22, at the entrance to tunnel No. 7, near Uniontown, Ohio.

Five minutes before the flyer was due, a track walker discovered a steel rail bound to the tracks with chains. Using bolsters to break the chains, he cleared the obstruction just as the train whistled from the tunnel.

Company officials think trackmen recently discharged may have planned the wreck for revenge.

Prof. Schlapp, of Cornell, announces that the automobile and the movie show are exerting a bad influence on the public.

WHEN Gutenberg invented type, and thinking persons found a hitherto unheard of way to spread their thoughts around, the shocked professors of the time exclaimed in wild alarm: "We fear this dreadful printing press will do the world much harm. Instead of working at their jobs our farmhands and our cooks are bound to waste their precious time in reading foolish books."

WHEN Fulton's steamboat smoothly sailed along the Hudson's tide and those who came to peer remained to watch it, goggle-eyed; the horrified professors who were teaching at the time declared the steamboat couldn't fail to turn the world toward crime. "The populace will steal," they said, "and murder and garrote. To get the price of joy rides on that puffing, chuffing boat."

WHEN Alexander Graham Bell worked out the telephone and barriers of distance were abruptly overthrown, there rose professors in the land who said: "This thing won't do; this thing that Bell's invented is ingenious, it is true, but people will neglect their work and squander all their pay in gabbling at the telephone the whole enduring day."
