

SAMSON (Model M)  
Complete with power take-off and automatic control  
\$650.00 f. o. b. Janesville, Wis.

# SAMSON TRACTOR \$650

THE twelve points of Samson (Model M) Tractor given on the opposite page, you will find, unlike the usual mechanical specifications, to be important features—each feature so vital as to make each one indispensable and of the utmost value.

Study each one carefully. Appreciate how the method of construction insures economy of operation, easy handling, and minimum care in maintenance.

And then think what it would mean to you to own a Samson (Model M) Tractor.

SAMSON TRACTOR COMPANY

Janesville, Wisconsin

Check up these Specifications point by point with the ordinary tractor

## Twelve Important Points— and Each Point a Feature

- Motor:** The motor is suspended at three points. Extra water space surrounds the cylinder jackets. An air washer cleans the motor of dirt, grit, and any other substance. In this way the efficiency of the motor is greatly increased.
- Radiator:** The radiator is of tubular type. Extra large hand hole makes possible easy cleaning and any repairing caused by accident.
- Oiling:** Forced feed oiling to all bearings. This method of oiling will be found in the highest-priced motors built. Forced feed costs more than splash feed but is surer and safer. Forced feed costs more than constant oil level—up hill or down.
- Fuel:** Burns kerosene or gasoline without any change or adjustment. Fuel tank holds 22 gallons; with extra large hand hole, enabling one to clean the tank easily. Reserve gasoline tank holding three gallons.
- All Moving Parts Enclosed:** All moving parts enclosed and self-oiling. All moving parts waterproof and dustproof. No moving parts exposed except the four wheels.
- Power Take-Off:** A feature of the design of the Samson (Model M) is the "power take-off pulley" acting as a brake when in field use. This brake, actuated by the clutch pedal makes change of gears safe and easy to handle. Recognized for years as standard practice in high priced motor car construction.
- Clutch:** A plate clutch is used, which is self-adjusting and runs in oil.
- Grease Cups:** There are but three grease cups on the entire tractor. (On most tractors there are too many to count.) All three grease cups are in plain view. One is on the fan and two on the front axle.
- Lubrication:** Lubricating oil is applied only at two points, and from there distributed to all moving parts—and only two kinds of oil are used. The motor and clutch require the regular cylinder oil and the transmission and axle require a heavy transmission oil.
- Governor:** Motor speed is regulated by a mechanical governor.
- Simplicity of Construction.** The simplicity of construction will be best understood when it is learned that it requires only three box wrenches to take down and put together the Samson (Model M) Tractor.
- Tool Kit:** The entire contents of the tool kit consists of three box wrenches. How many do you find as necessary equipment on the ordinary tractor? The Samson (Model M) Tractor does not even require an oil can.

Information necessary so as to enable us to advise the purchaser of the proper Tractor he should buy

Name.....  
 Post Office.....  
 Township..... County..... State.....  
 Number of acres in farm..... Acres in corn.....  
 Number of acres improved..... Acres in cotton.....
