ONE DINNER DISH SAID TO BE ENOUGH Extrimists in the Matter of Eating Should Test Natural Vitalitas.

Scientists are advocating many theories about how and what to eat in the hopes of finding to overcome the greatest cause of the human race's stomach disorders. One of the late theories is to have not more than two dishes at one meal and preferably one: the Vitalitas. The theory is that the gastric juice better accommodate itself to one particular kind of food than to a variety. There may be wisdom in this, but there is ample proof that such theories can be set aside and that the stomach, when once and into healthy condition, will take care of wholesome food of whatever character or variety.
