Alkali Makes Soap Bad for Washing Hair

Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle. The best thing to use is just plain unsifted coconut oil, for it is pure and entirely free from alkali. It is very cheap, and beats the most expensive soap or anything else all in pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

Resinol will heal that disfiguring rash so you can wear this dress. "I know, because I have used it, and found that it stopped the smarting and itching when I made the first application, and in a short time the eruption was gone. I used Resinol Soap with it and it quickened the action of Resinol Ointment. You can get both from your druggist."
