SUB TORPEDOES TROOP SHIP, 2800 U. S. SOLDIERS SAVED; U-BOAT SUFFERS WORSE FATE

LONDON, Eng., Sept. 11.—A troop ship with 2800 American soldiers on board, has been torpedoed. All hands were saved. The troop ship was headed for the United States.

In order to save time, instead of launching the boats, the men clambered down ropes to destroyers which swarmed around the stricken vessel and came close alongside. This operation was greatly facilitated by the fact that the sea was not rough.

The troop ship was a member of a large convoy approaching the English coast. The vessel was torpedoed 200 miles from shore. Several soldiers told the Associated Press that they saw the German submarine U-107 about the vessel after one of the depth bombs exploded and then entirely disappeared.

Something had gone wrong with the troop ship's engines which compelled her for a time to lag behind the rest of the convoy, but the trouble had been fixed up and she was fast catching up with the other transports when a torpedo hit her just forward of the engine room.

The transfer of the American soldiers from the stricken vessel to the British and American torpedo boat destroyers, was quickly made without injury to any one.

There was no sign of panic on board, and the admirable behavior of the men was especially gratifying to the officers.

Many of the troops came from Chicago and Cleveland and large parties were carrying American flags and other tokens of their love for their native land.

Ship Helms to Sink. The vessel at once began to sink by the bow. Many of the soldiers at the time were taking baths. They did not wait to dress, but made for the deck with what clothing they could hastily gather up.

May Salvage Vessel. To the surprise of most of the soldiers, the troop ship did not sink. Some means apparently were found to check the influx of water and she got near enough to the shore to be rescued. It is hoped that the vessel ultimately can be salvaged.

The troop ship, torpedoed by a German submarine and beached on the English coast last Friday, is the third vessel carrying American soldiers to the war zone to be attacked with any degree of success by U-boats. The two other vessels were the Anchor line steamer Tuscarora and the Anchor line steamer Oriental.

RUSSIANS, OVERAWED BY ENTENTE ALLIES, FLEEING EVERYWHERE

Siberian Line Disappears, Having 'Moved 4000 Miles to Westward,' According to American Authority; Czechoslovak Forces Go Through Lake Baikal Toward Tchita; Bolsheviki May Become Non-Combatants.

Vladivostok, Russia, Sept. 11.—The Siberian front has disappeared over night. In the words of an American authority it has "moved 4000 miles to the westward."

Communication has been completely established between Vladivostok and Irkutsk.

Czechoslovak forces have broken through from Lake Baikal in the direction of Tchita under Capt. Gaida, while Gen. Semenov's Cossacks, supported by Czechoslovaks, have approached the town-Baikala from the Onon river.

The Bolsheviki forces, seemingly over-awed by the presence of entente allied troops, have scattered. Military officials say it would not be surprising to find that the bolsheviki had dissolved into non-combatant groups intent only in seeking amnesty from the entente allies.
